Train for a rewarding career in

Construction
Management

San Joaquin Valley College's (SJVC) Construction Management program provides graduates with the technical and managerial skills needed in today's commercial and residential construction industry.

Students will learn to plan and direct activities concerned with the construction and maintenance of structures, facilities, and systems. They may also become involved in the development of a construction project as well as oversee its organization, scheduling and budgeting.

Graduates are prepared for construction management responsibilities creating the opportunity to move into supervisory roles.

Your trusted source for hands-on and online training.

SJVC excels at in-person, hands-on learning in classroom environments, as well as flexible online learning options, allowing you to study at your convenience. Both options enable you to prepare for a career with real-world training.

Students Learn:*

- Project management from predevelopment to completion on schedule, within budget and quality/safety standards
- Project management tools such as scheduling software, budget estimating, constructability reviews and communication protocols
- Supervisory and leadership communication skills
- Evaluation of potential legal issues to create and coordinate responses
- Professional development, critical thinking and reasoning skills, pertaining to interpersonal interactions and ethics
- Professional skills, attitudes and behavior that employers expect of SJVC graduates

*See college catalog for complete student learning outcomes for this program.

At SJVC, we value:

Integrity
Family
Professionalism
Communication
Diversity
Success

Credential and Professional Certifications

Graduates earn an Associate of Science degree in Construction Management.

Admissions Requirements

- ❑ High School diploma or equivalent
- ❑ Wonderlic SLE assessment score of 14 or higher

On-ground applicants must have reliable plans for transportation, child care and time to devote to school work outside of scheduled class hours.

See the SJVC College Catalog for additional information on institutional admission requirements.

Online applicants, visit [sjvc.edu/online-programs/technical-requirements](https://www.sjvc.edu/online-programs/technical-requirements) for software and hardware requirements for your computer.

Career Opportunities

Construction management professionals can be supervisory level or self-employed managers. Construction managers typically perform a wide variety of tasks within the industry, including:

- Monitor projects and report progress
- Coordinate, and supervise construction projects
- Respond to work delays, emergencies, and other problems with the project
- Collaborate with construction specialists
- Interpret and explain contracts and technical information
- Select subcontractors and schedule and coordinate their activities
- Prepare cost estimates, budgets, and work timetables
