SAN JOAQUIN VALLEY COLLEGE

CATALOG

Effective January 1 – December 31, 2016
LETTER FROM THE PRESIDENT/CHIEF EXECUTIVE OFFICER

Dear Future Graduates:

Welcome to San Joaquin Valley College (SJVC)! I’m honored that you have chosen to pursue your education at SJVC and commend you for taking the first step towards embracing the educational, professional, and personal goals you have set for yourself. Please be assured that I have the utmost confidence in your ability to reach your fullest potential and achieve your dreams and aspirations.

SJVC takes great pride in the high standards of instruction and the superior services we deliver to our students. Our faculty and administrative staff are committed to providing you with an excellent educational experience that we believe will build your self-confidence and develop your individual potential.

I can say with great confidence that in the thirty-eight years since SJVC first began, our founding principle has not changed: An unwavering commitment to our students and their success. The fact that SJVC began with three Medical Assisting students in space rented month-to-month, does not change the point of that beginning: Whether three students or the more than 3,800 currently being nurtured at our fourteen campuses, our success is still measured by their success.

As such, SJVC commits to partner with you in your educational and professional endeavors and to make every effort to assist you in achieving your goals and aspirations. In turn, I urge you to aim high, commit yourself to giving the time and effort required to learn, and to diligently persevere through the many challenges that you may face during this process. Please be assured that students have achieved their goals, regardless of their educational background, skill level, ethnicity, or life experience. I hope your time with us will be life-changing and will develop your talents and potential to the fullest. May it give you self-confidence and purpose beyond measure.

I look forward with you in anticipation of your graduation and your preparedness to pursue employment in a specific career field. I hope that your experience with SJVC will result in a desire to embrace lifelong learning and to play an active role in community events. Please commit to joining the rank of the numerous SJVC graduates that have achieved their goals and dreams.

Sincerely,

Michael D. Perry
President/CEO

RIGHT TO CHANGE REQUIREMENTS

This catalog and its contents are subject to change without notice, as SJVC deems necessary and appropriate. Therefore, this catalog and the descriptions contained herein are not to be construed as a contract binding SJVC to any specific policies.

Students will normally follow certificate or degree requirements in effect at the time of admission. However, a student who changes educational programs or fails to maintain continuous enrollment may be required to follow the catalog and student handbook in effect at the time of the change. Furthermore, requirements of government agencies, accreditation agencies, and other regulatory bodies may influence a student’s certificate or degree requirements. Possible changes include, but are not limited to, graduation requirements, admissions requirements, tuition, fees, curricula, and course content. Changes will be reflected in the annual publication of the catalog. Significant changes that occur between catalog publications will be published in a supplement.

San Joaquin Valley College (SJVC) was founded in April 1977 as a private, for profit, Career College dedicated to providing high quality occupational training. Founders Robert and Shirley Perry established the first campus in Visalia, California, training health care professionals. Today, the College offers Associate of Science Degrees and Certificates of Completion in the areas of medical, business, and technology at its campuses in Bakersfield, Fresno, Hanford, Hesperia, Lancaster, Modesto, Rancho Cordova, Ontario, San Diego, Temecula, Madera, Visalia, and the Aviation Campus at the Fresno Yosemite International Airport. The College also offers several online education programs.

**PHILOSOPHY/INSTITUTIONAL PURPOSE**

SJVC is committed to the personal, academic, and professional success of its students. The College provides opportunities for developing career skills, critical thinking, professionalism, and an excellent learning experience for the classroom, workplace, and life. It incorporates hands-on, kinetically-inspired assignments and projects which are vital for the vocational-based program offerings. Instructors are expected to be facilitators of the classroom by engaging students in interpersonal, two-way dialogue. Individualized and personalized instruction is encouraged.

SJVC’s mission strongly emphasizes education directed toward career development and advancement. Real world education is paramount. Therefore, a plethora of resources are available to faculty members to assist in the delivery of real work instruction, such as mock medical, technical, and business settings within the classrooms, industry-specific equipment, interactive software with true-to-life scenarios, and field trips to businesses and medical settings. Most programs also include an externship or clinical experience.

The College is also responsive to the needs of each community where one of its campuses exists. These communities provide an ideal setting for the medical, business, and technical programs of SJVC.

**MISSION STATEMENT**

SJVC prepares graduates for professional success in business, medical, and technical career fields. The College serves a diverse student population with a common interest in professional development through career-focused higher education. The College is committed to student development through the achievement of measurable learning outcomes, emphasizing a balance of hands-on training and academic instruction. The College identifies and responds to the educational and employment needs of the communities it serves. The College is committed to the success of every student.

Adopted by the Board of Governors, July 2008

**CORE VALUES STATEMENT**

As a premier leader in career-focused education, SJVC values an education and employment environment which promotes:

**Success** – The College Community is committed to the personal, academic, and professional success of its students, employees, and graduates by providing high-quality education programs, instruction, professional development opportunities, support services, and guidance.

**Integrity** – The College Community expects personal and professional integrity in the fulfillment of its mission.

**Excellence** – The College Community sets excellence as a standard in all areas of operation.

**Diversity** – The College Community celebrates and embraces diversity; emphasizing inclusion and open dialogue.

**Community Involvement** – The College Community encourages and supports student and employee involvement in their respective communities to mutually enhance civic, personal, and intellectual development.

**Lifelong Learning** – The College Community fosters an environment where students and employees actively pursue lifelong learning.

Adopted by the Board of Directors, September 2009

The first SJVC Campus in Visalia, CA
INSTITUTIONAL LEARNING OUTCOMES/UNDERLYING PROGRAM OBJECTIVES

Upon completion of any and all programs at SJVC, graduates will be: Professional, Confident, Skilled, Educated, Communicators, and Citizens.

When students successfully meet the ILOs they will characterize the following attributes:

**Professional**
- Critical thinkers
- Lifelong learners
- Solid work ethic
- Organization & time management skills
- Accountable and responsible
- Courteous and conscientious
- Aligned with standards of the profession
- Self-disciplined
- Integrity

**Confident**
- Sense of Purpose
- Role models for our families
- Persistent
- Goal-directed
- Taking Initiative
- Leaders
- Self-assured
- Self-reliant
- Successful

**Skilled**
- Hands-on practice
- Career-specific training
- Immediately employable
- Technology training
- On-the-job experience
- Learning the skill of learning

**Educated**
- Well-rounded
- Lifelong learners who continue to grow personally and professionally
- Effective time managers
- Problem solvers
- Decision makers
- Organized
- Degree or certificate holders

**Communicators**
- Effective writing skills
- Practicing good verbal communication
- Respecting and projecting diversity
- Collaborating with peers
- Interviewing skills
- Customer Service Skills
- Building teamwork

**Citizens**
- Compassionate
- Committed to the helping professions
- Building relationships
- Giving back to the community
- Ethical
- Dependable
- Responsible
- Appreciative of others and diversity
SERVICE OUTCOMES
Upon interaction with student and employee services, participants will be able to:

- Express opinions and feedback of services
- Retrieve information about services from a variety of sources
- Access resources easily
- Utilize services for personal success
- Confirm satisfaction of high quality and timely service

ASSESSMENT STATEMENT
Philosophy: Assessment is an ongoing process which ensures the entire organization continually evaluates and reflects upon contributions to the development of a qualified career candidate.

Purpose: The assessment process is used to continually guide, analyze, and improve student learning, resource allocation and support services to align the organization with the SJVC mission statement.

Principle: Assessment is student focused, faculty- and staff-driven, outcome-based, and follows the six-step cycle of continuous quality improvement.

- Define and refine learning/service outcomes
- Plan and provide learning and service opportunities
- Assess outcomes using a variety of methods
- Collect and analyze assessment data results
- Make institutional improvements based on assessment data results
- Close the loop: re-evaluate

GOVERNANCE AND ADMINISTRATION
SJVC operates under a shared governance structure comprised of the Board of Governors, Board of Directors, Senior Management, Executive Council, and Campus Administration.

Joint responsibility, authority, and decision making are accomplished through the collaboration of managers, faculty, staff, and students. All constituencies work together to plan for the future and develop policies, regulations, and recommendations which guide the College. Broad participation from all segments of the College community is both encouraged and expected in the governance structure.

A listing of administrators and faculty is provided in Section 9.

¹An accrediting agency recognized by the United States Department of Education.

²Programs at the Bakersfield, Ontario, Rancho Cordova and Visalia campus have ‘Continuing Accreditation’ status. The program at the Temecula Campus has ‘Provisional Accreditation’; graduates from this program are considered graduates of an approved program and are eligible for all Respiratory Care credentialing examinations.

**NOTE:** Pursuant to 20 U.S.C. §1092(a) (1) (2), institutions must allow prospective and current students to review documents describing accreditation, approval, or licensing. A request to review records pursuant to this section, must be submitted in writing and clearly identify the requested record(s). Within ten (10) business days of receipt of the request, the College will notify the requesting party of the date, time and location where the requested record(s) may be inspected.
BANKRUPTCY

SJVC does NOT have a pending petition in bankruptcy, is NOT operating as a debtor in possession, has NOT filed a petition with the preceding five years, or has NOT had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (U.S.C. §1101 et seq.)

STATE APPROVALS

California

SJVC is a private institution and is approved to operate as an accredited institution by the California Bureau for Private Postsecondary Education (BPPE). Approval to operate means that SJVC has been found in compliance with the standards set forth in the California Private Postsecondary Education Act of 2009 (California Education Code, Title 3, Division 10, Part 59, Chapter 8) and Title 5, Division 7.5 – Private Postsecondary Education of the California Code of Regulations.

Any questions that a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at:

Washington

SJVC is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes San Joaquin Valley College to offer field placement components for specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430.

Florida

SJVC is licensed by the Commission for Independent Education, Florida Department of Education to deliver education in the State of Florida. Additional Information regarding this institution may be obtained by contacting the Commission at 325 West Gaines Street, Suite 141, Tallahassee, FL 32309-0400, toll-free telephone number (888) 224-6684.

Maryland

SJVC is registered with the Maryland Higher Education Commission for its programs offered through the Online Division. For students residing in Maryland, SJVC is subject to investigation of complaints by the Office of the Attorney General or the Maryland Higher Education Commission. Complaints should be directed to:

Maryland Attorney General
Consumer Protection Division
200 St. Paul St.
Baltimore, MD 21202
(410) 528-8662/ (888)743-0823 (toll free)

Texas

SJVC is not regulated in Texas under Chapter 132 of the Texas Education Code.
SJVC LOCATIONS AND PROGRAM OFFERINGS

Bakersfield Campus
201 New Stine Road
Bakersfield, California 93309
Phone: (661) 834-0126

The Bakersfield Campus was founded in 1982. Located in the Southern San Joaquin Valley, this campus serves students and employers in all neighboring communities between Visalia and Santa Clarita. The following programs are offered at the Bakersfield Campus:

**Associate of Science Degree**
Business Administration
Clinical and Administrative Medical Assisting
Criminal Justice: Corrections
Diagnostic Medical Sonography
HVAC-R Technology
Industrial Maintenance Technology
Medical Office Administration
Pharmacy Technology
Respiratory Therapy
Surgical Technology

**Certificate of Completion**
Clinical Medical Assisting
Dental Assisting
Diagnostic Medical Sonography
Industrial Maintenance Technology

Fresno Campus
295 East Sierra Avenue
Fresno, California 93710
Phone: (559) 448-8282

The Fresno Campus was founded in 1985. Located in the heart of the San Joaquin Valley, this campus serves students and employers in all neighboring communities between Madera and Visalia. The following programs are offered at the Fresno Campus:

**Associate of Science Degree**
Business Administration
Clinical and Administrative Medical Assisting
Criminal Justice: Corrections
HVAC-R Technology
Medical Billing Specialist
Pharmacy Technology
Surgical Technology
Veterinary Technology

**Certificate of Completion**
Clinical Medical Assisting
Dental Assisting
Industrial Maintenance Technology

Delano Campus
1920 Cecil Avenue
Delano, CA 93215
Phone: (661) 778-1145

The Delano Campus was founded in September of 2015, and serves students and employers in the southern communities of Kern County. The following programs are offered at the Delano Campus:

**Certificate of Completion**
Clinical Medical Assisting
Dental Assisting
Diagnostic Medical Sonography
Industrial Maintenance Technology

Fresno Aviation Campus
4985 East Andersen Avenue
Fresno, California 93727
Phone: (559) 453-0123

The Fresno Aviation Campus was founded in 1991. Located in the heart of the San Joaquin Valley, this specialized aviation campus serves students and employers in the aviation maintenance industry throughout the Western United States.

The Fresno Aviation Campus offers an **Associate of Science Degree** program in Aviation Maintenance Technology.
Hanford Campus
215 West 7th Street
Hanford, California 93230
Phone: (559) 584-8840

Originally an extension of the Visalia Campus, this site was established in July of 2004 to better serve the educational needs of students and employers in Kings and Tulare counties. The site is now a full-fledged SJVC branch campus and offers the following programs:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Medical Office Administration

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Medical Office Administration

Hesperia Campus
9331 Mariposa Road
Hesperia, California 92344
Phone: (760) 948-1947

The Hesperia Campus was founded in 2009. Located in the High Desert community of Victor Valley, this campus serves students and employers in the cities of Hesperia, Adelanto, Victorville, and Apple Valley. The following programs are offered at the Hesperia Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Criminal Justice: Corrections
- HVAC-R Technology
- Industrial Technology (Industrial Maintenance Technology)
- Medical Billing Specialist
- Pharmacy Technology

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

Lancaster Campus
42135 10th Street West, Suite 147
Lancaster, CA 93534
Phone: (661) 974-8282

The Lancaster Campus was founded in October of 2012. Located in the Lancaster-Palmdale area, this campus serves students and employers in the Antelope Valley. The following programs are offered at the Lancaster Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Criminal Justice: Corrections
- HVAC-R Technology
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

Madera Campus
2185 West Cleveland Avenue, Unit J
Madera, CA 93637
Phone: (559) 302-1134

The Madera Campus was founded in June of 2014, and serves students and employers in all communities north to Modesto and south to Fresno. The following programs are offered at the Madera Campus:

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Medical Office Administration
The Modesto Campus was founded in September of 2004. Located in the northern San Joaquin Valley, this campus serves students and employers in all neighboring communities between Merced and Stockton. The following programs are offered at the Modesto Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Criminal Justice: Corrections
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

The Ontario Campus, formerly known as the Rancho Cucamonga Campus, was founded in 2001. Located in the heart of the Inland Empire, this campus serves students and employers in all neighboring communities between San Bernardino and Pomona. The following programs are offered at the Ontario Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Construction Management
- Criminal Justice: Corrections
- Dental Hygiene
- HVAC-R Technology

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Industrial Maintenance Technology
- Medical Office Administration
- Pharmacy Technology

The Rancho Cordova Campus was founded in June of 2005. Located in Northern California, this campus serves students and employers in all neighboring communities in and around Sacramento. The Rancho Cordova Campus offers an **Associate of Science Degree** program in Respiratory Therapy.

The San Diego Campus, located in Chula Vista, serves students and employers in the greater San Diego area. The campus was founded in July of 2012 and offers an **Associate of Science Degree** program in Dental Hygiene.

The Temecula Campus offers programs in Industrial Maintenance Technology, Medical Office Administration, Pharmacy Technology, and Respiratory Therapy.
The Temecula Campus was founded in July of 2011. Located in the southwestern region of the Inland Empire, this campus serves students and employers in the cities of Temecula, Lake Elsinore, Wildomar, Canyon Lake, and Sun City. The following programs are offered at the Temecula Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- HVAC-R Technology
- Medical Billing Specialist
- Pharmacy Technology
- Respiratory Therapy

**Certificate of Completion**
- Business Administration
- Clinical Medical Assisting
- Dental Assisting
- Medical Office Administration
- Pharmacy Technology

---

**Visalia Campus**
8344 West Mineral King
Visalia, California 93291
**Phone:** (559) 651-2500

The Visalia Campus was founded in 1977. Located in the heart of the San Joaquin Valley, this campus serves students and employers in all neighboring communities between Fresno and Bakersfield. The following programs are offered at the Visalia Campus:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Computer System Administration
- Criminal Justice: Corrections
- Dental Hygiene
- HVAC-R Technology
- Human Resource Administration
- Medical Billing Specialist
- Pharmacy Technology
- Registered Nursing/LVN to RN
- Respiratory Therapy
- Vocational Nursing

**Certificate of Completion**
- Clinical Medical Assisting
- Dental Assisting
- Industrial Maintenance Technology

---

**Online Division**
[http://www.sjvc.edu/campus/SJVC_Online/](http://www.sjvc.edu/campus/SJVC_Online/)
**Phone:** (877) FOR-SJVC

The Online Division was established in 2001 in order to better serve the educational needs of students and employers outside the geographical areas served by the on-ground campuses. The Online Division provides instruction to students in all 50 U.S. states, Puerto Rico, and the Virgin Islands. The following programs are offered through the Online Division:

**Associate of Science Degree**
- Business Administration
- Clinical and Administrative Medical Assisting
- Clinical Medical Assisting
- Construction Management

Visalia, California 93277
**Phone:** (559) 734-9000
[www.sjvc.edu](http://www.sjvc.edu)

The Central Administrative Office (CAO) provides technical and administrative oversight, direction, and support to all of the SJVC campuses.
PROGRAM REVISION AND CANCELLATION
A program can be cancelled up to five (5) calendar days after the program start date. The College reserves the right to schedule subjects in the order it deems necessary and to make appropriate and reasonable changes in curriculum. The College reserves the right to delivery instruction off-site in a facility within 25 miles of the home campus that meets the instructional needs of the program or course.

TYPES OF INSTRUCTION/COURSE DELIVERY
All SJVC courses include online content and resources. Some courses required for graduation may be delivered wholly online. SJVC will provide students with on-ground campus access to required technical resources for participation in online courses as needed.

On-Ground Courses
On-Ground courses are offered on campus during academic sessions scheduled throughout the year. School is open and each class starts with a ten-minute break to prepare for class. Session length and the number of meetings per week may vary by program.

Online Courses
Distance learning is a mode of education in which instruction occurs when there is a geographical distance between the teacher and the student. Students in distance learning classes do not need to come to campus each week but learn from and communicate with their instructors using a variety of technologies.

Online programs have the same student learning outcomes, general topics, and credit load as the corresponding on-ground version of the programs. Online programs are offered for differing session lengths depending upon the program. Students interested in SJVC’s online programs should check the website for the most current offerings: http://sjvc.edu/campus/SJVC_Online/

To be eligible for participation in an online program, students must have access to a personal computer and internet connection which meets the minimum requirements of the College (for more information, please visit the following website: http://www.sjvc.edu/pages/Online_Technical_Requirements/)

Blended Courses
A blended course combines online and on-ground delivery. Some proportion of the course content is delivered online and typically uses online discussions and has a reduced number of on-ground sessions.

Hybrid Program
A hybrid program is one that includes a combination of courses delivered fully online and courses delivered on-ground. A substantial portion of the total program content is delivered online and the overall program typically has a reduced number of on-ground sessions.

REQUIRED FEDERAL DISCLOSURE INFORMATION
For information on graduation rates, median debt of graduates completing programs, and other important institutional information, visit http://www.sjvc.edu/consumer-information

COLLEGE CATALOG AND SCHOOL PERFORMANCE FACT SHEET
As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement.

You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement. These documents contain important policies and performance data for the institution.

ABILITY TO BENEFIT
"Ability to benefit" is defined as the demonstrated aptitude to successfully complete the educational program and subsequently be employed. The College has determined that 'ability to benefit' is demonstrated by achievement of high school graduation, achievement of a GED or its equivalent and as such does not accept applicants who lack these credentials.

ADMISSION PROCEDURES AND REQUIREMENTS
The Admissions Department is dedicated to assisting prospective students in selecting programs that best suit their needs and qualifications. In order to ensure that prospective students are a good match for their selected program of interest, SJVC has established the following admission procedures and requirements:

• Applicants must possess a high school diploma or the equivalent.
• Applicants must participate in an interview with an admissions advisor.
• Applicants to on-ground and online programs must participate in an admissions assessment. The assessment instrument(s) and process varies by program. The purpose of the assessment is to evaluate the cognitive ability of prospective students. Each program has a required minimum entry score. The Admissions Department utilizes the results from the assessment(s) to select prospective students who have the best opportunity to achieve success in their chosen program.

Some programs have additional entrance procedures and requirements which may be found in the Admission Requirements statement listed for each program that appears in this catalog.

• Applicants must meet with either the Enrollment Services Director or a campus manager or their designee for an acceptance interview. In addition to this acceptance interview, applicants may be required to meet with the Director of their selected program.
• Applicants must meet with the Financial Services Department to confirm arrangements to meet tuition obligations.
• Upon completion of the above, the applicant will sign an Enrollment Agreement which sets forth specific information such as start and graduation dates, tuition information, academic schedule, etc.
• All new student enrollments must complete New Student Orientation prior to their first class session.

Programs leading to occupations requiring licensure may have licensing requirements that prohibit enrollment of applicants with relevant past criminal convictions.

LANGUAGE PROFICIENCY
Students are required to have proficiency in the English language as documented in the admissions process:
• Conversational proficiency: interview
• Written proficiency: application essay
• Reading comprehension: assessment instrument

All enrollments related documents, including the Enrollment Agreement and the School Performance Fact Sheet, are printed in English. If English is not your primary language, you have the right to retain an interpreter at your own cost to obtain a clear explanation of the terms and conditions of the Enrollment Agreement, including the cancellation and refund policies, and other enrollment related documents, in your primary language.

RIGHT TO CANCEL
New students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session, or the seventh day after enrollment, whichever is later.

Cancellation shall occur when the student gives written notice of cancellation at the address of the College shown on top of the front page of the enrollment agreement. Students can submit this written notice by mail, hand delivery, or email. The written notice of cancellation need not take any particular form and, however expressed, it is effective if it shows that the student no longer wishes to be bound by the enrollment agreement.

If the student cancels the enrollment agreement, the College will not charge institutional charges; however, the College retains the nonrefundable application fee and may charge for equipment not returned in a timely manner in good condition.

INTERNATIONAL STUDENTS (VISA SERVICES)
SJVC is approved to issue F-1 and M-1 Visas to qualified international students. Students holding J or H Visas may also be eligible to attend as an international student. The following items are required from international applicants:
• A TOEFL score of at least 500, paper-based; 61, internet based; or 173, computer based.
• Certified Statement regarding Financial Support.
• Transcripts from high school and/or college attended.
• Verification of good health.
• Purchase of medical insurance to cover the school year.
• Proof of International J or H Visa status, if applicable.

There is no charge for issuing a visa.

TRANSFER OF CREDIT
SJVC is committed to helping students achieve their educational goals. The College recognizes that – prior to enrollment at SJVC, students may have completed course work at other institutions that they may want to transfer in for credit toward an SJVC Associate of Science Degree or Certificate of Completion program or may already possess the general education skills and competencies expected of a two-year college graduate. Therefore, it is the policy of SJVC to provide opportunities for course challenge and to thoroughly evaluate prior coursework to ensure that the nature, content, associated student learning outcomes, and level of credit earned aligns with the equivalent course requirements of the SJVC program in which the student is transferring into. To that end, a maximum of 50% of the total credits required for an SJVC degree or certificate program may be transferred in from another institution; however, in exigent circumstances (e.g. school closure), the College may allow up
to 75% of previously earned credit to be applied toward a student’s program of study.

Provided below are the SJVC protocols and criteria for determining the transferability of previously earned credit and for course challenge.

Credits Earned at Accredited Institutions
SJVC may accept prior credit earned for coursework completed at other institutions accredited by an accrediting body recognized by the United States Department of Education to be applied towards a program. The following terms and conditions apply:

- Credit for prior academic or general studies coursework must be accepted for transfer to SJVC at the time of registration for the applicable academic year.
- Students who intend to transfer in previously earned credit must notify the Registrar’s Office.
- Students must provide official transcripts from the institution where the previous credit was earned. The Registrar’s Office will evaluate the prior credit and make a determination as to whether credit will be awarded.
- Credits transferred in to specifically fulfill SJVC’s requirements must be graded 2.0 (“C”) or higher.
- Some science courses require completion within the past seven (7) years in order to be considered for prior course credit.
- Course credit assessment must be completed prior to the academic year in which the student is scheduled to take the applicable course(s).

A tuition credit of $75.00 per accepted academic unit will be credited to the student account. All transcripts submitted become the property of SJVC and cannot be returned to students or forwarded to other institutions.

Credits Earned By Students Receiving Veterans Affairs (VA) Benefits
All incoming students receiving VA benefits will have any previous college coursework or training (military and non-military) evaluated to determine whether the previously earned credit may be transferred into their program of study at SJVC. All accepted transfer credit will be applied toward the student’s program of study. To receive full credit for previous vocational training, students may be required to successfully complete an overall comprehensive written and/or practical exam in the subject area or areas of transfer.

Official transcripts from all colleges where previous training was received must be submitted to the Registrar for evaluation. Transcripts must be submitted prior to the start of the second term or halfway through the student’s first academic year of study in order for the student to remain eligible for VA benefits. Students are responsible for ensuring the timely submission of their transcripts.

Military transcripts may be ordered from the following website: www.military.com

Credits Earned in Foreign Institutions
SJVC may accept credit earned at foreign institutions, that are approved by the legitimate accreditation or other quality assurance agencies that operate in the country in which the institution is based, to be applied toward a program.

Students who have completed coursework in foreign institutions must have their transcripts evaluated by a foreign evaluation service in order to have that coursework considered for academic credit towards an Associate of Science degree or Certificate of Completion. Upon completion of this process, the evaluation report must be sent directly to the Registrar’s Office. The Registrar will evaluate the report and make a determination on whether credit will be awarded.

Credits Earned by Examinations and Advanced Placement Courses
SJVC accepts credits for specific general education courses from the following testing sources:

- AP (Advanced Placement Program of the College Board)
- CLEP (College Level Examination Program)
- DSST (DANTES Subject Standardized Test)
- EXCELSIOR COLLEGE EXAMINATIONS (formerly Regents or ACT/PEP)

Please contact the Registrar for further information.

Credit Earned through Course Challenge
Students may earn general education course credit in the areas of math, English, and some program pre-requisite courses through successful course challenge. To challenge a course, students are required to take an examination which tests their knowledge of the objectives and learning outcomes covered in the particular course. Students who successfully pass the examination will be granted the appropriate academic credit. Students must complete this process prior to the first scheduled start date of the applicable course. No tuition credit will be given to students who successfully pass the examination. Contact the Academic Dean for further information.

Credit Earned for Experiential Learning
SJVC does not grant credit or allow course challenge for experiential learning or previous experience.

Credit Earned at SJVC under a Certificate Program
Credits earned in certificate programs after July 2004 are eligible for block transfer to degree programs.

CRIMINAL BACKGROUND CHECKS
As part of its responsibility to provide a safe learning environment, SJVC reserves the right to conduct criminal background checks on applicants for admission and current students.

SJVC has several reasons for this requirement. First and foremost, SJVC has an interest in evaluating the character, maturity, and responsibility of its students. Second, SJVC can better academically advise students of difficulties that may arise in the course of the student’s efforts to obtain externship and clinical placements, professional licensure, and/or other job placement. Certain extern and clinical sites and professional licensing boards are required by law and/or policy to exclude people with certain convictions.
This does not necessarily mean that SJVC will deny admission to, or expel a student from the College. SJVC will evaluate each case on its facts. Generally speaking, SJVC will look at the rational relationship between the nature, severity, and recentness of the crime; SJVC's interests and needs; and the responsibility and repentance of the person convicted in determining whether to take action.

SJVC expects each applicant and/or student to provide SJVC with truthful, accurate, and complete information about his/her convictions. This includes a continuing duty to notify SJVC of any arrests or convictions during the time that the student is enrolled at SJVC. Failure to comply with this policy may result in immediate denial of admission or suspension and/or expulsion from SJVC.

ACADEMIC CALENDAR
Classes are offered continuously throughout the year at SJVC. All educational programs have frequent points of enrollment. The majority of SJVC's programs operate on a five week start date cycle. The programs that operate on this cycle allow for student enrollment every five weeks. The five week start dates for the 2016 academic year are published below.

Please note that some of these programs have closed start dates within the calendar years reflected below. A closed start date essentially means that no new students will be allowed to start these programs on those dates. For further information, please contact the Admissions Office.

START DATES
01/04/2016
02/08/2016
03/14/2016
04/18/2016
05/23/2016
06/27/2016
08/08/2016
09/06/2016
10/10/2016
11/14/2016
12/19/2016

The following programs are linear which means that students must complete each term in sequence. Linear programs do not operate on a five week start date cycle. The start dates for each of these programs for the 2016 academic year are:

AVIATION MAINTENANCE TECHNOLOGY
Aviation-Fresno Campus

STUDENT TUITION RECOVERY FUND
It is a State requirement that a student who meets the two requirements noted below pay a State-imposed assessment for the Student Tuition Recovery Fund (STRF), the purpose of which is to reimburse students who might otherwise experience a financial loss as a result of untimely school closure. In that event, a claim may be filed by contacting the STRF unit at (800) 370-7589 [select option 5 when prompted] or by sending an email to STRFClosedSchool@dca.ca.gov.

You may pay the state-imposed assessment for STRF if all of the following applies to you: 1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans, and 2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment if either of the following applies: 1. You are not a California resident, or are not enrolled in a residency program, or 2. Your total charges are paid by a third party payer such as an employer, government program or other payer, and you have no separate agreement to repay the third party.

The State of California created the STRF to relieve or mitigate economic losses suffered by students in education programs who are California residents, or are enrolled in a residency program attending certain schools regulated by the BPPE.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following: 1. The school closed before the course of instruction was completed. 2. The school’s failure to pay refunds or charges on behalf of a student to a third party for license fees or other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school. 3. The school’s failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law to pay or pay or reimburse proceeds received by the school prior to closure in excess of tuition or other costs. 4. There was a material failure to comply with the Act or Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau. 5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

NOTE: Effective January 1, 2015, the Bureau for Private Postsecondary Education (BPPE) changed the STRF assessment rate to $0. Therefore, STRF assessments will not be collected from students who enroll in a program after January 2015.

FINANCIAL SERVICES

FINANCIAL AID ASSISTANCE ................................................................. 25
TYPES OF FINANCIAL AID AVAILABLE .................................................. 25
APPLICATION PROCESS ........................................................................ 25
STUDENT’S RIGHT TO CANCEL .............................................................. 26
REFUNDS ............................................................................................... 26
FINANCIAL AID ASSISTANCE

SJVC participates in federal financial aid programs; students who wish to apply for financial aid assistance must establish financial aid eligibility each year. In order to determine financial aid eligibility, students must complete the application process, meet academic progress standards, and be enrolled at least part-time.

Financial assistance awarded through SJVC may consist of a combination of grants, loans, and scholarships. SJVC participates with federal, state and private agencies in providing various aid programs.

TYPES OF FINANCIAL AID AVAILABLE

GRANTS

Federal Pell Grant Program
The Federal Pell Grant is an important source of aid for students who demonstrate a financial need. It is dependent upon determination of eligibility, enrollment status, cost of attendance, and a payment schedule issued by the U.S. Department of Education. A grant does not have to be repaid.

Federal Supplemental Educational Opportunity Grants
Each year SJVC makes a limited number of awards to students through the Federal Supplemental Education Opportunity Grant program. These funds are targeted to those students who have the lowest calculated family income.

LOAN REPAYMENT

If an applicant obtains a loan to pay for an educational program, the applicant will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If the applicant is eligible for a loan guaranteed by the federal or state government and the applicant defaults on the loan, both of the following may occur:

- The federal or state government or a loan guarantee agency may take action against the applicant, including applying any income tax refund to which the applicant is entitled to reduce the balance owed on the loan.
- The applicant may not be eligible for any other federal student financial aid at another institution or government assistance until the loan is repaid.

Federal Direct Stafford Loans Subsidized
Students requiring additional financial assistance may apply for a federal loan. This loan must be repaid, beginning six months after graduation or termination from the program, whichever occurs first. Students who do not qualify for a Subsidized Federal Direct Stafford Loan may apply for an Unsubsidized Federal Direct Stafford Loan.

Federal Direct Stafford Loans Unsubsidized
Independent students may also borrow from the Unsubsidized Federal Direct Stafford Loan program and begin interest payments while in school; this loan must be repaid. Principal payments begin upon either graduation or termination from SJVC, whichever occurs first.

Federal Direct PLUS
Through the Federal Parent Loan for Undergraduate Students program, parents of dependent students may borrow funds to meet educational expenses. This loan must be repaid, beginning once the loan is fully disbursed (paid out).

Institutional Loan
The College offers a low interest loan program. This loan may be used only to pay tuition charges not covered by financial aid. Students should check with the Financial Aid Office for repayment options and application requirements.

Student Scholarships
The College awards up to $40,000 annually in scholarships to high school seniors who meet certain requirements. High school seniors should inquire within their high school counseling office or career center for information about an SJVC scholarship application or they may contact the nearest SJVC campus.

APPLICATION PROCESS

Financial Aid Officers are available to assist students in obtaining the financial assistance required to meet their educational needs. Students may apply for financial aid by contacting the SJVC Campus Financial Aid Office to discuss the process and timelines to apply for aid and complete the Free Application for Federal Student Aid (FAFSA).

The purpose of the FAFSA is to determine the amount of assistance for which students are eligible. This analysis takes into account factors such as income, assets, the number of family members in a household, and the number of family members who are enrolled in college.

When to Apply
Students should apply for financial aid prior to enrollment at SJVC.

How to Apply
The Financial Aid Office will provide students with the forms required to begin the financial aid application process. Students should have a complete financial aid file to ensure timely receipt of financial aid funds. A complete financial aid file consists of SJVC’s receipt of a student’s FAFSA data from the Department of Education, a completed loan entrance interview (if required), and submission of verification items (if required).

A financial aid application will only be processed if: The student has been admitted to SJVC as a regular student, or is a returning student in good academic standing with SJVC and the student has completed the FAFSA or the Renewal FAFSA.

Students may come in person to their respective Campus Financial Aid Office to complete the FAFSA or renewal. These forms can also be completed online at http://www.fafsa.ed.gov. In order to complete the application, the applicant must include SJVC’s federal school code, 014741.
What Happens Next?
Upon submission of the FAFSA, students will be sent a Student Aid Report (SAR). The SAR should be checked for accuracy and any necessary corrections should be made as soon as possible. Once the SAR has been determined to be complete, a financial aid award letter will be sent to the student which will state the student need (education cost), family contribution, amount of grants awarded, and the amount of loans monies available, if needed. In order to receive unsubsidized or subsidized loan funds, students must complete a Master Promissory Note and return it to the lender.

Funds are then dispersed by the Student Accounts Manager, as described in the Award Letter.

STUDENT’S RIGHT TO CANCEL
Students have the right to cancel the enrollment agreement and obtain a refund of charges paid through attendance at the first class session or the seventh day after enrollment, whichever is later.

Cancellation shall occur when the student gives written notice of cancellation at the address of the College shown on top of the front page of the enrollment agreement. Students can submit this written notice by mail, hand delivery, or email. The written notice of cancellation need not take any particular form and, however expressed, it is effective if it shows that the student no longer wishes to be bound by the enrollment agreement.

If the student cancels the enrollment agreement, the College will not charge institutional charges; however, the College retains the nonrefundable application fee and may charge for equipment not returned in a timely manner in good condition.

Withdrawal from Program
Students have the right to withdraw from a program of instruction at any time. For the purposes of determining the amount the student owes for the time attended, the student shall be deemed to have withdrawn from the program when any of the following occurs:

a. Notify the College of withdrawal or the actual date of withdrawal; or
b. The College terminates the enrollment; or

If the student withdraws from the program after the period allowed for cancellation of the agreement and has completed less than 60 percent of the period of attendance, the College will calculate whether a refund is due, and if so, remit a refund within 45 days following the withdrawal.

Students who intend to withdraw from school should provide official notification to the Dean of Student Services, Registrar, or Campus Director at the campus you attend. Students may provide official notification by letter, phone, e-mail or in person, but are strongly encouraged to provide written notice. The institution will perform the Return to Title IV refund calculation and the institutional refund calculation upon receipt of notification. The withdrawal date used to determine the amount of tuition owed or refund due will be the date of official notice or the last documented date of attendance, whichever is later.

REFUNDS
If a student withdraws from school, two separate calculations will be performed. The first calculation is a required calculation for all Title IV recipients, and is called the Return to Title IV calculation. This step determines the amount of Title IV financial aid that the student is able to retain. In addition to the Return of Title IV requirements for federal financial aid recipients, the College is required by the State to calculate a prorated refund for all students who have completed less than 60 percent of their period of attendance, regardless of whether or not the student received Title IV funds. The federal formula for Return of Title IV funds may result in a larger refund than the state refund policy. In that case, the College and/or the student must return the sum resulting in the larger of the two calculations to the appropriate Title IV program. Therefore, the student may, after Title IV funds are returned, owe a balance to the College.

Return to Title IV Funds calculation (R2T4)
Federal regulations state that the amount of a Title IV refund is based on the percentage of Title IV funds earned by the student at the time of withdrawal. In order to determine whether Title IV funds must be returned, the College must calculate the following:

A. To determine the percentage of the enrollment period completed, the number of days* attended in the enrollment period is divided by the total days* in the enrollment period. (If VN, DA or AMT, the number of hours attended in the enrollment period is divided by the total hours in the enrollment period) *Days = calendar days for purposes of this formula, and therefore include weekends and holidays. Only scheduled breaks of 5 days or more, and approved leave of absences are excluded.

B. The net amount of Title IV funds disbursed, and that could have been disbursed for the payment period is multiplied by the percentage of the payment period completed. The result is the amount of earned Title IV aid.

C. The earned aid is subtracted from the aid that was actually disbursed to, or on behalf of the student.

D. The College will return the lesser of the total earned aid or the unearned institutional charges for the payment period.

E. Unearned aid is allocated back to the Title IV programs in the following order as specified by law:
1. Unsubsidized Stafford Loan Program
2. Subsidized Stafford Loan Program
3. Stafford PLUS Program
If excess funds remain after repaying all outstanding loan amounts, the remaining excess shall be credited in the following order:
4. Federal Pell Grant Program
5. Other assistance awarded under this title for which return of funds is required.
**Note:** After the College has allocated the unearned aid, any amount owed by the student to a grant program is reduced by 50 percent. Unearned loan funds received by the student are paid back as per the terms of the borrower’s promissory note.

If a student obtains a loan to pay for the course of instruction, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed or insured by the state or federal government and the student defaults on the loan:

- The federal or state government or the loan guarantee agency can take action against the student, including applying any income tax refund to which the person is entitled to reduce the balance owed on the loan; and

- The student may not be eligible for any other federal financial assistance for education at a different school or for government housing assistance until the loan is repaid.

**Example:**
A student completed 35 days in an enrollment period of 210 days. Dividing 35 by 210 would result in the decimal fraction .166, converted to 16.6% by multiplying by 100. The student completed 16.6% of the enrollment period.

The student may keep only 16.6% of the Title IV financial aid posted or that could have posted to his/her account. If the College could have received $10,000, only $1,660 may be kept, with the difference returned to the financial aid sources.

If the student is eligible for more funding than was disbursed, the College will provide written notification and instructions for receiving a post-withdrawal disbursement.

**Institutional/California State Refund Calculation**
The Institutional/California state refund policy shall be a pro rata refund of moneys paid for institutional charges for students who have completed 60 percent or less of the period of attendance. The pro rata refund shall be no less than the total amount owed by the student for the portion of the educational program provided, subtracted from the amount paid by the student. The amount owed equals the daily charge for the program (total institutional charge, divided by the number of days or hours in the program), multiplied by the number of days student attended, or was scheduled to attend, prior to withdrawal.

All amounts that the student has paid shall be subject to refund unless the enrollment agreement and the refund policy outlined in the catalog specify amounts paid for an application fee or deposit not more than $250.00, books, supplies, or equipment, and specify whether and under what circumstances those amounts are non-refundable. If any portion of those charges was paid from the proceeds of a nonfederal loan, then the refund will be sent to the lender or to the agency that guaranteed the loan. All other monies shall be returned to the student.

STUDENT CONDUCT STANDARDS
Students are expected to conduct themselves in a professional, ethical and civil manner at all times while on campus or at any time when they are representing the College. SJVC has established specific rules governing student behavior along with applicable disciplinary actions that may be taken against any student found in violation of these rules. The Student Code of Conduct, published in the Student Handbook, sets forth the behavioral standards students are expected to meet along with the College’s discipline policy. By enrolling in SJVC, students agree to abide by the terms of the Student Code of Conduct. Students are responsible for familiarizing themselves with the Student Code of Conduct.

The Student Handbook is available at every SJVC Campus Administrative Office and may be accessed on the InfoZone homepage (https://infozone.sjvc.edu).

ACADEMIC FREEDOM
Academic freedom is the right of faculty and students to express their ideas verbally or in writing, free from political, religious or institutional restrictions, even if these ideas are unpopular. In recognition of this right, SJVC strives to foster and maintain a climate of academic freedom as set forth below.

- Instructors and students have the right to express their ideas in the classroom, verbally and in writing, within the boundaries of good taste and socially established standards. SJVC will promptly conduct an investigation upon learning of an instructor who has allegedly expressed his/her personal opinions without the balance of introducing other sources of instructional integrity or critical thinking practices.

- SJVC extends the definition of academic freedom to include the methods used by instructors to facilitate learning of the approved course curriculum. Instructional methods used to achieve the Course Learning Outcomes (CLOs) and deliver the learning materials may vary by individual instructor to include a wide range of choices, including but not limited to:
  - Lectures
  - Audio visual presentations
  - Class discussion
  - Guest speakers
  - Role Playing
  - Simulations
  - Skill demonstrations
  - Case studies and research

CAMPUS DISTURBANCE
SJVC is dedicated to the maintenance of academic freedom in the classroom and in co-curricular activities. While freedom of expression is encouraged, forms of protest that disrupt the normal activities of the College and interfere with the rights of other students will not be tolerated. SJVC will take strict disciplinary action, as set forth in the Student Code of Conduct, against any student who violates this policy.

COOPERATION WITH COLLEGE STAFF
Students are required to cooperate with College staff at all times. Failure to comply, resisting, or obstructing College staff in the performance of their duties will not be tolerated. Examples of such misconduct include but are not limited to: failure to show proper identification upon request or failure to leave a classroom or office when asked to do so by an instructor, a security officer, or any SJVC staff member. SJVC will take strict disciplinary action, as set forth in the Student Code of Conduct, against any student who violates this policy.

ACADEMIC HONESTY
The entire SJVC community is expected to uphold the highest standards of academic honesty. For students, this requires that they do their own work honestly, without cheating or plagiarizing. Students who engage in honest academic behavior(s) will have the satisfaction of knowing that they received the best education available to them and that they will be thoroughly prepared to enter their chosen career field upon graduation.

Administrators and faculty are required to promote an environment where true learning is embraced, and, ultimately, to support the standards of academic honesty in all aspects of the educational process. This joint effort will result in a sense of mutual respect, trust, and integrity.

SJVC does not and will not tolerate intentional involvement in dishonest academic behavior(s). Students who violate this policy will be subject to formal discipline, which may include the assignment of a failing grade, or in some cases, termination from the College.

If intentional acts of dishonest behavior occur, the College has established clear-cut procedures designed to address these types of situations along with appropriate penalties to censure such activities, both of which are set forth below. This section is limited to those areas of campus life that are directly related to academic conduct and ethics.

Violations
Three basic categories of dishonest behavior are noted below, along with several examples of each.

1. Misrepresentation of academic work:
   - Using another’s statements or thoughts without giving that source proper credit (plagiarism).
   - Submitting for credit one’s own academic work (e.g. research paper, project) that was previously prepared for another course or purpose (self-plagiarism).
   - Using a substantial portion of one’s own previous academic work without significantly improving the previous submission and asking the instructor for permission.
   - Submitting for credit an assignment prepared by another person (or persons).

2. Interference with academic pursuits requiring independent effort:
   - Giving, receiving, or using unauthorized assistance on examinations.
   - Collaboration with others when independent work is required.
• Deliberately defacing or removing course materials, thereby making them unavailable to others.

3. Buying, selling, or bribing
• Offering to buy or sell unauthorized assistance on examinations, papers, or grades.
• Offering or accepting bribes related to academic work.

Investigation
• If any of the above behaviors is suspected, the instructor will speak with the student immediately to state the observation and concern.
• The incident will be investigated and the Dean of Student Services will make a determination as to the seriousness of the charge.
• If an investigation reveals that a student has engaged in dishonest behavior, he/she will receive penalty consistent with the seriousness of the offense, up to and including termination.

ACCESS TO STUDENT EDUCATIONAL RECORDS AND PRIVACY RIGHTS
Student records are permanently maintained in an electronic database.

The Family Educational Rights and Privacy Act (FERPA) of 1974, 20 U.S.C. §1232g, guarantees certain rights and protections to students concerning their school records and the information they provide to the College. The Act protects students from having their educational records or identifying information (i.e., any information that would allow a reasonable person in the school community to identify the student with reasonable certainty) released to outside parties without their written permission. Specifically, the provisions of the Act guarantee students:

1. The right to inspect and review the student’s educational records within 45 days after the day SJVC receives a request for access.

A student should submit to the Campus Registrar, Dean of Students, or other appropriate Official, a written request that identifies the record(s) the student wishes to inspect. The School Official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the School Official to whom the request was submitted, the Official shall advise the student of the correct Official to whom the request should be addressed.

2. The right to request amendment of student’s educational records, that the student believes are inaccurate, misleading, or a violation of the student’s privacy rights under FERPA.

A student who wishes to ask the School to amend a record should write the School Official responsible for the record, clearly identifying the date of the record(s) that they are wanting to have amended and specifying the reasons they believe them to be inaccurate, misleading, or a violation of privacy.

SJVC will notify the student in writing and/or verbally of the decision and, if the decision is negative, of the right to a hearing regarding his/her request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before SJVC discloses Personally Identifiable Information (PII) contained in the student’s education records, except to the extent that FERPA authorizes disclosure without prior consent.

The School discloses educational records without a student’s prior written consent under the FERPA exception for disclosure to School Officials with legitimate educational interests. A School Official is a person employed by the School in an administrative, supervisory, and academic or research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the Board of Governors; or a student serving on an official committee, such as disciplinary or grievance committee. A School Official may include a company with whom the Institution is affiliated; a volunteer or contractor outside of SJVC who performs an institutional service of function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student assisting another school official in performing his or her tasks. A School Official has a “legitimate educational interest” if the official needs to review an education record in order to fulfill a professional responsibility for the School.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the School to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington DC 20202-4605

Directory Information Public Notice: The School designates the following categories of student information as directory information:

- Student’s name
- Student’s address
- Student’s telephone number
- Student’s email address
- Student’s campus email address
- Student’s dates of attendance
- Student’s enrollment status
- Student’s educational programs

In accordance with FERPA, the School may release directory information to third parties without prior consent of students. Directory information may be disclosed by the School at its discretion for any purpose including, but not limited to, requests from law enforcement agencies and degree verification requests from prospective employers. Currently enrolled students may choose to
withhold disclosure of their directory information by obtaining the FERPA Directory Information Opt-Out form from the Campus Registrar, completing the form, and returning it to the Campus Registrar’s Office. The School will honor a student’s request to withhold directory information; however, the School cannot assume responsibility for subsequently contacting the student for permission to release information to prospective employers, relatives, or other persons. The failure on the part of any student to specifically request that his or her directory information be withheld indicates individual approval for disclosure. Additionally, the student’s request to withhold directory information will not affect previous disclosures made by the School prior to receipt of the request.

Personal Identifying Information (PII) and FERPA Disclosures without Consent
FERPA permits the disclosure of PII from students’ education records, without consent of the student, if the disclosure meets certain conditions found in §99.31 of the FERPA regulations. Except for disclosures to school officials, disclosures related to some judicial orders or lawfully issued subpoenas, disclosures of directory information, and disclosures to the student, §99.32 of FERPA regulations requires the institution to record the disclosure. Eligible students have a right to inspect and review the record of disclosures. A postsecondary institution may disclose PII from the education records without obtaining prior written consent of the student:

- To other school officials, including teachers, within SJVC whom the school has determined to have legitimate educational interests. This includes contractors, consultants, volunteers, or other parties to whom the school has outsourced institutional services or functions, provided that the conditions listed in §99.31(a)(l)(l)(B)(J)-(a)(l)(l)(B)(2) are met. (§99.31(a)(l)).

- To officials of another school where the student seeks or intends to enroll, or where the student is already enrolled if the disclosure is for purposes related to the student’s enrollment or transfer, subject to the requirements of §99.34. (§99.31(a)(2))

- To authorized representatives of the U.S. Comptroller General, the U.S. Attorney General, the U.S. Secretary of Education, or State and local educational authorities, such as a State postsecondary authority that is responsible for supervising the university’s State-supported education programs. Disclosures under this provision may be made, subject to the requirements of §99.35, in connection with an audit or evaluation of Federal or State-supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs. These entities may make further disclosures of PII to outside entities that are designated by them as their authorized representatives to conduct any audit, evaluation, or enforcement or compliance activity on their behalf. (§§99.31(a)(3) and 99.35).

- In connection with financial aid for which the student has applied or which the student has received, if the information is necessary to determine eligibility for the aid, determine the amount of the aid, determine the conditions of the aid, or enforce the terms and conditions of the aid. (§99.31(a)(4)).

- To organizations conducting studies for, or on behalf of, the school, in order to: (a) develop, validate, or administer predictive tests; (b) administer student aid programs; or (c) improve instruction. (§99.31(a)(6)).

- To accrediting organizations to carry out their accrediting functions. (§99.31(a)(7)).

- To parents of an eligible student if the student is a dependent for IRS tax purposes. (§99.31(a)(8)).

- To comply with a judicial order or lawfully issued subpoena. (§99.31(a)(9)).

- To appropriate officials in connection with a health or safety emergency, subject to §99.36. (§99.31(a)(10)).

- Information the school has designated as “directory information under §99.37. (§99.31(a)(l)).

- To a victim of an alleged perpetrator of a crime of violence or a non-forcible sex offense, subject to the requirements of §99.39. The disclosure may only include the final results of the disciplinary proceeding with respect to that alleged crime or offense, regardless of the finding. (§99.31(a)(13)).

- To the general public, the final results of a disciplinary proceeding, subject to the requirements of §99.39, if the school determines the student is an alleged perpetrator of a crime of violence or non-forcible sex offense and the student has committed a violation of the school’s rules or policies with respect to the allegation made against him or her. (§99.31(a)(14)).

To parents of a student regarding the student’s violation of any Federal, State, or local law, or of any rule or policy of the school, governing the use or possession of alcohol or a controlled substance if the school determines the student committed a disciplinary violation and the student is under the age of 21. (§99.31(a)(15)).

If you have any questions about your FERPA rights, please see your Campus Registrar or Dean of Students.

Social Security Confidentiality Act
The Social Security Number Confidentiality Act (42 U.S.C. §405(c)(2)(C)(viii)(I)), protects students from identify theft by prohibiting the College from disclosing social security account numbers or related records. Any publicly displayed document will exclude students’ social security numbers.

Additional information regarding the maintenance of student records can be obtained from the Registrar’s Office.
CHANGE OF STUDENT INFORMATION

Students should immediately report any change in their personal information (such as name, address, telephone number, etc.) to the Registrar's Office. SJVC will not be held responsible for any mail sent to the wrong address due to an incorrect address on file with the College.

Students' names on official SJVC records and transcripts must reflect their names as they appear on official documents, such as driver's licenses, social security cards, passports, etc. In order for a student to change his/her name on SJVC records, a marriage certificate, divorce decree, or court document must be presented to substantiate the change.

NOTICE OF NON-DISCRIMINATION

SJVC complies with all pertinent titles and sections of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, the Rehabilitation Act of 1973 and all other applicable federal, state and local laws. SJVC does not discriminate on the basis of any characteristic protected by federal, state, or local law, ordinance, or regulation. Any discriminatory action should be reported to the Campus Director. If the Campus Director does not appropriately address a student’s concern, or if a student is not comfortable in making the report at this level, notification should be sent to:

Wendy Mendes, Vice President of Administration
San Joaquin Valley College
3828 West Caldwell Avenue
Visalia, CA 93277
(559) 734-9000
WendyM@sjvc.edu

The Vice President of Administration serves as SJVC's Title IX Coordinator. Any questions concerning this policy and/or the procedures to report discriminatory actions should be directed to Campus Administration.

HARASSMENT

SJVC is committed to providing an environment that is healthy, safe, and free from all forms of discrimination and unlawful harassment, in compliance with the provisions of the Civil Rights Act of 1991, the Fair Employment and Housing Act, Title IX of the Education Amendments of 1972, and other human rights and equal opportunity laws. SJVC policy strictly prohibits the harassment of any student, staff or faculty member, or visitor to the College. Harassment is any unwelcome or unwanted conduct that denigrates or shows hostility or an aversion toward another person on the basis of any characteristic protected by law. Harassment may be verbal, visual or non-verbal, and/or physical. Examples of some of the forms of harassment include, but are not limited to: Content that is racial, sexual, or personal in nature conveyed through graffiti, verbal statements, phone calls, emails, gestures, or other means defined by law. The College absolutely forbids any form of harassment.

Any harassing conduct involving verbal or physical abuse, assault, battery, threats of violence (to include verbal harassment and intimidation) that threatens the safety or well-being of any visitor or member of the College community will not be tolerated. Disciplinary action will be taken promptly against any student or employee, supervisory or otherwise, who has been found to have engaged in harassing behavior. Students will be subject to the full range of disciplinary actions contained in the Student Code of Conduct, which range from suspension up to dismissal from SJVC, including legal prosecution, when appropriate.

The College policy on sexual harassment and misconduct, including definitions and the steps in an investigation, is published in the Student Handbook. Students are responsible for familiarizing themselves with, and abiding by, the policies outlined in that document.

Non-Retaliation

SJVC prohibits retaliation against any individual who in good faith reports an incident of discrimination, harassment, and/or sexual misconduct or the possible witnessing of the warning signs of sexual misconduct. SJVC also prohibits retaliation against any individual who cooperates with an investigation regarding any matter covered by these anti-discrimination, anti-harassment, and anti-sexual misconduct policies.

Public Information

All requests from the media, the campus community at large or the general public, for information concerning an alleged incident of sexual misconduct should be directed to Wendy Mendes, Vice President of Administration at 3828 West Caldwell Avenue, Visalia, CA 93277, (559) 734-9000. Compliance with this policy will promote campus safety and protect the integrity of this policy and the investigation process.

As required by law, SJVC collects and annually reports statistical information concerning sexual misconduct occurring within its jurisdiction. To promote public safety, SJVC also alerts the campus community to incidents and trends of immediate concern.

STUDENT GRIEVANCE POLICY

SJVC has established the General Student Grievance Policy in order to provide for the prompt, effective, and equitable resolution of student grievances not governed by a specific policy or procedure. Under the provisions of the General Student Grievance Policy, students have the right to submit grievances, have their grievances considered by Campus Administration, and be notified of the College’s decision on the grievance. A full description of the General Student Grievance Policy is published in the Student Handbook. Any questions or additional information concerning this policy should be directed to Campus Administration.

COMPLAINTS

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 toll-free or by completing a complaint form, which can be obtained on the Bureau’s internet website http://www.bppe.ca.gov/.
STUDENTS WITH DISABILITIES
In conformity with the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, SJVC shall not discriminate, on the basis of disability, against any student in its academic programs, services, and activities.

Individual students will be given reasonable and necessary accommodation based on specific information and assessment data documented by qualified medical professionals. Students who have special needs related to a permanent or temporary disability may request an accommodation from the Dean of Student Services at any phase of their educational experience at SJVC. The student is responsible for initiating the interactive process.

An accommodation may be requested for an unlimited or a specified period of time. Each request for accommodation will be evaluated on a case-by-case basis. Consideration for an accommodation, however, cannot be retroactive. Once accommodations are agreed upon between the College and the student, faculty and staff will implement the accommodations.

SJVC facilities are essentially barrier free and accessible to the disabled. All buildings are equipped with restroom and telephone services for the disabled and assistance is available for library resources.

For further information on the College’s guidelines concerning disabled students and accommodation policies and procedures, please refer to the Student Disability Accommodation Policy available through Campus Administration or InfoZone: Information CenterSJVC Publications>2013 Student Disability Policy.

ILLEGAL DRUG AND SUBSTANCE ABUSE POLICY
SJVC is committed to providing a work place and campus environment free of illegal drugs and substance abuse. SJVC absolutely forbids the use, distribution, or possession of narcotic or hallucinogenic drugs or substances or inhalation or ingestion of a controlled substance, by any student or employee while on College property or during a school activity. Any individual deemed to be under the influence, while on campus, will be asked to leave immediately.

The College will conduct a fair and thorough investigation into the matter. If the College determines that a student has violated this policy, it will take appropriate disciplinary action against the student, up to and including termination from SJVC. (Please refer to the Student Code of Conduct for a list of the possible disciplinary actions that may be taken against a student who violates this policy.) Violation of this policy may also result in the College referring the matter to the criminal justice system for prosecution. In addition, SJVC reserves the right to require any student who has been found in violation of this policy to submit to periodic drug testing and/or to complete an appropriate educational or rehabilitation program as a condition of continuance with the College.

Students should be aware that many of the hospitals and medical clinics that serve as externship or clinical sites require students to be tested for illegal drugs and substance abuse as a condition of acceptance as an intern into their facility. If substance abuse is detected through screening tests, the facility may not allow the affected student to participate in the externship/clinical rotation.

For information concerning substance abuse prevention, please refer to the Substance Abuse Prevention Program Handbook available through Campus Administration or InfoZone: Information CenterSJVC Publications>2014-15 Substance Abuse Prevention Program Handbook.

ALCOHOL USE ON CAMPUS
SJVC strictly prohibits the consumption or possession of alcoholic beverages on its property. Any individual deemed to be under the influence or in possession of an alcoholic beverage while on campus will be asked to leave immediately. Students who violate this policy may be subject to any of the disciplinary actions contained in the Student Code of Conduct, up to and including termination from SJVC’s academic programs. SJVC reserves the right to require any student who has been found in violation of this policy to complete an appropriate educational or rehabilitation program as a condition of continuance with the College.

For further information, please refer to the Substance Abuse Prevention Program Handbook.

CAMPUS SAFETY
In order to ensure the safety of the entire College community, SJVC has developed and implemented specific procedures to be used in the case of natural disasters, bomb threats, medical emergencies, and/or civil disturbances. A full description of the emergency procedures is published in the Campus Safety Procedures Manual which is available through Campus Administration or on InfoZone: Information CenterSJVC Publications/Campus Safety Procedures.

In addition to the above, the entire College community is required to adhere to the following policies:

VIOLENCE PREVENTION
SJVC is committed to campus safety. As a part of this commitment, SJVC is specifically committed to providing a campus that is free of threats or acts of violence and to protecting its employees and students from such conduct on College premises. In keeping with this commitment and in conjunction with other policies, SJVC has established a strict policy that prohibits employee and/or student behavior that is violent, threatening, or intimidating while conducting College business.

This policy applies to all employees and students. SJVC has zero tolerance for employees or students who make threats, engage in threatening behavior, or commit acts of violence against others. In addition, the College is committed to preventing violent or threatening behavior on its premises by employees, students, visitors, guests, or family members of students and employees.
This policy prohibits not only physically violent behavior but also behavior that is threatening, harassing or intimidating. Prohibited behavior includes, but is not limited to:

- Possession or use of firearms, explosives, weapons such as knives, or any other hazardous or dangerous devices on College property or at any College function, whether on or off campus.
- Disorderly conduct on College property, including fighting, inciting or provoking another to fight, battery, attempted bodily injury or physically abusing an employee, student, or visitor.
- Directly or indirectly using abusive or threatening language, coercing, threatening, or otherwise harassing any employee, student or visitor.
- Actual or direct or indirect threatened physical violence towards another employee, student or visitor. Keeping the campus free of violence can only be accomplished if every employee and student takes personal responsibility for being aware of and reporting potentially violent behavior. Therefore, all employees and students are responsible for immediately reporting to their Campus Director any incident involving threats or acts of violence. Employees or students making such reports will not be retaliated against, nor will the College tolerate any such retaliation.

Employees and students are required to immediately notify campus security if they witness someone on campus with a weapon. In the event that campus security cannot be located, students must immediately report the incident to the nearest campus staff member.

Students or employees found in violation of this policy will be subject to the full range of disciplinary actions set forth in the Student Code of Conduct (applicable to students only) or the Employee Handbook (applicable to employees only).

In addition, students and employees are strongly urged to notify the Campus Director about any restraining order in effect for themselves or any potentially violent situation outside of school or work that could result in violence on the campus.

CAMPUS SECURITY REPORT

A Campus Security Report is published annually for each SJVC campus. Information on the following is included in the report:

- Campus policies on reporting criminal actions and other emergencies
- Security and access to campus facilities
- Crime prevention programs
- Crime statistics

Copies of the report are distributed annually to all SJVC students and employees and may be requested from members of the Campus Administration.

TECHNOLOGY POLICIES

SJVC supports and encourages the use of technology in the educational process. The College recognizes the importance of equipping students with the necessary technological resources to achieve their educational goals and objectives. As such, students have access to various technology resources both on and off-campus.

The technological resources available for student use include personal computers, computer equipment, and a network which allows access to the email system, internet, portal ("InfoZone") and Learning Management System. These resources are to be used for the primary purpose of facilitating and enhancing the educational experience. Any other use is limited and priority is given to individuals using the resources for educational purposes.

This section sets forth the College's policies pertaining to the use of its technological resources. This information is provided to give students an understanding of the various technological resources available to them as well as the College’s expectations of all students who utilize these resources. By using these resources, students agree to comply with all applicable policies and guidelines published herein.

Personal Technology Devices

Students may bring personal technology devices (PTD) on campus. PTD’s include, but are not limited to:

- Laptops
- Netbooks
- iPad/iPods
- Smartphone
- Tablets
- Kindles/Nook/or other similar device

Following are the guidelines for use of PTD’s on campus:

- PTD’s must be silenced during class time and may only be used with the express permission of the instructor.
- All audio/video functions must be disabled unless the student is given permission from the instructor to record all or a portion of the class session.
- PTD’s may not be used to photograph SJVC employees, clinical sites, clinical patients, and clinical employees. Fellow SJVC students may only be photographed with their permission.
- SJVC does not provide any support or technology services for PTD’s.
- SJVC assumes no responsibility for lost, stolen, or damaged PTD’s.
- Students may not use their PTD’s outside the classroom for non-educational purposes while on the SJVC wireless network.
- All terms and conditions of the Computer and Email Use policies apply to students’ use of the SJVC wireless network on their PTD’s. (See Catalog – Technology policies)
• Students are not to share the ID and password for the wireless network with non-SJVC users.

Failure to adhere to these guidelines may result in disciplinary action. Any questions pertaining to appropriate use should be directed to an instructor.

Social Media
SJVC recognizes and supports the use of social media as a means of communication and fostering connectedness among users. To that end, SJVC maintains several social media sites (Facebook, Twitter, Instagram) that are updated regularly with news and information about college events, programs, and student accomplishments. Students are encouraged to fully leverage these resources for information sharing purposes and to establish better communication across campuses.

Due to the capacity and reach of social medial, student posts have the potential to reach a much larger audience than intended. As such, the use of social media requires a greater level of responsibility and accountability. SJVC students represent the College even when they are posting on non-SJVC social media sites. Following are some general guidelines to ensure appropriate use of social media on both SJVC and non-SJVC sponsored sites:

- Use good judgment when posting to social media sites. Once you post something to social media, you can never remove it – all of your posts are archived online; even those that you have deleted. Think about the image you want to project – does it align with your professional goals? Some employers’ use social media as a tool to screen applicants for employment – don’t post something that may jeopardize your future employment opportunities.

- While the College recognizes that externship and clinical training generates anticipation and excitement, students may not post information, pictures, or personal statements of any form regarding their externship or clinical experience, patient conditions, and/or staff encounters (both positive and negative) on social medial sites (Facebook, Twitter, Instagram, Tumblr, Pinterest, Google+). Doing so may violate the Health Insurance Portability and Accountability Act (HIPAA). Potential and actual HIPAA violations put both the College and the student at risk of liability.

The only exception is when the College solicits student comments and/or photos (“selfies”) for the SJVC blog. In these situations, an SJVC employee will provide explicit information and guidelines for submissions.

- Students are highly discouraged from posting unprofessional or negative comments or on SJVC and/or their personal social media accounts. As mentioned above, this type of behavior is viewed as unprofessional and may tarnish the student’s reputation, and, ultimately, jeopardize future employment prospects. Students should use the established SJVC protocols for addressing complaints. (See SJVC Student Handbook, "Student Complaints & Grievances")

- Students may not use social media during class or clinical time – no exceptions!

Students who have questions or concerns about how these guidelines might apply to them or a specific situation, should discuss the matter with their instructor. Willful disregard of these guidelines may result in the full range of disciplinary action as set forth in the SJVC Student Code of Conduct (See Student Handbook).

Recording
Students may not record any portion of a scheduled educational activity (e.g. class, lab, clinical/externship, or field trip) without the express permission of the instructor.

Computer Use
SJVC’s computers, software, and any files stored on the computer or network are College property. All hardware and software are to be used primarily for educational purposes. Although students have passwords that restrict access to their computer accounts, SJVC may access personal e-mail accounts and any files stored or deleted from the computer system, at any time.

All software that resides on any of SJVC’s computers must be licensed. SJVC prohibits the installation or removal of any software, unless directly related to a specific assignment approved and under the direction of an instructor. Users are also forbidden from altering or copying licensed software.

SJVC will not tolerate destruction or vandalism of any of its computer equipment. It also forbids the deliberate waste of computer resources. Disciplinary penalties, as outlined in the Student Code of Conduct, may be imposed upon any student who has been found in violation of this policy.

When leaving a computer terminal, students must either log off or shut the computer down in order to preserve and maintain the security of the network.

SJVC provides students with access to the internet for the purpose of enriching their educational experience. Although it is the College’s intent that the internet will be used for achievement of educational goals and course objectives, every student should be aware that some material accessible via the internet could contain items that are illegal, defamatory, inaccurate, or potentially offensive. Each individual user is strongly cautioned to exercise prudent judgment in what materials are viewed, stored, or routed to others.

Students are solely responsible for using this resource in an educationally effective, efficient, ethical, non-discriminatory, and lawful manner. The following list, while not exhaustive, describes the acceptable and unacceptable usage of the internet through the SJVC network.

Acceptable Use
• Using the internet to conduct research related to the course(s) in which a student is enrolled.
• Using a current and valid SJVC user account.
• Using the internet to engage in electronic communication with SJVC instructors, administration, staff, or fellow students through email and discussion boards.
Any purpose that supports the educational mission of SJVC and is in keeping with the laws of the State and Federal government.

Prohibited Use
- Using the internet for commercial purposes and/or private enterprises that are not College related.
- Creating, displaying, or transmitting threatening, racist, sexist, discriminatory, pornographic, obscene or harassing language and/or material.
- Using the College’s computer network to engage in illegal downloading and/or unauthorized distribution of copyrighted material, including peer-to-peer file sharing.
- Misrepresenting oneself as another user.
- Providing, assisting in, or attempting to modify or gain access to files, passwords, and data belonging to other users.
- Attempting to access restricted areas of the computer network belonging to SJVC.
- Attempting to undermine or compromise the security of the College’s computer network or any other computer network or workstation.
- Destruction of or damage to the equipment, software, or data belonging to the College or other users.
- Activities that interfere with the ability of others to use resources effectively.
- Activities that result in the loss of another user’s work or unauthorized access to another user’s work.
- Disclosure of user identification and/or password to another individual; using another individual’s computer account for any purpose.
- Any other activity conducted through the College’s computer network, including personal e-mail accounts, or use of the internet deemed by the College to be in violation of the Student Code of Conduct, College rules, and State or Federal laws.

Any misuse of the internet through the SJVC network constitutes a breach of the Student Code of Conduct. SJVC is the sole judge of what constitutes a breach. If the College determines that a student has engaged in unacceptable use of its technological resources, the student may be subject to the full range of disciplinary actions set forth in the Student Code of Conduct.

Copyright Infringement
Students, faculty and staff are prohibited from using the SJVC computer network to illegally download or share music, videos, or other copyrighted materials. SJVC supports the Higher Education Opportunity Act (HEOA) and Digital Millennium Copyright Act, including efforts to eliminate the illegal distribution of copyrighted material. Under the law, the College may be obligated to provide copyright holders and law enforcement officials information about SJVC network users who have violated the law.

SJVC network users should be aware that illegal forms of downloading and file sharing as well as the unauthorized distribution of copyrighted materials are violations of the College’s Technology Policies and may subject student offenders to the full range of disciplinary actions set forth in the Student Code of Conduct. In addition to violating college policy, offenders may also be subject to various penalties under civil and criminal copyright law, including monetary damages and prison time.

Network users are responsible to ensure that any file that they are downloading is not a copyrighted work, unless they have prior, written permission from the copyright holder.

To protect their intellectual property, companies have licensed hundreds of digital partners who offer a range of legal downloading options, including download and subscription services, legitimate peer-to-peer services, video-on-demand, podcasts and CD kiosks. For a list of sources that offer legal downloading sites, visit the RIAA website at www.riaa.com. Questions pertaining to copyright issues should be directed to an instructor.

Email Use
SJVC provides an email account for every student with a current network account and valid password. Students may use the email system for the primary purpose of communicating with their instructors, College administration and staff, and fellow students concerning their coursework or College related business. The College reserves the right, if circumstances warrant, to access, inspect and disclose the contents of messages created, sent, or received using the email system.

It is the responsibility of all email account holders to manage the use, message content, and size of their email accounts. Reading e-mail daily, removing old messages, and deleting messages and attachments of unknown origin are among the most common practices that help ensure an efficient email system.

Unacceptable use of the email system puts both the user and the College at risk. Unacceptable use of the email system includes, but is not limited to:
- Unauthorized attempts to access another’s email account.
- Sharing email account passwords.
- Violation of Federal, State or local laws or statutes pertaining to electronic communications.
- Sending harassing, threatening, abusive, or obscene messages.

Broadcasting excessively large amounts of data (chain letters, graphic presentations, etc.) in such a way as to cause network congestion and failure.

Any misuse of the College’s email system may result in the imposition of disciplinary actions as outlined in the Student Code of Conduct.

Monitoring
In addition to College staff supervision during computer lab sessions, the classroom, the Student Center, or in the LLRC. SJVC reserves the right to audit or randomly audit student computer user accounts. Upon discovery of a possible violation of the policies stated herein, a student’s computer privileges may be suspended immediately. Such suspected violations will be reported to the appropriate member(s) of the Campus Administration.

Violations of these policies will be addressed in a manner consistent with violations of other College policies or State and/or Federal law.
and may result in the College taking disciplinary action against the student as well as possible legal action. In such review, the full range of disciplinary sanctions is available including the loss of computer privileges, termination from SJVC, and legal action.

**Reporting Suspected Violations**

Any suspected violations of the Computer, Internet, or Email Use Policies should be immediately reported to Campus Administration. Questions concerning this section should be directed to the Campus Administration.

**STANDARDS FOR PROFESSIONAL DRESS**

SJVC believes that it is important for each student to appear well groomed and professionally dressed while on campus or situations in which students are representing the College. As such, SJVC has established standards for professional dress to which all students are expected to adhere. The standards include the requirement that students dress for class, including externships and clinical rotations, in the professional work-related SJVC uniform designated for their particular program of study.

Students are not permitted to wear their uniforms at events or functions that are not sponsored by the College. Any exception to the professional dress standards needed to comply with religious requirements must be discussed with the Dean of Student Services. For information on additional dress and grooming standards, please refer to the Student Handbook.

In addition to this policy, many SJVC programs have specific professional dress code requirements that students are expected to comply with. For information concerning specific programmatic dress codes, please see the respective Program Director or Division Manager.

**STUDENT RIGHTS**

Student rights are protected by State and Federal laws, and by the policies, procedures, and regulations established by SJVC. Specifically, we recognize these student rights:

- Freedom of access to higher education
- Freedom of classroom expression Confidentiality of educational records
- Participation in student affairs
- Procedural standards in disciplinary actions as outlined in the Student Code of Conduct and the Academic Honesty Policy

**ADDITIONAL POLICIES & PROCEDURES**

The following publications contain additional information on student policies and procedures.

- **Student Handbook**
- Statement of Student Rights
- Student Code of Conduct
- Sexual Misconduct/Harassment
- Student Complaints & Grievances
- Academic Honesty
- Dress Code & Grooming Requirements
- Student Computer and Network Use
- Eating and Drinking
- Cell Phone Usage
- Attendance
- Academic Policies
- Change of Student Information

- **Student Disability Accommodation Policy**
- Discrimination Prohibited
- Admissions, Enrollments, and Recruitment
- Academic Adjustments
- Procedures for Determining Disability and Accommodations
- Grievance Procedures Concerning Disputes and Accommodations

- **Substance Abuse Prevention Program Handbook**
- Substance Abuse
- Medical Marijuana
- California Drug and Alcohol Punishment
  - Opiates and Depressants
  - Marijuana
  - Alcoholic Beverages

- Federal Penalties
- Federal Trafficking Penalties Marijuana
- Drugs of Abuse/Uses and Effects
- Federal Penalties
- Federal Trafficking Penalties Marijuana
- Drugs of Abuse/Uses and Effects

- **Campus Safety Procedures Manual**
- Medical Emergencies
- Hazardous Material Spill or Release
- Fire/Emergency Evacuation Protocol
- Fire Alarm
- Bomb Threat
- Civil Disturbance
- Earthquake
- Communicable Disease
- Widespread Emergencies

Students should also consult their program handbook for any additional information, policies and procedures pertaining to their educational experience at SJVC.

STUDENT SERVICES

Every SJVC campus offers a wide range of academic, professional, and personal opportunities designed to support students’ educational programs and learning needs. Student services vary by campus according to the needs of each student population; however, the services discussed in this section are provided at every SJVC campus location.

For a full description of the services available at a particular campus location, students should contact the Dean of Student Services.

STUDENT ADVISING

SJVC is committed to the success of its students, both personally and academically. Students with academic concerns are encouraged to speak with their instructors as soon as possible in order to develop a course of action to assist them in becoming a successful student at SJVC. Students experiencing problems of a personal nature may discuss them with the Dean of Student Services. Members of Campus Administration may also refer students to appropriate community agencies that may be able to assist them with particular needs.

TUTORING SERVICES

SJVC offers a variety of tutoring services to its students, free of charge. The College recognizes the importance of tutoring in helping students achieve their educational goals. Students experiencing academic difficulties are strongly encouraged to take advantage of the tutoring services available to them as soon as possible. Some of the tutoring services provided by the College include one-on-one tutoring with an SJVC instructor or Student Center Coordinator, the development of personal training plans based on assessment examinations, and assistance in the development of study habits and techniques. Please refer to the Student Handbook for a complete description of the tutoring services provided by SJVC as well as the points of contact for those services.

LIBRARY AND LEARNING RESOURCE CENTERS

Every SJVC campus features a Library and Learning Resource Center ("LLRC") which provides students with educational materials and services that support the SJVC curriculum, aid in independent study, and enrich the College experience. Some of the materials and services available through the LLRCs include access to computers with full Internet and word processing capabilities, photocopying, printing, reference materials, book and periodical collections, specific online educational databases, and additional in-class learning resources which support the requirements of programs offered by the College. The LLRCs are staffed with trained and knowledgeable individuals who are available to provide assistance with research, information literacy, learning resources, using the educational online databases, APA format, and checking materials out of the LLRC.

For information on specific materials and services, hours of operation, library loan policies, checkout and return of resources, and overdue or lost materials, students should visit their campus LLRC or refer to the Student Handbook.

STUDENT CENTERS

In addition to providing tutoring, Student Centers assist students in general education courses, primarily preparation for success in math and English courses. Student Centers are based in computer labs or in the Learning Resource Center, are staffed by qualified personnel, and are available Monday through Friday.

MYLABS PLUS

Additional resources available for students are the free online tutoring programs, MyLabs Plus (www.sjvc.mylabsplus.com). (MyLabs may also be accessed through InfoZone by clicking on the Links tab.)

COMPUTER LABS

Computers are located in designated classrooms (referred to as "computer labs") and other professional rooms, as determined by the Campus Director. The main locations for students to access computers outside of the classroom are in the Student Center, and the Library and Learning Resources Center (LLRC). The hours of operation for the Student Center, and the LLRC’s are posted at each campus location.

In addition, some classrooms provide wireless connection to the College’s network. Please see an instructor for more information.

INFOZONE

The College’s portal website, known as InfoZone, provides access to essential student information. InfoZone may be accessed at https://infozone.sjvc.edu

InfoZone makes it possible for students to view their campus calendar, SJVC publications and handbooks, access discussion boards and current college news, and download their unofficial transcripts.

InfoZone also gives students access to their course schedules, current courses and assignments, learning resources, grades, attendance, account statements, financial aid information, and more.

In addition, InfoZone provides easy access to various educational resources on the Internet including libraries, web sites, databases, museums and repositories of research.

HELP DESK

SJVC’s Help Desk personnel are available to provide students with technical support assistance. Hours of available are published in the SJVC Student Handbook.

CAREER SERVICES

The Career Services Department offers a wide variety of career planning and employment-related services to current SJVC students and alumni. While SJVC does not guarantee employment, income, or wage rate, Career Services staff is available to assist students in developing job-readiness skills and to pursue employment in their chosen career fields. Some of the services offered include:
Resume development
Job search assistance
Interview techniques
Career development courses
Career information panels
Employment related workshops and programs

HOUSING
SJVC does not have dormitory facilities under its control and does not assist a student in finding housing. The cost of housing located reasonably close to each campus varies widely depending on location and whether the space is shared or occupied alone, and whether the student is securing only a room or an entire structure.

Although the College has no responsibility to find or assist a student in finding housing, limited assistance can be provided by the Dean of Student Services.

ADDITIONAL INFORMATION AND STUDENT SERVICES
Additional information related to the provision of student services and campus life in general may be found in the Student Handbook.
SECTION 6

ACADEMIC POLICIES AND REGULATIONS

REINSTATEMENT ....................................................................................45
RE-ENROLLMENT POLICY .......................................................................45
DEFINITION OF A CREDIT HOUR
A credit hour is the amount of work represented in intended student learning outcomes and the coursework completed, inside and outside of the classroom. One credit hour is equivalent to a minimum of:

- 15 hours of lecture/direct faculty instruction and 30 hours of outside of class student learning; or
- 30 hours of lab/application and 15 hours of outside of class student learning; or
- 45 hours of clinical experience/externship in a course.

TRANSFERABILITY OF CREDIT AND CREDENTIALS EARNED AT OUR INSTITUTION
The transferability of credits you earn at SJVC is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree or certificate you earn in your program is also at the complete discretion of the institution to which you may seek to transfer. If the credits you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat all or some of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending SJVC to determine if your credits will transfer.

ARTICULATION AGREEMENTS
For a current list of the institutions who have agreed to accept credits earned at SJVC, please contact the Registrar or refer to the list of Articulation Agreements on the College’s website: http://www.sjvc.edu/admissions/consumer-information/articulation-agreements

AUDITING COURSES
Generally, SJVC does not allow courses to be audited. However, an SJVC graduate may audit a course within two years of graduation, with Campus Director approval.

ATTENDANCE POLICY
Students are expected to attend all class meetings. Regular class attendance is an integral component in achieving satisfactory grades. When a student has been absent or expects to be absent from class, he/she should call or e-mail the instructor to advise him/her of the reason for the absence.

Students who are absent for fourteen (14) consecutive calendar days (including weekends and holidays) will be terminated from their program of study.

In addition to this policy, certain education programs have additional attendance requirements. For more information concerning specific programmatic attendance requirements, please see the respective Program Director or Division Manager.

Online Courses
For those students enrolled in a course(s) offered through SJVC’s Online Division, attendance is counted through participation in one of the following academic activities: posting and/or replying to a discussion forum, submission of a written assignment, completion of a quiz or exam.

Students who are absent for fourteen (14) consecutive calendar days (including weekends and holidays) will be terminated from their program of study.

STUDENT EXTERNSHIPS
In recognition of the importance of hands-on training, SJVC offers several programs which feature an externship component. In externship, students have the opportunity to apply their newly acquired knowledge and skills in a real-life setting. The externship serves as the final phase of student preparation for entry into their chosen profession.

In order to optimize this learning experience, students must successfully complete all program courses and all other graduation requirements prior to entry into their externship.

INDEPENDENT STUDY
The College is aware that certain situations and/or circumstances may arise during the course of a student’s education when the student would benefit from participation in independent study. To be eligible for independent study, the following three conditions must exist:

- The student must be able to realistically complete the Course Learning Outcomes off-site;
- The student is maintaining satisfactory academic progress; and
- There is no programmatic attendance policy that would preclude participation in independent study.

Students who meet these eligibility requirements may complete a maximum of 9.0 semester credit hours per program through independent study.

To request an independent study, students must submit a written petition to their instructor explaining the need for the independent study and the requested duration. The instructor will develop an independent study plan which will be submitted to the Division Manager or Dean for approval. If the independent study request and corresponding plan are approved, the student, instructor and Division Manager will meet and confirm the details of the Independent Study plan.

LEAVE OF ABSENCE
The College recognizes that certain situations may arise during the course of a student’s education that would require a leave of absence. Students should plan carefully prior to taking a leave of

1 An independent study may be granted for an entire module or portion of a module if the student anticipates less than fourteen (14) consecutive days’ absence.
absence and the following process must be completed prior to the beginning of the requested leave date:

- Immediately submit a written request for a leave of absence to the Dean of Student Services (Campus Dean, if applicable). The request must be signed and dated prior to the requested leave date.
- The Dean will meet with the student to discuss possible alternatives to taking a leave of absence. If it is determined that a leave of absence is in the best interest of the student, he/she, if receiving financial aid, will be required to meet with a Financial Aid Officer to discuss possible financial aid ramifications.
- After these first two steps have been completed, the student will meet with the Dean to discuss issues such as changes to his/her academic schedule, graduation date, etc.

The total combined leave time cannot exceed 180 days in any 12 month period. Exceptions include leaves granted for jury duty, military reasons, or circumstances covered under the Family Medical Leave Act.

Students who do not return as scheduled from a leave of absence will be terminated from the College, effective immediately.

An unapproved leave of absence may be granted by SJVC and treated as a withdrawal for financial aid purposes. A financial aid refund calculation will be made based on the beginning of the leave of absence.

**STUDENT ACHIEVEMENT: GRADES AND CREDITS**

Grades represent the evaluation of a student’s achievement of course requirements, and learning outcomes. Specifically, grades are based upon scores earned on any number of academic assignments which may include quizzes or exams, homework assignments, projects, skill performance, professional development, discussion forums, and mid-course and final exams. All scores earned are converted to the percentage of the total score possible within each course and the final course grade will be determined by the percent range converted to the letter grade shown in the chart below (some programs utilize a different grading system. Please see either the respective Program Director or Division Manager for further information).

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

Grades of “A,” “B,” “C,” and “D*,” are considered passing grades and correspond to the definitions of excellent, good, satisfactory, and passing. Students are required to maintain a 2.0 grade point average in order to remain in satisfactory academic progress (For more information, please refer to the College’s policy on Satisfactory Academic Progress). *Varies by program. Please refer to program descriptions for additional information.

Each final course grade a student earns will be recorded on his/her permanent record at the end of each module or academic term.

**Online Grading**
The instructor will return graded course assignments to the student within three calendar days of the assignment due date. If, due to extenuating circumstances, these conditions cannot be met, the instructor will establish an alternative which will be clearly communicated to the students.

**Mid and Final Course Exam Make-Up Policy**
If a student will be absent on the day of the mid-course or final exam, he/she must make prior arrangements with the course instructor to take the examination within three (3) class days of the scheduled exam. Exams taken late are subject to a ten percent (10%) reduction of the total points earned. With the exception of the Aviation Maintenance Technology and Vocational Nursing programs, quizzes may not be taken if missed when originally scheduled.

**Make-up policy in Online Courses**
Certain assignments and tests may be submitted up to two weeks late, up to the end of the course. Late submissions are subject to a grade penalty. Information on which assignments may be submitted late along with the applied late penalties is included in the course syllabus.

**Grade of Incomplete (I)**
Students may be granted a grade of Incomplete (I) if they are unable to complete course requirements due to:

- Unforeseeable, but fully justified reasons; or
- Medical reasons verified by written documentation from the student’s treating physician

The course instructor will make the determination as to whether a student’s situation meets the criteria for granting an incomplete. Students may be granted an Incomplete only twice in a scheduled academic year.

Students must complete and submit a Petition for Incomplete to the course instructor prior to the end date of the course. Petition forms are available on InfoZone.

If a petition for Incomplete is granted, the instructor will advise the student of the course work to be completed, including assignments, due date, and points possible. Students must complete the remaining course requirements by the end of the next grading period following the course for which the incomplete was granted. If a student does not complete the coursework in the allotted time, the final grade will be based on the total points earned at the time the incomplete was granted. The instructor will update the student’s academic record with the actual grade earned in the course at the end of the next grading period.

For more information or clarification on the policy and procedures related to grades of Incomplete, please see an instructor or the Registrar.
Withdrawal from College (W)
If a student withdraws or is terminated from the College, he/she will be awarded a grade of "W" in all current courses. A grade of "W" will be counted as attempted credits but will not be used in the computation of the cumulative grade point average.

Students are strongly encouraged to notify the Dean of Student Services as soon as they become aware of the need to withdraw from college.

Grade Point Average
The grade point average (GPA) is computed by dividing the total grade points earned by the total units attempted. Courses with a grade of "PASS," "FAIL," "W," "I," and "T" are not included in the calculation of the grade point average.

If a student is required to repeat a course due to substandard academic performance, only the highest grade earned for the course will be used in the computation of the grade point average.

Grade Appeal Policy
If a student is of the opinion that a grade received for a particular course is incorrect, the student has the right to take formal action by utilizing the Grade Appeal Process. Appeals are limited to situations in which a student believes the grade was a mistake in calculation, demonstrable bias, gross negligence or misapplication of stated criteria.

In order to appeal a final grade, students must utilize the Grade Appeal Process published in the Student Handbook.

PROGRAMMATIC GRADE REQUIREMENTS
Students enrolled in certain programs will be required to meet or exceed the educational standards established for progression through the program. Examples of some of the standards include achievement of minimum grades in coursework and the attainment and maintenance of a minimum grade point average, as designated by the particular program.

Course work that earns less than the established minimum grade requirement will not count for units earned, but will count for units attempted, and will be counted in the calculation of the grade point average until the course is retaken. Courses completed with less than the established minimum grade requirement must be retaken for credit in order to advance through the program and to meet graduation requirements. Specific programmatic educational requirements are located in the program listings in this Catalog.

COURSE RETAKES
All failed courses must be repeated until a passing grade is earned for the purpose of assuring that all program and graduation requirements are fulfilled. Students who fail a course will be placed on a waiting list in order to secure an available seat in the course the next time it is offered. Failing any course is likely to delay a student's graduation date and may require a leave of absence and/or financial aid update. Students are strongly encouraged to make every effort to satisfactorily complete all courses as scheduled and to take advantage of the various academic support services available to them.

Previously passed courses may be repeated at the end of the program or upon re-entry to the college in order to meet the following:

- The minimum GPA requirement for graduation.
- Skill attainment for students who have been out of the classroom/field for over a year.

SATISFACTORY ACADEMIC PROGRESS
Students are required to maintain Satisfactory Academic Progress (SAP) while enrolled at SJVC. SAP is a measure of a student's qualitative (grade point average) and the quantitative (completion of attempted credit hours) academic progress. SAP is evaluated on a fifteen week or term basis, which is referred to as the evaluation period.

To achieve SAP, students are required to maintain a minimum cumulative grade point average of 2.0 and must complete their program of study in 150 percent of the normal projected time frame. Therefore, students must satisfactorily complete at least 67% of all attempted credit hours at each evaluation period. It is college policy to round up to the next whole number for the quantitative evaluation. For example, 66.6% completion = 67%.

(refer to chart on next page)
The impact that the following grading symbols will have on a student’s SAP is demonstrated in the following table:

<table>
<thead>
<tr>
<th>GRADE</th>
<th>DEFINITION</th>
<th>GRADE POINTS</th>
<th>COUNT AS UNITS</th>

</tr>
</tbody>
</table>

Students who do not achieve SAP at the initial evaluation will be placed on Financial Aid Warning status. If a student fails to meet SAP at the second evaluation period, he/she will be terminated. If the termination is appealed and granted, the student will be placed on Financial Aid Probation or Financial Aid Probation: Academic Plan, with attendance and student advising milestones (see REINSTATEMENT policy below). Students must meet SAP at the next evaluation or they will be terminated from SJVC. This policy applies to all students regardless of funding sources.

**Financial Aid Warning**
Students who have not met either or both of the minimum requirements for achieving SAP in a given evaluation period will be placed on Financial Aid Warning. Students will remain on Financial Aid Warning status until the end of the next evaluation period. If at that time the student has satisfied the requirements for SAP, the student will be removed from Warning status; however, if the student has not satisfied the requirements for SAP, the student will be terminated.

Students’ financial aid eligibility is not affected by placement on Financial Aid Warning status.

**APPEAL PROCESS FOR TERMINATION DUE TO UNSATISFACTORY ACADEMIC PROGRESS**
Students who have been terminated from SJVC due to unsatisfactory academic progress may appeal their termination based upon mitigating circumstances such as the death of a relative, an injury, serious illness of the student, or other special circumstances. The appeal procedure is published in the Student Handbook.

**REINSTATEMENT**
Students who are reinstated with a grade point average below 2.0 or who have not successfully completed at least 67% of the units attempted will be placed on Financial Aid Probation or Financial Aid Probation: Academic Plan for a defined evaluation period. Campus Administration may impose certain conditions upon a student’s probation, such as requiring students to participate in tutoring and/or student advising meetings. A student’s financial aid eligibility will not be affected by placement on probation.

Students who are unable to meet either of the minimum standards for satisfactory academic progress during or at the end of the probation period will be terminated from SJVC. Appeals will only be considered in situations involving extenuating circumstances.

**RE-ENROLLMENT POLICY**
The College, at the discretion of the Campus Director, may allow former students who have withdrawn or been terminated from SJVC for non-academic reasons to re-enroll into an educational program. Questions concerning this policy should be directed to the Registrar.

INSTRUCTION LANGUAGE
All instruction at the College is conducted in English.

ENGLISH LANGUAGE SERVICES
The College does not provide English language services, including instruction such as ESL.

FACILITIES AND EQUIPMENT
College facilities are structured, designed, and maintained to assure access, safety, security, and meet the needs of SJVC’s academic programs, student support, and operational services in healthful learning and working environments. Classrooms, labs, and libraries are appropriately furnished and stocked with the necessary equipment to support and enhance student learning and to improve institutional effectiveness.

All college facilities are essentially barrier-free and handicap accessible in accordance with the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. The College provides safe and sufficient equipment to support student learning and achievement. Every academic program has a faculty-approved list of equipment and supplies. Instruction is conducted in classrooms, computer labs, and clinical lab settings that best support achievement of student learning outcomes. Instructional materials reflect current industry and professional standards.

LICENSURE
The programs listed below lead to professions requiring licensure in California; additional information is found on each program page.

- Dental Hygiene
- Licensed Vocational Nursing to Registered Nursing (Associate Degree and Certificate)
- Registered Nursing
- Respiratory Therapist
- Vocational Nursing

Aviation Maintenance Technology

This program is offered at Fresno Aviation.

Program Description
SJVC’s Aviation Maintenance Technology program provides students with the skills and technical knowledge to perform aircraft, airframe, and power-plant maintenance and inspections. Hands-on training in the hangar includes servicing, troubleshooting, and repair of power-plant and airframe systems and components.

The program is accredited by the Federal Aviation Administration and approved by the California State Approving Agency to enroll veterans and other eligible persons.

A grade of “C” or higher in all AERO courses is required for graduation.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Demonstrate a solid foundation of general aviation knowledge as required to perform effectively and safely as a capable licensed Airframe and Powerplant mechanic
2. Service, inspect, repair, and troubleshoot airframe structures and related components in accordance with applicable regulations while following safety procedures.
3. Service, inspect, repair, and troubleshoot aircraft engines and related components in accordance with applicable regulations while following safety procedures.
4. Relate and apply concepts of communication, reasoning, critical analysis ethical behavior, and appropriate interpersonal interaction to situations in his or her career and personal life.
5. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below, with a grade of "C" or better in all AERO courses. AERO51 meets the requirement for completion of CSS100, and AERO 31 meets the general education science requirement.

Professional Certifications
Graduates earn an Associate of Science degree and are eligible to take the FAA General, FAA Powerplant, and FAA Airframe examinations. The Aviation Maintenance campus of SJVC is an official FAA test site for all of the required exams. Examination fees are included in the program tuition.

Course descriptions are listed in Section 8.

## Business Administration

This program is offered at Bakersfield, Fresno, Hanford, Hesperia, Lancaster, Modesto, Online, Ontario, Temecula and Visalia.

### Program Description

SJVC’s Business Administration program provides a framework of office procedures and skills that can adapt to any company’s operation. Students develop into knowledgeable, ethical, and technically competent business professionals.

### Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Perform general business functions
2. Demonstrate resource management and accounting skills
3. Demonstrate a working understanding of economics and marketing and how they correlate to current global business trends
4. Demonstrate keyboarding and ten key skills commensurate with industry standards
5. Demonstrate proficiency in Word, Excel, PowerPoint, and accounting software
6. Interact confidently and communicate effectively with businesses and community organizations
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

### Graduation Requirements

Successful completion of the courses listed below, minimum keyboarding speed of 45 net wpm, and successful completion of the Career Services Seminar (CSS100)

### Professional Certifications

Graduates earn an Associate of Science degree and are eligible to take the Microsoft® Office Specialist exam for certification in Word, PowerPoint® and Excel®. The fees for these examinations is paid for by SJVC.

### On-Ground Program

Course descriptions are listed in Section 8.

Clinical and Administrative Medical Assisting

This program is offered at Bakersfield, Fresno, Hanford, Hesperia, Lancaster, Modesto, Ontario, Online, Temecula, and Visalia.

Program Description
SJVC’s Medical Assistant program prepares graduates to work as Medical Assistants in medical offices, and specialty clinics. Training helps students learn the skills required to be a valuable member of the healthcare team.

The program includes an externship which allows students to further their studies in a real-world medical environment. This clinical training enhances student learning and helps graduates develop work experience. Students will be required to complete all health screening and immunization requirements of extern site prior to beginning externship hours. The College will pay for the cost of required screenings and immunizations.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Manage the front office of a health care facility and perform administrative duties such as patient charting, billing, letter writing, and handling coding procedures for insurance purposes using a variety of applicable software
2. Perform clinical skills such as taking vital signs, dosage computations, venipuncture, injections, hematology, administration of medication, specimen collection, and emergency procedures
3. Distinguish the various systems of the human body and explain their function using proper medical terminology
4. Communicate effectively orally and in writing and demonstrate the knowledge and skills required to be eligible and prepared for the Registered Medical Assistant (RMA) exam
5. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career or personal life
6. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below, with a grade of “C” or higher in all clinical courses; successful completion of the Career Services Seminar (CSS100); and meeting minimum requirement of Health Insurance Portability and Accountability Act certification (HIPAA).

Professional Certifications
Graduates earn an Associate of Science degree and are eligible to sit for the Registered Medical Assistant exam offered by the American Medical Technologists; California Certified Medical Assistant exam offered by California Certifying Board of Medical Assistants; National Certified Medical Assistant exam offered by National Center for Competency Testing; and Certificate Clinical Medical Assistant exam offered by the National Health Career Association. Fees for this examination are reimbursed to the student by SJVC for their first attempt. Students also prepare for and take certification exams within their program courses that include HIPAA, CPR and First Aid.

Students residing outside California are encouraged to take a certification examination recognized by their state medical board or an independent certification organization. SJVC will pay for either of these examinations taken within six months of graduation.¹

Computer Systems Administration

This program is offered at Visalia.

Program Description
SJVC’s Computer Support Administration program provides an in-depth study of the operating systems, applications, and network applications of today’s businesses. The focus is on Microsoft®, CompTIA®, and Cisco® certifications.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Obtain cutting-edge, internationally recognized industry certifications
2. Troubleshoot, manage and administrate computer hardware
3. Troubleshoot, manage and administrate computer software
4. Troubleshoot, manage and administrate client and network operating systems
5. Troubleshoot, manage and administrate network infrastructure
6. Troubleshoot, manage and administrate security infrastructure
7. Relate and apply concepts of Ethics, Psychology, Sociology, English, Mathematics, and the Natural Sciences to situations in their careers and personal lives
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; successful completion of the Career Services Seminar (CSS100)

Profession Certifications
Graduates earn an Associate of Science Degree and are eligible to take exams for CompTIA®, Microsoft®, and Cisco® certifications. Fees for these examinations are paid for by SJVC.

Construction Management

This program is offered Online and at Ontario.

Program Description
SJVC’s Construction Management program provides graduates with the technical and managerial skills needed in today’s commercial and residential construction industry. Students are prepared for the management responsibilities they will face on the job, creating an opportunity to move into supervision and construction management.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Manage, sequence, and organize project assets from predevelopment, design and construction through project closeout, in order to complete a project on or ahead of schedule, within or under budget, and without compromising quality or safety expectations and standards, while ensuring successful outcomes both financially and professionally.
2. Utilize project management tools such as project scheduling software, budget estimating, constructability reviews and project management communication protocols in order to appraise project variables and challenges, identify opportunities and resources for solutions, and generate those solutions.
3. Apply verbal and written communication skills for effective supervision and leadership of teams.
4. Evaluate situations that involve potential legal issues and create or coordinate responses.
5. Apply the principles of a diverse world, display a teachable attitude, and maintain a commitment to professional development and learning.
6. Relate and apply concepts of a diverse world, display a teachable attitude, and maintain a commitment to professional development and learning.
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates.

Graduation Requirements
Successful completion of the courses listed below; successful completion of the Career Services Seminar (CSS100).

Professional Certifications
Graduates earn an Associate of Science Degree in Construction Management.

Criminal Justice: Corrections

This program is offered at Bakersfield, Fresno, Hesperia, Lancaster, Modesto, Ontario, and Visalia.

Program Description
SJVC’s Criminal Justice: Corrections program prepares graduates for a career in Corrections. The program includes instruction in criminal law, evidence collection and preservation, report writing, institutional corrections, physical agility training, defensive tactics, powers to arrest, firearms, baton, chemical agents and weaponless defense. Many graduates initially find work in security and develop entry-level work experience while they pursue employment as a correctional officer.

Admissions Requirements
- U.S. Citizenship
- Proof of High School Graduation
- No felony criminal convictions
- No misdemeanor convictions that would prohibit applicant from possessing a firearm
- No legal conditions that would prohibit applicant from possessing a firearm
- Valid California driver license
- Applicant must be in good health and physically fit
- Applicant must be age 18 by program start date
- Approval of Program Director or their designee

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Explain the history, theories and relationship of corrections and the criminal justice system
2. Apply definitions and theories of crime and criminal codes to the criminal justice systems
3. Analyze criminal cases using knowledge of rules of investigation, interrogation, and evidence
4. Examine the concepts of morality, ethics, and law and apply the philosophies within the criminal justice system
5. Write a complete, competent and relevant report
6. Handle inmates appropriately both verbally and physically incorporating Title 15 regulations
7. Use a firearm safely and demonstrate appropriate arrest and search procedures as prescribed by the Bureau of Security and Investigative Services (BSIS).
8. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
9. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; a grade of 70% or higher on all job knowledge tests and successful completion of all skill examinations in CJ60A; successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science degree and the following certifications: Standards and Training for Corrections (STC) Adult Core Academy, which includes 8-hour Baton; and, Bureau of Security and Investigative Services (BSIS) certified training in Powers to Arrest, Weapons of Mass Destruction, Firearms, Baton, Chemical Agents, Public Relations, Observations and Documentation, Communications and its Significance, and, Liability and Legal Aspects – resulting in (BSIS) Security Guard Care and (BSIS) Security Guard Exposed Weapons permits.

Degree Completion

This program is offered Online.

Program Description
SJVC's degree completion program is designed for those certificate program graduates who wish to continue their education and earn an Associate of Science degree. Courses completed in the certificate program are accepted as a block transfer for credit and depending on the unit value of their program, will affect the courses required to earn a degree.

Graduation Requirements
Successful completion of the courses listed below.

Online Program
Course descriptions are listed in Section 8

Course ID  Course Name                                      Credit Units

Dental Hygiene

This program is offered at Ontario, San Diego, and Visalia.

Program Description
SJVC’s Dental Hygiene program prepares students to work as a registered dental hygienist. Benefits of the program include comprehensive instruction, small class sizes, high board pass rates, and accreditation by the American Dental Association Commission on Dental Accreditation.

The Dental Hygiene program houses a fully equipped clinic, allowing students to get hands-on instruction and real-world experience while completing their studies.

Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Identify each patient’s physical and oral health status by collecting patient data through a process of comprehensive patient assessment procedures
2. Analyze assessment findings and use critical thinking in order to address the patient’s dental hygiene treatment needs
3. Establish a dental hygiene care plan that reflects the realistic goals and treatment strategies to facilitate optimal oral health
4. Provide patient-centered treatment and evidence-based care in a manner minimizing risk and optimizing oral health
5. Measure the extent to which goals identified in the dental hygiene care plan are achieved
6. Complete and accurately record all documentation relevant to patient care
7. Adapt to changes in demographics and cultural diversity in dental hygiene practice and health care delivery
8. Interact with the dental community and professional organizations for professional growth and lifelong learning

Admission Requirements

The following prerequisite courses must be completed at a regionally accredited college or university with a minimum of a “C” grade and an overall GPA of 2.75 or higher:

- General/Inorganic Chemistry (with lab)
- General Microbiology (with lab)
- Human Physiology (with lab)
- Speech / Oral Communication
- Introduction to Sociology
- Organic/Biochemistry (with lab)
- Human Anatomy (with lab)
- Writing and Composition
- Intermediate Algebra or higher (not included in the minimum GPA requirements for entry into the program)
- General Psychology

Students meeting all of the program prerequisites and minimum requirements will be selected using points earned from the following criteria: GPA on all prerequisite courses, a reading comprehension exam, allied health or related work experience, and a personal interview.

1 The College will offer BIOL14 and CHE4 courses to students who meet all other program prerequisites, contingent on sufficient number of enrollments.

Graduation Requirements

Except as noted, successful completion of the courses listed below with a grade of “C” or higher in all DH courses; achieve minimum requirement of the HIPAA component.

Professional Certifications

Graduates earn an Associate of Science Degree.
State Licensure
Each state has specific clinical examination requirements for licensure as a dental hygienist. The state of California accepts any one of the following clinical examinations: Western Regional Examining Board (WREB) dental hygiene examination, Central Regional Dental Testing Service (CRDTS) dental hygiene examination, or California RDH clinical examination.
Graduates are eligible to sit for the California RDH clinical examination after they have passed the National Board Dental Hygiene Examination. Graduating seniors may take the WREB or CRDTS examination during their final semester, with certification from the College Dean or dental hygiene program director. SJVC does not pay for any fees associated with securing licensure.

Diagnostic Medical Sonography

This program is offered at Bakersfield.

Program Description
SJVC’s Diagnostic Medical Sonography program prepares students to work in the medical field as entry-level general sonographers. Students will learn to perform ultrasound scanning examinations and record the data for interpretation by a physician. Graduates are prepared to provide effective oral and written communication to the healthcare team as it pertains to diagnostic results. Students receive extensive clinical practice in California hospitals and clinics to gain real-world experience.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results.
2. Perform appropriate ultrasound scanning procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician.
3. Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician.
4. Exercise discretion and judgment in the performance of sonographic and/or other non-invasive diagnostic services.
5. Demonstrate appropriate communication skills with patients and colleagues.
6. Act in a professional and ethical manner.
7. Provide patient education related to medical ultrasound and/or other non-invasive diagnostic ultrasound techniques, and promote principles of good health.
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates.

Admissions Requirement:
- Applicants must be at least 18 years of age.
- A minimum of a “C” grade in the following prerequisite courses completed at a regionally accredited college or university, nine units of which are applied to the general education graduation requirement.
  - Writing and Composition
  - Intermediate Algebra or higher
  - Anatomy and Physiology
  - Medical Terminology

1 The Anatomy and Physiology and Medical Terminology course prerequisites may also be satisfied through the successful passage of the challenge exams developed for these courses. Students who do not pass the challenge exams will be given the option to satisfy these prerequisites. See an Admissions Advisor for more information.

Applicants to the Diagnostic Medical Sonography Program are selected based on points earned in an evaluation process that includes assessment, transcript review, professional reference and personal interview. Enrollment is subject to the Program Director or their designee.

Graduation Requirements
Successful completion of the courses listed below with a grade of “C” or higher in all DMS academic and clinical work, meet the minimum requirement of the HIPAA component, and successful completion of the Career Services Seminar (CSS100). Student must also complete, or transfer for credit at time of enrollment, an additional nine units of general education:
- Philosophy 1C: Ethics
- And two of the following:
  - Economics 1
  - Psychology 1
  - Sociology 1

Professional Certifications
Graduates earn an Associate of Science in Diagnostic Medical Sonography. Graduation from this program does not, by itself, make one eligible for the ARDMS certifying examination. Graduates with previous health studies education with certification in that field are eligible for the ARDMS certifying examination; all others must have 1,680 hours experience as a diagnostic medical sonographer before they are eligible to sit for the ARDMS examination. SJVC will reimburse the cost of the fees for the examination.²

Heating, Ventilation, Air Conditioning, and Refrigeration

This program is offered at Bakersfield, Fresno, Hesperia, Ontario, Temecula, Visalia and Lancaster.

Program Description
SJVC’s Heating, Ventilation, Air Conditioning and Refrigeration program prepares students to work in the heating and cooling industry. Training focuses on theories of heating, refrigeration, and air conditioning. Students study the operation, maintenance, and repair of residential and commercial equipment.

Program Student Learning Outcomes
1. Discuss theories of heating, refrigeration, and air conditioning and relate these concepts to practical applications.
2. Apply proper procedures for the installation, operation, maintenance and repair of both residential and light commercial heating, ventilation, air conditioning and refrigeration equipment and systems.
3. Demonstrate proper usage of the basic tools of the trade.
4. Demonstrate requisite mastery to apply for and obtain the EPA 608 certification from the Environmental Protection Agency.
5. Create effective reports and documents electronically and in writing.
6. Apply advanced electrical concepts and critical thinking skills to interpret and draft schematic wiring diagrams and perform system diagnostics and interpret results.
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.
8. Demonstrate social skills, professional appearance, attitudes, and behavior that employers expect of all SJVC graduates.
9. Adhere to national, state, and local safety practices used by service technicians working on HVAC-R systems.

Admission Requirements
- Valid California driver license
- No DUI convictions for the past 3 years

Graduation Requirements
Successful completion of the courses listed below; successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science degree and have the opportunity to earn EPA 608 certification. SJVC will pay fees associated with this examination.

Human Resource Administration

This program is offered Online and at Visalia.

Program Description
SJVC's Human Resource Administration program offers training in the procedures, policies, and practices found in today's human resource departments. Students develop the professional skills necessary to perform the duties of a human resource administrator.

Hands-on training includes a variety of computer applications, including Microsoft Office, word processing, spreadsheets, databases and presentation software. These computer skills are valuable to human resource specialists, but they are also important skills to have for a variety of positions.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Identify and uphold ethical behavior within an organization
2. Protect all organizational assets, focusing on employee health, safety, and security
3. Identify workplace laws, incorporating the principles of confidentiality and diversity to employee and employer rights
4. Communicate confidently and effectively orally and in writing
5. Perform administrative roles such as record keeping, computer usage, and payroll
6. Develop the role of employee advocate, managing HR activities such as motivation and retention of employees
7. Develop and implement employee training programs
8. Partner with management for organizational decision making in areas such as strategic planning, policy and procedure development, staffing, compensation, and talent management
9. Utilize critical thinking skills to resolve conflict, process grievances, and appraise employee performance
10. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
11. Demonstrate the social skills, professional appearance, attitudes, and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; minimum keyboarding speed of net 35 wpm; and successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science degree and are prepared to take the Microsoft® Office Specialist Exam for certification in Word, PowerPoint® and Excel®. SJVC pays the fees associated with this examination.

Industrial Maintenance Technology

This program is offered at Bakersfield, Hesperia, Lancaster, Modesto, and Ontario.

Program Description
SJVC’s Industrial Maintenance Technology program is designed to provide fundamental, hands-on training of industrial systems and equipment. Students will study and master the basic principles, applications, concepts, and functions of hydraulic systems, bearing and seal types, and power transmission components. Practical instruction is performed with industry-standard equipment and software.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Apply basic concepts of electrical theory related to motor control
2. Operate and maintain machinery and machinery components such as industrial bearings, gear systems, and shaft joining and coupling devices
3. Perform advanced hydraulic testing procedures, maintenance, and hydraulic systems operation
4. Program, install, and perform diagnostic functions on programmable logic controllers (PLCs)
5. Use a computer and associated hardware and software to generate documents, prepare electronic spreadsheets, manage databases, conduct Internet research, and communicate via electronic mail
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements
- Valid California driver license
- No felony convictions
- No misdemeanor convictions for property or drug crimes

Graduation Requirements
Successful completion of the courses listed below; successful completion of the Career Services Seminar (CSS 100)

Information Technology

This program is offered Online.

Program Description
SJVC’s Information Technology (InfoTech) program provides students with the knowledge and skills for a variety of careers in the information technology industry. Students who enroll in the program will take foundational core courses in computer hardware and software and will then go on to complete five additional courses in two of the following concentrations: Networking & Telecommunications, Security, Database Development, and/or Web Development. This program is designed to prepare students for multiple industry-standard certifications offered through CompTIA®, Microsoft®, ISC2®, CWNP, and Adobe. These certifications can greatly enhance students’ job opportunities and future career success.

Program Student Learning Outcomes
Depending upon selected concentrations, upon completion of this program, the graduate will be able to:
1. Apply critical thinking and problem solving skills in InfoTech solutions.
2. Apply current techniques and tools in the development, deployment, and evaluation of InfoTech solutions.
3. Describe and implement network technology.
4. Follow best practices in information security.
5. Design and develop a database using professional principles and standards.
6. Design a secure network infrastructure.
7. Design and develop a website using professional principles and standards.
8. Manage a secure network infrastructure.
9. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.

Graduation Requirements
Successful completion of the courses listed below; completion of the certification exam(s) aligned with the student’s selected concentrations of study and submission of exam results to SJVC; and successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science Degree, and, based upon their selected concentrations, are eligible to take the exams through CompTIA®, Microsoft®, ISC2®, CWNP, and Adobe. First time exam fees are paid by SJVC. Courses in the Network & Telecommunications Concentration prepare students for the CWNP certification exam. However, the exam is not included in the certification exams taken during enrollment in the program. Students who successfully complete this concentration are encouraged to take the CWNP exam after graduation.

Medical Billing and Coding

This program is offered Online

Program Description
SJVC’s Medical Billing and Coding program provides in-depth training for the position in the financial side of healthcare that includes a medical practice, facility billing service or health insurance company. Hands-on experience and classroom instruction include the study of anatomy and physiology, medical terminology, diagnostic and procedural coding, insurance principles and billing, medical office skills, and professional communication.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Perform administrative skills such as scheduling and receiving patients as well as documenting and maintaining patient financial records
2. Operate and manage a computerized medical office that includes EMR/EHR and practice management program
3. Code, develop, submit, and manage insurance claims accurately
4. Manage emergency situations requiring CPR/BLS-HCP and/or first aid
5. Communicate effectively orally and in writing using correct medical and insurance terminology
6. Demonstrate the skills required to be prepared for AAPC certification exams
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; minimum keyboarding speed of 40 wpm with no more than 3 errors in a 5 minute timed writing; achieve minimum standard of the Health Insurance Portability and Accountability Act (HIPAA) component; and the successful completion of the Career Services Seminar (CSS100).

Professional Certifications
Graduates earn an Associate of Science degree and are eligible to take the CPC and CPB certification examinations administered by the AAPC. Graduates earn a typing certificate and also certifications in HIPAA, and first aid.

Course descriptions are listed in Section 8

Medical Office Administration

This program is offered at Bakersfield, Fresno, Hanford, Hesperia, Lancaster, Modesto, Ontario, Temecula, and Visalia.

Program Description
SJVC's Medical Billing Specialist program provides in-depth training for the front office position of a busy medical practice or facility. Hands-on experience and classroom instruction include the study of office management, Electronic Health Records training, patient recordkeeping, bookkeeping, and professional communication.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Perform administrative skills such as scheduling and receiving patients as well as charting and maintaining patient records
2. Operate and manage a computerized medical office that includes bookkeeping and accounting tasks
3. Code, submit, and manage insurance claims accurately
4. Manage emergency situations requiring CPR or first aid
5. Communicate effectively orally and in writing using correct medical terminology and demonstrate the skills required to be prepared for professional certification exams
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; minimum keyboarding speed of net 35 wpm; achieve minimum standard of the Health Insurance Portability and Accountability Act (HIPAA) component; successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science degree and are eligible to take several national certification and credentialing examinations administered by the National Center for Competency Testing (NCCT). Graduates also earn certification in HIPAA, AHA-Adult and Infant CPR, and First Aid.

Pharmacy Technology

This program is offered at Bakersfield, Fresno, Hesperia, Lancaster, Modesto, Ontario, Temecula, and Visalia.

Program Description
SJVC’s Pharmacy Technology program prepares students to work under the direct supervision of a Registered Pharmacist as part of a team responsible for carrying out a doctor’s pharmaceutical orders. Pharmacy Technicians assist in the various activities of compounding, distributing, and dispensing of medications.

Training includes a balance of classroom and lab instruction, as well as an extern component, which allows students experiential learning in an actual clinical environment.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Exhibit accurately the competencies of a Pharmacy Technician including:
   - Legal limitations within the law
   - How and why aseptic techniques are used
   - Legal requirements for prescription forms and labels
   - Correct medical terminology
   - Stability characteristics and storage requirements of commonly prescribed drugs
   - Drug to drug interactions of commonly prescribed drugs
   - Indications of commonly prescribed drugs
   - The trade (brand) and generic names of commonly prescribed drugs
2. Read, interpret, transcribe, troubleshoot, and process prescriptions and medical orders accurately
3. Demonstrate the ethical principles of the pharmacy profession
4. Possess and display professional skills related to dependability, customer service, team work, flexibility & adaptability in working with patients, medical staff, insurance staff, and other pharmacy personnel
5. Characterize a medical professional capable of learning, growing and adapting to varied environments and activities in working with a licensed Pharmacist
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; earn a grade of “C” or higher in all PT courses, and achieve minimum keyboarding speed of 35 net wpm prior to extern placement). Students must also meet the minimum requirement of the Health Insurance Portability Accountability Act (HIPAA) component and successfully complete the Career Services Seminar (CSS100).

Professional Certifications
Graduates earn an Associate of Science degree and HIPAA certification. Upon successful completion of the Pharmacy Technician Certification Practice Exams, graduates are responsible for scheduling an exam date for the Pharmacy Technician Certification Exam (PTCE). SJVC will pay for the criminal background check, application, and registration fees.

State Licensure
Graduates are eligible to apply for licensure with the California State Board of Pharmacy. A criminal background check will be conducted to determine if an act has been committed that constitutes grounds for denial. SJVC will pay for the criminal background check, application, and registration fees.

Registered Nursing

This Associate of Science program is offered at Visalia in two formats: a comprehensive, 85-unit program, and a 71-unit LVN to RN Bridge program. The comprehensive 85-unit program is also offered at Ontario.

Program Description

SJVC’s Registered Nursing program prepares students to work in the medical field as a Registered Nurse.

Students are expected to be in good physical and mental health as determined by provisions of a completed physical examination. Current required immunizations and freedom from TB as required by clinical agencies must be provided prior to the beginning of nursing courses and maintained throughout the program.

A current CPR card for healthcare providers issued by the American Heart Association must be provided at the time of admission to the program and maintained throughout the program.

Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Assist individuals from diverse backgrounds to achieve optimal health utilizing the knowledge gained from biological, social, and nursing sciences
2. Formulate a comprehensive plan of care that minimizes risk and optimizes safety using the nursing process
3. Integrate the role of professional nurse into clinical practice
4. Apply psychological, social, and cultural knowledge to nursing practice
5. Use inter- and intra-professional communication and collaboration skills to deliver evidence-based, patient-centered care
6. Assume the role of advocate to improved health care delivery by communicating and acting according to the expressed needs of the individual
7. Interpret data and apply evidence to support clinical judgment
8. Develop and implement patient education based on identified need and in collaboration with the patient
9. Utilize a variety of resources, including electronic media and medical technology to provide safe, quality care of the patient and family
10. Provide leadership, manage resources, delegate and supervise members of the healthcare team
11. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements (comprehensive program)

A minimum of 34 units in the following courses must be completed at a regionally accredited college or university with a GPA of 2.5 or higher.

- Human Anatomy with lab
- Microbiology with lab
- Human Physiology with lab
- General Chemistry with lab
- Writing & Composition
- Intermediate Algebra or higher
- General Psychology
- Introduction to Sociology or Cultural Anthropology
- Introduction to Public Speaking / Oral Communication

The College will offer BIOL10, BIOL14, BIOL45 and CHE3 courses to students who meet all other program prerequisites, contingent on sufficient number of enrollments.

These courses are offered Online

Admission Requirements (LVN-RN Bridge format)

All pre-requisite courses (34 units) and a current California LVN license (6 units of credit)

Admission Requirements (30-unit Certificate Option)

- BIOL14 Microbiology
- BIOL46 Human Physiology
Graduation Requirements
Successful completion of the courses listed below and three units within GE Breadth Area C2 (literature, philosophy, foreign language). If the student does not have units to transfer, PHIL 1C: Ethics must be taken at SJVC.

State Licensure
Graduates are eligible to apply to the California Board of Registered Nursing (BRN) to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN). This application requires a background check. When applying for licensure in the State of California to the Board of Registered Nursing (BRN), applicants are required to report any disciplinary action against a professional license and/or misdemeanor or felony convictions; certain convictions may result in denial of licensure. Each case is considered individually by the BRN.

SJVC pays fees for the background check and application, and will reimburse graduates for the expense of the NCLEX-RN examination.

1 Payment for retakes and subsequent examinations are the responsibility of the graduate.
Failure to sit for these exams does not constitute a refund or discount in tuition.

30-Unit Certificate Option
In addition to the two Associate of Science degree options, in accordance with the Board of Registered Nursing Policy (Section 1435.5) California Licensed Vocational Nurses may apply for the non-degree program. This program is commonly referred to as the “30-Unit option” and prepares the student to take the NCLEX-RN Examination, but does not award an AS Degree. This option is not supported by the nursing community as a whole. Completion of this option may not meet the criteria to practice in other states. Non-degree applicants will be considered on a space available basis only and if program resources allow. See the Program Director for more information.

(includes 22 Units of nursing courses + 8 units of general education prerequisite courses)

1Fulfills the CSS100 requirement
2Not a degree requirement

Program Standards
There are many demands in the nursing program. Most students find it difficult to carry the load of the nursing program and work more than part time. This must be considered carefully by each individual. Classroom and clinical scheduling cannot be altered due to an individual’s outside employment.

When applying for licensure in the State of California to the Board of Registered Nursing (BRN), applicants are required to report any disciplinary action against a professional license and/or misdemeanor or felony convictions; certain convictions may result in denial of licensure. Each case is considered individually by the BRN.

A background check (criminal record) and drug test may be required by clinical agencies Nursing Program policies and guidelines may be found in the RN Application Packet and the RN Student Handbook. These documents supplement the SJVC catalog.

Program Graduation Requirements:
Students must earn 75% or better in all RN courses, including general education. Students must also meet the minimum requirement of the HIPAA component in order to graduate from the program.
Respiratory Therapy

This program is offered at Bakersfield, Rancho Cordova, Ontario, Temecula and Visalia.

Program Description
SJVC’s Respiratory Therapy program prepares students to be a member of a health care team that evaluates, treats, and manages patients with respiratory illness and other cardiopulmonary disorders. In addition to performing respiratory care procedures, respiratory therapists are involved in clinical decision-making and patient education. Students receive extensive clinical practice in hospitals and clinics to gain real world experience.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Perform clinically as a competent advanced-level Respiratory Therapist
2. Exemplify critical thinking and judgment skills
3. Demonstrate personal and professional behavior consistent with a Respiratory Therapist
4. Earn Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support Provider (PALS), and Neonatal Resuscitation Provider (NRP) certifications
5. Become a Registered Respiratory Therapist
6. Characterize the philosophies of lifelong learning and professional growth by participating in continued education and community outreach
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates
8. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.

Admission Requirements
- Applicant must be in good health and physically fit
- Applicant must be age 18 by his/her expected graduation date

Applicants to the Respiratory Therapy program are selected based on points earned in an evaluation process that includes assessment, professional reference, personal interview and previous academic achievement with emphasis on successful completion of college-level math and science courses. Enrollment is subject to the approval of the RT Program Director or his/her designee.

Graduation Requirements
Successful completion of the courses listed below with a grade of “C” or higher in all RT courses, including co-requisite general education and science course work¹. Students must meet the minimum requirement of the Health Insurance Portability Accountability Act component; pass the skills competencies and program certifications in the term in which they are given and document a minimum of 85% attendance in each academic and clinical course; successful completion of the Career Services Seminar (CSS 100)

¹Students who do not achieve this minimum grading requirement, will not be allowed to advance to the next term while waiting to repeat the course(s).

Professional Certifications
Graduates earn an Associate of Science degree and the following certifications: ACLS: Advanced Cardiac Life Support, PALS: Pediatric Advanced Life Support, NRP: Neonatal Resuscitation Provider, and BLSP: Basic Life Support Provider.

State Licensure
Graduates are eligible to sit for the National Board Respiratory Care (NBRC): Therapist Multiple Choice Exam (TMC). Upon achieving the minimum cut score for registry eligibility on the TMC, graduates will be eligible to take the Clinical Simulation Exam (CSE) leading to the Registered Respiratory Therapist (RRT) Credential. Applications require a background check. SJVC will pay the background check and application fees.² Graduates who pass both exams (TMC and CSE) and are credentialed as an RRT by the NBRC are eligible for licensure as a Respiratory Care Practitioner (RCP) by the California Respiratory Care Board which is a requirement to work in the field.

²Payment for retakes and subsequent examinations are the responsibility of the graduate. Failure to sit for these exams does not constitute a refund or discount in tuition.

Surgical Technology

This program is offered at Bakersfield and Fresno.

Program Description
SJVC’s Surgical Technology program prepares students to facilitate invasive, therapeutic, and diagnostic surgical procedures. Students learn the theory and application of sterile techniques as well as human anatomy. Instruction includes an extensive clinical rotation to give students hands-on experience in a surgical environment.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Complete eligibility requirements for the National Certification Exam for Surgical Technologists
2. Demonstrate knowledge of surgical technology skills by successfully accomplishing controlled learning activities
3. Employ information obtained from biological, social and psychological studies
4. Obtain and use knowledge in providing culturally fitting patient care
5. Apply acquired skills and knowledge within the clinical setting
6. Practice surgical asepsis in diverse clinical backgrounds
7. Function as a surgical team member to deliver excellence in patient care
8. Demonstrate the development and consistent application of a surgical conscience
9. Practice accountability, competence, and character demonstrative of a trained professional
10. Practice ownership of learning and maintain responsibility and self-discipline to appraise and incorporate continued learning
11. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
12. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements
- Applicant must be in good health and physically fit
- Applicant must be age 18 by his/her expected graduation date

Applicants to the Surgical Technology program are selected based on points earned in an evaluation process that includes assessment, transcript review, professional reference and personal interview. Enrollment is subject to the approval of the ST Program Director or his/her designee.

Graduation Requirements
Successful completion of the courses listed below with a grade of “C” or higher in all ST courses; students must meet the minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) and successfully complete the Career Services Seminar (CSS100)

Professional Certification
Graduates of this program earn an Associate of Science degree, CPR, HIPAA, and Blood Borne Pathogens certifications, and are eligible to apply to the National Board of Surgical Technology and Surgical Assisting (NBSTSA) to sit for the Certified Surgical Technologist (CST) examination. Graduates who pass the certification exam are authorized to use the credential Certified Surgical Technologist (CST®). The fees for this examination are paid for by SJVC.

Payement for retakes and subsequent examinations are the responsibility of the graduate. Failure to sit for these exams does not constitute a refund or discount in tuition.

1Payment for retakes and subsequent examinations are the responsibility of the graduate. Failure to sit for these exams does not constitute a refund or discount in tuition.

Veterinary Technology

This program is offered at Fresno.

Program Description
SJVC's Veterinary Technology program prepares students with the skills to help animals when they need it most. This in-depth training covers animal patient care including lab tests, radiology procedures, and surgical assisting. Curriculum also focuses on communication skills involving pet owner education, sick animal counseling, and wellness/preventative measures.

Students receive hands-on training under the direct supervision of a Registered Veterinary Technician or Doctor of Veterinary Medicine. Externship rotations include various animal care environments to give students real-world experience.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Perform the duties pertaining to veterinary clinic reception, bookkeeping, office management, and general computer skills
2. Perform the various duties of a veterinary assistant, such as venipuncture, administering of injections, placing of IV catheters, intubation, and the monitoring of anesthesia in a surgical setting
3. Perform dental prophylaxis, with capability to instruct and demonstrate in-home dental care, providing detailed explanation for future recommendations
4. Apply the concepts of animal husbandry, common diseases, signs, treatment, and prevention of disease to the Veterinary Technician profession
5. Perform and apply laboratory procedures, as well as radiographic film processing regarded as diagnostic contributions in animal health care
6. Demonstrate confidence in the execution of exam room protocols, such as proper pet restraining techniques, the obtaining of vitals, accurate recording of patient history and client communication within the examination process
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below with a grade of “C” or higher in all VRT courses; successful completion of the Career Services Seminar (CSS 100)

Professional Certifications
Graduates earn an Associate of Science degree and are qualified to sit for the California Veterinary Technician Examination (CA RVT) and the Veterinary Technician National Examination (VTNE). SJVC does not pay for any fees associated with securing certification.

Vocational Nursing

This program is offered at Visalia.

Program Description
SJVC’s Licensed Vocational Nursing program trains students to have the skills to offer professional care to the sick, injured, convalescent, and disabled under the direction of physicians and registered nurses. LVNs are an important part of a health care team responsible for administering medical treatment, detecting illnesses, and patient education.

The program includes an externship which allows students to further their studies in a real-world medical environment. This hands-on clinical training enhances the learning experience and allows students to develop a work history while completing their studies.

Passing drug and alcohol testing, criminal history background checks, health screenings and immunizations are all conditions of acceptance for clinical and extern education in a health care setting. Students will be required to complete all screenings and immunization requirements of clinical sites prior to beginning clinical hours. The College will pay for the cost of required screenings and immunizations.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Use nursing knowledge, judgment and skills to establish baseline data for the nursing process
2. Demonstrate competence in diagnostic and therapeutic nursing techniques
3. Use strong, developed self-concept in combination with creative/critical thinking, nursing judgment, knowledge and skills to provide nursing care in all health care settings
4. Embody caring and compassion as evidenced by interpersonal interactions and therapeutic practice
5. Use communication skills and collaboration with clients/families, and other members of the health care delivery team
6. Apply organizational skills to focus the care on the client’s needs while working with interdisciplinary teams of allied health workers
7. Use nursing judgment to provide cost-effective client care
8. Use leadership and professionalism to be a client advocate and bring about any needed changes in the health care delivery system of today
9. Pass the Licensed Vocational Nurse Board Examination for licensure
10. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
11. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements
- Applicant must be in good health and physically fit
- Applicant must be age 18 by his/her expected start date

Applicants to the VN program are selected based on points earned in an evaluation process that includes assessment, transcript review, professional reference and personal interview. Enrollment is subject to the approval of the VN Program Director or his/her designee.

Graduation Requirements
Successful completion of all courses listed below with 74% or better in all VN courses, including general education, and meet the minimum requirement of the Health Insurance Portability and Accountability Act component; successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn an Associate of Science degree and are eligible to sit for the National Council Licensure Examination for Practical Nurses (NCLEX-PN). This application requires a background check. SJVC does not pay for fees associated with securing licensure. However, SJVC will reimburse the cost of the examination for graduates who provide proof they have passed the test.

State Licensure
Graduates who pass the NCLEX-PN are licensed by the Board of Vocational Nursing and are authorized to use the credential Licensed Vocational Nurse (LVN), which is a requirement to work in this field.
Payment for retakes and subsequent examinations are the responsibility of the graduate. Failure to sit for these exams does not constitute a refund or discount in tuition.

GRADUATION REQUIREMENTS FOR THE ASSOCIATE OF SCIENCE DEGREE

An Associate of Science Degree will be awarded to students upon the satisfactory completion of the following requirements:

- A minimum of 60 units of college work,
- Completion of all required core courses,
- Completion of the program's general education requirements,
- Completion of the Career Services Seminar or equivalent,
- "C", 2.0 cumulative grade point average, and
- Fulfillment of any program-specific graduation requirements.²

Proficiency in Basic Skills

All students granted an Associate of Science degree must have demonstrated college-level competence in reading, written expression, and math skills.

Reading and written expression proficiency must be satisfied by one of the following:

- Completion with a grade of "D" or better in the following at SJVC:
  - English 121 & 122
- Completion with a grade of "C" or better in a course equivalent to English 121 & 122 from a regionally accredited College or University.

Math proficiency must be demonstrated by one of the following:

- Completion with a grade of "D" or better in the following at SJVC:
  - Math 121 & 122
- Completion with a grade of "C" or better in a course equivalent to Math 121 & 122 from a regionally accredited College or University.

Please note: Unless otherwise defined by program requirements, a grade of “D” in the above-referenced courses will satisfy proficiency in basic skills and is considered a passing grade. However, a student with a “D” in one or more of these courses must maintain a 2.0 cumulative GPA in order to remain in Satisfactory Academic Progress.

Career Services Seminar

This seminar concentrates on the job search preparation and process. Topics include services provided by the Career Services Department, resume writing, interview techniques, networking skills, portfolio presentation, and workplace success. Passing this seminar or equivalent is a graduation requirement.

² Program-specific graduation requirements are listed in the Program Descriptions.

To keep pace with educational, technological or similar developments, SJVC reserves the right to change the requirements for graduation. Changes may be applied to students already enrolled. For those cases, the College will specify an alternate plan of study, which must be completed in lieu of the original requirements.
GENERAL EDUCATION

General Education courses are offered on all SJVC campuses.

Philosophy

SJVC believes a well-rounded education is essential to a successful career. General Education courses are integrated into the programs and are designed to give students a diverse educational experience. Our General Education curriculum introduces students to the major areas of knowledge and guides them to develop thoughtful perspectives about life, others, and the world around them.

Breadth

To be a well-rounded educated person, it is vital that college graduates experience the variety of major areas of knowledge: communication, mathematics, humanities, natural sciences and social sciences. At SJVC, we have chosen a core curriculum of introductory courses designed to give students a broad experience in each knowledge area, encouraging inquiry and literacy throughout the curriculum.

Depth

The competencies of General Education can be found within each course a student takes at SJVC. In both General Education and vocationally-focused courses students will write, use technology, perform computations, and interact with others in a professional and ethical manner. Through our hands-on activities and real-world applications, Students practice the skills of critical thinking and analysis while anticipating future career situations. Through this cross-curricular approach to General Education skills and competencies, students gain a full education.

Rigor

To ensure application and retention of General Education principles, students are consistently challenged to apply their new knowledge to real-life situations in their careers and personal lives. Authentic activities and assessment help measure their success. Through regular Program Review, using data, experience, and comparison to other accredited institutions as a framework, SJVC strives to ensure our General Education courses meet an appropriate level of rigor for college courses.

General Education Outcomes

PLOs

While General Education is not a program in and of itself at SJVC but rather an integral part of any degree program offered, you will find the tenets of General Education represented within the Program Learning Outcomes (PLOs) of our career-focused programs in the following common Program Outcome:

Upon completion of all programs at SJVC, the graduate will be able to relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.

Each program, through its Assessment Plan, identifies the courses and Course Learning Outcomes that lead students to the achievement of this outcome, whether the course is vocational in nature or one of the General Education courses.

ILOs

General Education courses lead students directly to the success of the Institutional Learning Outcomes (ILOs) of SJVC. Our ILOs state that all graduates should be able to be professional, confident, skilled, educated citizens and communicators, and we find that General Education courses play a vital role in helping our students accomplish these outcomes. The student success on Course Learning Outcomes (CLOs) within the General Education courses provides assessment of our ILOs.

Business Administration Certificate

This program is offered at Delano, Hanford, Hesperia, Lancaster, Madera, Modesto, Online, Ontario and Temecula.

Program Description

SJVC's Business Administration program provides a framework of office procedures and skills that can adapt to any company's operation. Students develop into knowledgeable, ethical, and technically competent business professionals.

Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Perform general business functions
2. Demonstrate resource management and accounting skills
3. Demonstrate a working understanding of economics and marketing and how they correlate to current global business trends
4. Demonstrate keyboarding and ten key skills commensurate with industry standards
5. Demonstrate proficiency in Word, Excel, PowerPoint, and accounting software
6. Interact confidently and communicate effectively with businesses and community organizations
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements

Successful completion of the courses listed below, minimum keyboarding speed of 45 net wpm, and successful completion of the Career Services Seminar (CSS100)

Professional Certifications

Graduates earn a Certificate of Completion and are eligible to take the Microsoft® Office Specialist exam for certification in Word, PowerPoint® and Excel®. The fees for these examinations is paid for by SJVC.

Clinical Medical Assisting Certificate

This program is offered at Bakersfield, Delano, Fresno, Hanford, Hesperia, Lancaster, Madera, Modesto, Online, Ontario, Temecula and Visalia.

Program Description
SJVC’s Medical Assistant program prepares graduates to work as Medical Assistants in medical offices, and specialty clinics. Training helps students learn the skills required to be a valuable member of the healthcare team.

The program includes an externship which allows students to further their studies in a real-world medical environment. This clinical training enhances student learning and helps graduates develop work experience. Students will be required to complete all health screening and immunization requirements of extern site prior to beginning externship hours. The College will pay for the cost of required screenings and immunizations.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Manage the front office of a health care facility and perform administrative duties such as patient charting, billing, letter writing, and handling coding procedures for insurance purposes using a variety of applicable software
2. Perform clinical skills such as taking vital signs, dosage computations, venipuncture, injections, hematology, administration of medication, specimen collection, and emergency procedures
3. Distinguish the various systems of the human body and explain their function using proper medical terminology
4. Communicate effectively orally and in writing and demonstrate the knowledge and skills required to be eligible and prepared for appropriate certification exams
5. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below, with a grade of “C” or higher in all clinical courses; successful completion of the Career Services Seminar (CSS100); and meeting minimum requirement of Health Insurance Portability and Accountability Act certification.

Professional Certifications
Graduates earn a Certificate of Completion and are eligible to sit for the California Certified Medical Assistant (CCMA) exam, offered by the California Certifying Board for Medical Assistants (CCBMA), and National Certified Medical Assistant (NCMA) exam offered by the National Center for Competency Testing (NCCT). Fees for this examination are reimbursed to the student by SJVC for their first attempt.1 SJVC pays the fees for this examination if taken within six months of graduation. Graduates also earn HIPAA certification, CPR and First Aid certification.

1Failure to sit for the exam does not constitute a refund or discount in tuition.

Dental Assisting Certificate

This program is offered at Bakersfield, Fresno, Temecula, and Visalia.

Program Description
SJVC’s Dental Assisting program includes all aspects of working with a dentist, including patient care, office and laboratory duties. Our balance of hands-on experience with classroom instruction covers dental assisting skills and related theory. Whether training for a career in chairside assisting or any combination of other dental office duties, students are well prepared for a career in dental assisting upon completion of the program.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Identify and analyze the laws and regulations of the Dental Board and maintain the standards of a Dental Healthcare Provider
2. Meet eligibility requirements for employment and the California Registered Dental Assistant’s State Board examination by achieving standardized course learning outcomes in the following areas of expertise: CPR, Dental Radiology, Infection Control and Dental Practice Act: Law and Ethics, Coronal Polish, Pit and Fissure Seals
3. Perform all direct patient care duties legally assigned to the unlicensed dental assistant and Registered Dental Assistant
4. Assist during commonly practiced dental procedures, including but not limited to, direct and indirect restorations, fixed prosthodontics, endodontics and orthodontic treatment
5. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
6. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements
• Applicant must be age 18 by their expected start date.

Graduation Requirements
Successful completion of the courses listed below, meeting the minimum requirement of the Infection Control, Radiology, Coronal Polish, Pit and Fissure Seals, CPR and HIPAA components; successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn a Certificate of Completion and additional certifications in Dental Radiation Safety, CPR, Infection Control and Dental Law and Ethics. With the completion of coronal polish and pit and fissure sealants, students are eligible to take the Dental Board of California Examination for state licensure.

State Licensure
Graduates are eligible to apply for and take the Dental Board of California Examination for State Licensure as a Registered Dental Assistant. SJVC does not pay for any fees associated with securing licensure; however, SJVC will reimburse the cost of fingerprinting and the RDA examination to graduates who pass within one year of graduation and provide proof of licensure.

On-Ground Program
Course descriptions are listed in Section 8.

Diagnostic Medical Sonography Certificate

This program is offered at Bakersfield.

Program Description
SJVC’s Diagnostic Medical Sonography program prepares students to work in the medical field as an entry level general sonographer. Students learn to perform ultrasound scanning examinations and record the data for interpretation by a physician. Graduates are prepared to provide effective oral and written communication to the health care team as it pertains to diagnostic results. Students complete extensive clinical practice in California hospitals and clinics to gain real-world experience.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results.
2. Perform appropriate ultrasound scanning procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician.
3. Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician.
4. Exercise discretion and judgment in the performance of sonographic and/or other non-invasive diagnostic services.
5. Demonstrate appropriate communication skills with patients and colleagues.
6. Act in a professional and ethical manner.
7. Provide patient education related to medical ultrasound and/or other non-invasive diagnostic ultrasound techniques, and promote principles of good health.
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates.

Admission Requirement:
Applicants must be at least 18 years of age.

Prerequisites:
A minimum of a “C” grade completed at a regionally accredited college or university in the following courses:
- Writing & Composition
- Intermediate Algebra or Higher
- Anatomy and Physiology
- Medical Terminology

Applicants to the Diagnostic Medical Sonography Program are selected based on points earned in an evaluation process that includes assessment, transcript review, professional reference and personal interview. Enrollment is subject to the Program Director or his/her designee.

Graduation Requirements:
Successful completion of the courses listed below with a grade of “C” or higher in all DMS academic and clinical work, Students must also meet the minimum requirement of the HIPAA component and successfully complete the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn a Certificate of Completion in Diagnostic Medical Sonography. Graduation from this program does not, by itself, make one eligible for the ARDMS certifying examination. Graduates with previous health studies education with certification in that field are eligible for the ARDMS certifying examination; all others must have 1,680 hours experience as a diagnostic medical sonographer before they are eligible to sit for the ARDMS examination. SJVC will reimburse the cost of the fees for the examination.

Heating, Ventilation, Air Conditioning, and Refrigeration Certificate

This program is offered at Bakersfield, Fresno, Hesperia, Ontario, Temecula, Visalia, and Lancaster.

Program Description

SJVC's Heating, Ventilation, Air Conditioning and Refrigeration program prepares students to work in the heating and cooling industry. Training focuses on theories of heating, refrigeration, and air conditioning. Students study the operation, maintenance, and repair of residential and commercial equipment.

Program Student Learning Outcomes

1. Discuss theories of heating, refrigeration, and air conditioning and relate these concepts to practical applications.
2. Apply proper procedures for the installation, operation, maintenance and repair of both residential and light commercial heating, ventilation, air conditioning and refrigeration equipment and systems.
3. Demonstrate proper usage of the basic tools of the trade.
4. Demonstrate requisite mastery to apply for and obtain the EPA 608 certification from the Environmental Protection Agency.
5. Create effective reports and documents electronically and in writing.
6. Apply advanced electrical concepts and critical thinking skills to interpret and draft schematic wiring diagrams and perform system diagnostics and interpret results.
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.
8. Demonstrate social skills, professional appearance, attitudes, and behavior that employers expect of all SJVC graduates.
9. Adhere to national, state, and local safety practices used by service technicians working on HVAC-R systems.

Admission Requirements

- Valid California driver license
- No DUI convictions for the past 3 years

Graduation Requirements

Successful completion of the courses listed below; successful completion of the Career Services Seminar (CSS100)

Professional Certifications

Graduates earn a Certificate of Completion in Heating, Ventilation, Air Conditioning, and Refrigeration and have the opportunity to earn EPA 608 certification. SJVC will pay fees associated with this examination.¹

Human Resource Administration Certificate

This program is offered Online.

Program Description
SJVC's Human Resource Administration program offers training in the procedures, policies, and practices found in today's human resource departments. Students develop the professional skills necessary to perform the duties of a human resource administrator.

Hands-on training includes a variety of computer applications, including Microsoft Office, word processing, spreadsheets, databases and presentation software. These computer skills are valuable to human resource specialists, but they are also important skills to have for a variety of positions.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Identify and uphold ethical behavior within an organization
2. Protect all organizational assets, focusing on employee health, safety, and security
3. Identify workplace laws, incorporating the principles of confidentiality and diversity to employee and employer rights
4. Communicate confidently and effectively orally and in writing
5. Perform administrative roles such as record keeping, computer usage, and payroll
6. Develop the role of employee advocate, managing HR activities such as motivation and retention of employees
7. Develop and implement employee training programs
8. Partner with management for organizational decision making in areas such as strategic planning, policy and procedure development, staffing, compensation, and talent management
9. Utilize critical thinking skills to resolve conflict, process grievances, and appraise employee performance
10. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
11. Demonstrate the social skills, professional appearance, attitudes, and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; minimum keyboarding speed of net 35 wpm; and successful completion of the Career Services Seminar (CSS100)

Professional Certifications
Graduates earn a Certificate of Completion and are prepared to take the Microsoft® Office Specialist Exam for certification in Word, PowerPoint® and Excel®. SJVC pays the fees associated with this examination.¹

Industrial Maintenance Technology

This program is offered at Bakersfield, Fresno, Hesperia, Lancaster, Modesto, Ontario, and Visalia.

Program Description
SJVC’s Industrial Technology (Industrial Maintenance Technology) program is designed to provide fundamental, hands-on training of industrial systems and equipment. Students study and master the basic principle, applications, concepts, and functions of hydraulic systems, bearing and seal types, and power transmission components. Practical instruction is performed with industry standard equipment and software.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Apply basic concepts of electrical theory related to motor control
2. Operate and maintain machinery and machinery components such as industrial bearings, gear systems, and shaft joining and coupling devices
3. Perform advanced hydraulic testing procedures, maintenance, and hydraulic systems operation
4. Program, install, and perform diagnostic functions on programmable logic controllers (PLCs)
5. Use a computer and associated hardware and software to generate documents, prepare electronic spreadsheets, manage databases, conduct Internet research, and communicate via electronic mail
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Admission Requirements
- Valid California driver license
- No felony convictions
- No misdemeanor convictions for property or drug crimes

Graduation Requirements

Information Technology Certificate

This program is offered Online

Program Description

SJVC's Information Technology (InfoTech) program provides students with the knowledge and skills for a variety of careers in the information technology industry. Students who enroll in the program will take foundational core courses in computer hardware and software and will then go on to complete five additional courses in one of the following concentrations: Networking & Telecommunications, Security, Database Development, and/or Web Development. This program is designed to prepare students for multiple industry-standard certifications offered through CompTIA®, Microsoft®, ISC2®, CWNP, and Adobe. These certifications can greatly enhance students' job opportunities and future career success.

Program Student Learning Outcomes

Depending upon selected concentration, upon completion of this program, the graduate will be able to:

1. Apply critical thinking and problem solving skills in InfoTech solutions.
2. Apply current techniques and tools in the development, deployment, and evaluation of InfoTech solutions.
3. Describe and implement network technology.
4. Follow best practices in information security.
5. Design and develop a database using professional principles and standards.
6. Design a secure network infrastructure.
7. Design and develop a website using professional principles and standards.
8. Manage a secure network infrastructure.
9. Relate and apply concepts of communication, reasoning, critical, analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life.

Graduation Requirements

Successful completion of the courses listed below; completion of the certification exam(s) aligned with the student’s selected concentration of study and submission of exam results to SJVC; and successful completion of the Career Services Seminar (CSS100)

Professional Certifications

Graduates earn a Certificate of Completion, and, based upon their selected concentrations, are eligible to take the exams through CompTIA®, Microsoft®, ISC2®, CWNP, and Adobe. First time exam fees are paid by SJVC. Courses in the Network & Telecommunications Concentration prepare students for the CWNP certification exam. However, the exam is not one of the exams taken during enrollment in the program. Students who successfully complete this concentration are encouraged to take the CWNP after graduation.

Medical Billing and Coding Certificate

This program is offered Online.

Program Description
SJVC’s Medical Billing and Coding program provides in-depth training for the position in the financial side of healthcare that includes a medical practice, facility billing service or health insurance company. Hands-on experience and classroom instruction include the study of anatomy and physiology, medical terminology, diagnostic and procedural coding, insurance principles and billing, medical office skills, and professional communication.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Perform administrative skills such as scheduling and receiving patients as well as documenting and maintaining patient financial records
2. Operate and manage a computerized medical office that includes EMR/EHR and practice management program
3. Code, develop, submit, and manage insurance claims accurately
4. Manage emergency situations requiring CPR/BLS-HCP and/or first aid
5. Communicate effectively orally and in writing using correct medical and insurance terminology
6. Demonstrate the skills required to be prepared for AAPP certification exams
7. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
8. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below; minimum keyboarding speed of 40 wpm with no more than 3 errors in a 5 minute timed writing; achieve minimum standard of the Health Insurance Portability and Accountability Act (HIPAA) component; and the successful completion of the Career Services Seminar (CSS100).

Professional Certifications
Graduates earn a Certificate of Completion and are eligible to take the CPC certification examination administered by the AAPP. Graduates earn a typing certificate and also certifications in HIPAA, , and first aid.

Course descriptions are listed in Section 8.

# Medical Office Administration Certificate

This program is offered at Delano, Hanford, Hesperia, Lancaster, Madera, Modesto, Ontario, and Temecula.

## Program Description

SJVC’s Medical Office Administration program provides in-depth training for the front office position of a busy medical practice or facility. Hands-on experience and classroom instruction include the study of office management, patient recordkeeping, bookkeeping and accounting, and professional communication.

## Program Student Learning Outcomes

Upon completion of this program, the graduate will be able to:

1. Perform administrative skills such as scheduling and receiving patients as well as charting and maintaining patient records
2. Operate and manage a computerized medical office that includes bookkeeping and accounting tasks
3. Code, submit, and manage insurance claims accurately
4. Manage emergency situations requiring CPR or first aid
5. Communicate effectively orally and in writing using correct medical terminology and demonstrate the skills required to be prepared for professional certification exams
6. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

## Graduation Requirements

Successful completion of the courses listed below, minimum keyboarding speed requirements of 35 net wpm, and achieve the minimum requirement of the HIPAA component; successful completion of the Career Services Seminar (CSS100).

## Professional Certifications

Online graduates earn a Certificate of Completion and are eligible to sit for the National Certified Medical Office Assistant (NCMOA) exam or the National Certified Insurance & Coding Specialist (NCICS) exam offered by the National Center for Competency Testing (NCCT). SJVC pays the fees for one of these examinations if taken within six months of graduation. Graduates also earn HIPAA certification, CPR and First Aid certification.

## On-Ground Program

Course descriptions are listed in Section 8.

Pharmacy Technology Certificate

This program is offered at Hesperia, Lancaster, Ontario, and Temecula.

Program Description
SJVC’s Pharmacy Technology program prepares students to work under the direct supervision of a Registered Pharmacist as part of a team responsible for carrying out a doctor’s pharmaceutical orders. Pharmacy Technicians assist in the various activities of compounding, distributing, and dispensing of medications. Training includes a balance of classroom and lab instruction, as well as an externship component, which allows students experiential learning in an actual clinical environment.

Program Student Learning Outcomes
Upon completion of this program, the graduate will be able to:
1. Exhibit accurately the competencies of a Pharmacy Technician including:
   • Legal limitations within the law
   • How and why aseptic techniques are used
   • Legal requirements for prescription forms and labels
   • Correct medical terminology
   • Stability characteristics and storage requirements of commonly prescribed drugs
   • Drug to drug interactions of commonly prescribed drugs
   • Indications of commonly prescribed drugs
   • The trade (brand) and generic names of commonly prescribed drugs
2. Read, interpret, transcribe, troubleshoot, and process prescriptions and medical orders accurately
3. Demonstrate the ethical principles of the pharmacy profession
4. Possess and display professional skills related to dependability, customer service, team work, flexibility & adaptability in working with patients, medical staff, insurance staff, and other pharmacy personnel
5. Characterize a medical professional capable of learning, growing and adapting to varied environments and activities in working with a licensed Pharmacist
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all SJVC graduates

Graduation Requirements
Successful completion of the courses listed below with a grade of “C” or higher in all PT courses; achieve keyboarding speed of 35 net wpm; meet the minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) component; and successful completion of the Career Services Seminar (CSS100)

State Licensure
Graduates are eligible to apply for licensure with the California State Board of Pharmacy. A criminal background check will be conducted to determine is an act has been committed that constitutes grounds for denial. SJVC will pay for the criminal background check, application, and registration fees.

GRADUATION REQUIREMENTS FOR THE CERTIFICATE OF COMPLETION

SJVC will issue Certificates of Completion to those students who satisfactorily complete the requirements and are able to demonstrate proficiency and competency in a prescribed vocational training program. The certificate is widely recognized and accepted by employers as verification of job preparedness and skill achievement. Certificates of Completion are issued to those students who complete a prescribed vocational program under all of the following conditions:

- Completion of all required courses with a 2.0 cumulative grade point average or better.
  
  Course requirements may be waived by Campus Presidents and Campus Directors upon submission of proof of completion of equivalent course(s).

- Completion of the Career Services Seminar or equivalent: The Career Services Seminar concentrates on the job search preparation and process. Topics include services provided by the Career Services Department, resume writing, interview techniques, networking skills, portfolio presentation, and workplace success.

Most SJVC certificate courses can be applied toward an Associate of Science degree. Students who intend on obtaining a certificate and a degree should see their admissions representative for general education and other requirements beyond those required for their certificate.

To keep pace with educational, technological or similar developments, SJVC reserves the right to change the requirements for graduation.

Changes may be applied to students already enrolled. For those cases, the College will specify an alternate plan of study, which must be completed in lieu of the original requirements.
SECTION 8

COURSE DESCRIPTIONS

ALPHABETIC LIST OF COURSE DESCRIPTIONS.......................................................... 112
### ALPHABETIC LIST OF COURSE DESCRIPTIONS

**ACT 101: Principles of Accounting**  
5.0 units — 90 hours  
This course examines the Generally Accepted Accounting Principles, the purpose and nature of accounting systems, the accounting cycle, and their relation to function. Subjects covered include accounting careers, the basic accounting equation, the double entry accounting system, financial statements, general ledger, general journal, the accounting worksheet, adjusting entries, closing entries, post-closing trial balance, and automated accounting.

**ACT 102: Intermediate Accounting**  
3.0 units — 45 hours  
This course examines the theory, concepts, and practices of accounting, and their relation to function. Emphasis will be on financial statements and year-end accounting, accounting for partnerships and corporations, automated accounting, and analysis of related accounting functions.

**AERO 30: Aircraft Basic Science**  
9.0 units — 256 hours  
This course provides a review of blueprint reading, mechanical drawings, fabrication of fluid lines and fittings, nondestructive testing methods, aircraft hardware and material identification, precision measuring techniques, aircraft corrosion control, and FAA documentation. Students will also use FAA and manufacturers' specifications and discuss mechanic privileges and limitations. A grade of "C" or better is required to earn credit for this course.

**AERO 31: Basic Electricity and Electronics**  
9.0 units — 256 hours  
Math concepts and application, basic electricity and electronics involving capacitance, inductance, volts, ampere, resistance and AC/DC circuits will be reviewed. The use of and interpretations of electrical schematics, flow-charts and diagrams is emphasized. This course will also cover the inspection and servicing of aircraft batteries and the physics of an aircraft with emphases on flight characteristics and weight & balance. A grade of "C" or better is required to earn credit for this course.

**AERO 32: Reciprocating Engine Theory and Engine Overhaul**  
9.0 units — 256 hours  
This course will focus on the inspection and repair of reciprocating engines. Operational concepts of reciprocating aircraft engines and accessories, and the overhaul of a piston engine with removal and inspection of a piston engine will be covered. The student will also learn the procedures involved in the inspection and servicing of engine instrument systems. A grade of "C" or better is required to earn credit for this course.

**AERO 33: Sheet Metal Structures and Airframe Auxiliary Systems**  
9.0 units — 256 hours  
This course will cover aircraft sheet metal fabrication including layout, drilling, and riveting. There will be a continued study of the fabrication and repair of plastics, honeycomb and bonded aluminum structure. This course will also cover autopilot, communication and navigation systems. A grade of "C" or better is required to earn credit for this course.

**AERO 34: Turbine Engines**  
9.0 units — 256 hours  
This course will focus on the inspection, servicing, troubleshooting, overhauling, and repair of turbine engines and supporting elements. Powerplant, electrical and auxiliary systems are also covered. A grade of "C" or better is required to earn credit for this course.

**AERO 35: Composite Structures**  
9.0 units — 256 hours  
Inspection and repair of wood, composite and fabric-covered structures, techniques for aircraft conformity and airworthiness inspection, techniques involved with aircraft electronic systems, including autopilot, communication and navigation systems, and techniques involving the application of aircraft finishes, including paint and dope, will be examined in this course. This course will also include techniques of welding and the fabrication and repair of structures by welding. A grade of "C" or better is required to earn credit for this course.

**AERO 36: Propellers and Engine Auxiliary Systems**  
9.0 units — 256 hours  
This course will focus on the inspection, troubleshooting, overhaul, and repair techniques of carburetors, engine fuel metering systems and components. Engine fire detection and extinguishing systems, propellers and propeller control systems, and engine auxiliary systems are also covered. A grade of "C" or better is required to earn credit for this course.

**AERO 37: Aircraft Landing Gear**  
9.0 units — 256 hours  
This course will cover the inspection, troubleshooting and repair of landing gear retraction systems, including shock struts, wheels, brakes, and tires. Topics include: checking and servicing of fuel management and dump systems, inspection and repair of aircraft auxiliary systems, including ice and rain control, smoke and carbon monoxide warning systems, and fire detection and extinguishing systems and landing gear. A grade of "C" or better is required to earn credit for this course.

**AERO 51: Professional Licensing Seminar**  
2.0 units — 96 hours  
The focus of this course is the review and practical application of the AMT license examination. Students will prepare for both the written and practical examinations. The course also covers a review of the professional opportunities for the AMT graduate. A grade of "C" or better is required to earn credit for this course.

**AMA 33: Medical Insurance**  
3.0 units — 45 hours  
This course presents a comprehensive look at medical insurance billing requirements and skills necessary to successfully file claims and effect collection of payment for medical services given.
AMA 223: Medical Office Management and Computer Applications
5.0 units - 90 hours
In this course, students will learn the skills necessary to manage the front office of a health care facility. They will learn to manage Electronic Health Records (EHR) and basic procedures for processing fee-for-service, insurance and coding procedures for various insurance and HMO applications. Students will demonstrate patient and appointment management, telephone procedures, as well as the operation of software used to run the modern medical office facility. Keyboarding skills are a part of each class session.

APMT 1: Anatomy, Physiology, Medical Terminology
5.0 units – 90 hours
This course provides an overview of medical terminology including basic word construction, abbreviations and symbols used in the profession. An extensive study of the human body includes basic chemistry, organization, cells, tissues, membranes and human diseases. Emphasis is placed on the integumentary, skeletal, muscular, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems. A grade of "C" or better is required to earn credit for this course.

BA 210: Business Writing
2.0 units – 45 hours
This course focuses on the effective writing techniques utilized in business to produce various communications and documents, including business letters, minutes and reports, and dictation and note taking. Proper grammar, mechanics, number usage, vocabulary, and proofreading are emphasized as well as style, appearance, tone, and reader appeal. The importance of oral communication in business is also covered.

BCS 101: Basic Computer Skills
5.0 units – 90 hours
The course is designed to provide the student with an introduction to the components of the Microsoft Office Suite. Emphasis of the class will be Microsoft Word, Microsoft Excel, and PowerPoint. Students will be tested for skill competency on a regular basis. Keyboarding skills are part of each class session. Students will participate in timed keyboarding skill tests.

BIO 24: Human Anatomy and Physiology
4.0 units – 75 hours
This course provides an introduction to the structure and function of the major organs, essential structures, and physiological principles of the human body with emphasis on primary organ systems to students in health majors. Integration of multi-organ functions and relevant terminology will be included.

BIO 31: Microbiology
4.0 units – 75 hours
An introduction to microbiology covering the fundamental aspects of taxonomy, morphology, classification, genetics and reproduction, physiology, nutrition and growth, control, host – parasite relationships, and immunology. Bacteria, fungi, protozoa, and viruses and their roles and importance in the biological world will be covered. Basic techniques for culturing, staining, counting, and identifying microorganisms are emphasized in the laboratory.

BIO 32: Microbiology
3.0 units – 45 hours
An introduction to microbiology covering the fundamental aspects of taxonomy, morphology, classification, genetics and reproduction, physiology, nutrition and growth, control, host – parasite relationships, and immunology. Bacteria, fungi, protozoa, and viruses and their roles and importance in the biological world will be covered. Basic techniques for culturing, staining, counting and identifying microorganisms are emphasized in the laboratory.

BIOL 10: Human Anatomy
4.0 units – 90 hours
This course provides the study of human body structure including cellular, tissue, organ, and system levels of organization. Classroom instruction is supported by laboratory activities of models, charts, specimens, and vital laboratory exercises.

BIOL 14: Microbiology
4.0 units – 90 hours
An introduction to microbiology covering the fundamental aspects of morphology, classification, genetics and reproduction, physiology, nutrition, growth and control, microbial metabolism, molecular biology and genetics. Emphasis will be on the diversity of the microbial world, including taxonomy and phylogeny, ecology and symbiosis, the pathogenicity of microbes and the immune response of the human body, as well as environmental and food microbiology. Basic techniques for culturing, staining, counting and identifying pathogenic and non-pathogenic microorganisms will be devoted during the laboratory sessions.

BIOL 45: Human Physiology
5.0 units – 105 hours
This course provides the integrated study of the function of cells, organs, and systems in maintaining homeostasis. Physiological principles and concepts are supported with laboratory activity.

BUS 100: Introduction to Business
5.0 units – 90 hours
Concepts, principles, and operations of the private enterprise system are identified in this course. Students compare and contrast sole proprietorships, partnerships, and corporations, and learn the advantages and disadvantages of each. This course also discusses the functions of modern business management, marketing, ethics, and social responsibility. Human resource management is described, as well as how employers can motivate their employees. Bookkeeping, accounting, financial management and financial statements are also examined.

BUS 102: Business Math
3.0 units – 45 hours
This course focuses on the fundamentals of arithmetic processes, decimals, fractions, weights and measures. Special attention is given to percentages, interest calculations, and general business math. Ten key operations are included in this course.
BUS 125: Administrative Operations and Procedures
5.0 units – 90 hours
This course focuses on the primary skills and duties of the Administrative Business Specialist. Topics covered include telephone techniques, office equipment use, appointment scheduling and management, telecommunications, and other effective communication methods and techniques. Meeting and agenda planning, travel arrangements, and human relations will also be covered. An introduction and overview of records management methods will be introduced. Organization, time and stress management, and communication are incorporated into all aspects of this course.

BUS 145: Business Math
5.0 units – 90 hours
This course focuses on the fundamentals of arithmetic processes, decimals, fractions, weights and measures. Special attention is given to percentages, interest calculations, and general business math. Ten key operations are included in this course. This course is designed to provide introductory and intermediate skills in Microsoft Office Excel through hands-on operations and practice of simulated business projects and activities. Students will learn to build a worksheet using commands such as copying, formatting, identifying ranges, and the functions of formulas. Skill competency will be assessed throughout this course. Keyboarding skills are included.

BUS 160: The Modern Office Professional
3.0 units – 45 hours
This course prepares students to transition from the classroom to today’s computerized office. Students will develop time management, organization, communication, telecommunication, and email skills. Students will create professional documents, meeting agendas, memos and office email messages throughout the course. A number of projects will be assigned in which students experience and resolve common problems encountered in the modern office environment.

BUS 170: Strategic Management and Leadership
3.0 units – 45 hours
This course focuses on strategic management and leadership in the business world. Students will examine and analyze strategic planning questions. Other topics include: Analytical and critical thinking development, competitive advantage and positioning, global environment, identification of opportunities and threats, and implementing strategy. Students will analyze case studies and participate in scenarios in conjunction with strategic management concepts, theories and models.

BUS 180: Marketing and Sales
3.0 units – 45 hours
This course provides a foundational and comprehensive overview of marketing and sales philosophies, activities, practices, and processes. Additional topics include external and internal factors of marketing, market segmentation, global marketing concepts, consumer decision-making, consumer products, advertising and sales promotion and personal selling. A strategic marketing plan will be defined and developed.

BUS 400: Business Capstone
3.0 units – 45 hours
This course is designed to give students a small business experience and opportunity to apply their business skills to simulated entrepreneurial circumstances. Students will apply skills and practice all aspects of a typical, small business operation: planning, financing, staffing, pricing, purchasing, inventory control, advertising and promotion.

CHE 3: General Chemistry
4.0 units – 90 hours
This course focuses on composition of matter and physical and chemical changes; fundamental laws and principles; atomic and molecular structure; acid-base chemistry, redox, equilibria; qualitative and quantitative techniques and theory.

CHE 3A: Introduction to General Chemistry
4.0 units – 75 hours
This course focuses on composition of matter and physical and chemical changes; fundamental laws and principles; atomic and molecular structure; acid-base chemistry, redox, equilibria; qualitative and quantitative techniques and theory.

CHE 4: Introduction to Organic and Biochemistry
4.0 units – 90 hours
This course is designed for allied health majors and focuses on the basic structural, physical, and chemical properties of organic and biochemical compounds. Topics include hydrocarbons and the chemistry of organic functional groups, and properties of carbohydrates, lipids, and proteins. The role of these compounds in metabolism and energy is also discussed.

CJ 4: Criminal Law
3.0 units – 45 hours
This course explores the historical development and philosophy of law as well as reviews the constitutional provisions. In addition, this course defines and classifies a variety of crimes, such as crimes against persons, property, and the state.

CJ 14: Juvenile Law and Procedures
3.0 units – 45 hours
This course identifies techniques for handling juvenile offenders and victims, prevention and repression of delinquency, diagnosis and referral procedures for juveniles, and the organization of community resources. Juvenile law and juvenile court procedures will also be covered.

CJ 60A: Adult Corrections Officer Core Course
15.0 units – 270 hours
This course meets the training requirement as set forth by the California Board of Corrections, Section 179 and 1020 of Title XV, California Administrative Code, and fulfills the mandatory training requirements for Corrections/Custodial Officers who are assigned to custody positions in city/county/private jails or facilities. The content is job-related and is certified by Standards and Training for Corrections (STC Certification #601-1253). Training in First Aid and CPR is included.
CJ 63: BSIS Security Officer Academy
5.0 units — 90 hours
This course meets the requirements of AB2880 training for private security professionals as mandated for licensed security guards in California Business and Professions Code §7585-7585.20. Topics include powers to arrest, terrorism and weapons of mass destructions, exposed firearms, baton and chemical agents, concepts of arrest, communications, search, report writing, courtroom procedures, testimony, criminal and civil law, public and community customer relations. Upon successful completion the student will receive a BSIS Guard Card license and obtain certification and permits for Exposed firearms, baton and chemical agents. This course further provides the certification for the 32 hours of additional BSIS mandated training, 16 hours of mandated subjects and 16 hours of elective subjects for a licensed security professional.

CL 110: Computer Literacy and Applications for Healthcare Professionals
2.0 units — 45 hours
This course provides an introduction to computer concept with Word and Excel processing through hands-on operation. Topics include information on basic computer technology, file management, creation and execution of documents and spreadsheets and e-mail. Computer activities include Internet research and the creation of various documents and reports related to the medical field.

CMA 31: Medical Laboratory Procedures 1
2.0 units — 45 hours
The theory and technique of electrocardiograms (ECG), hematology, chemistry, lab values and various other lab procedures are discussed and performed in this course. A grade of "C" or better is required to earn credit for this course.

CMA 41: Medical Laboratory Procedures 2
2.0 units — 45 hours
The review of theory and techniques of venipuncture, hematology, and various other lab procedures are discussed and performed in this class. An introduction to radiology is provided. A grade of "C" or better is required to earn credit for this course.

CMA 42: Medical Office Simulations and Professional Development 2
3.0 units — 45 hours
This course will focus on professional development and preparing for the Registered Medical Assistant (RMA) exam. The course includes the review and application of clinical skills and concepts such as medical terminology, body systems, injections, vital signs, venipuncture, and the use of surgical instruments. Keyboarding skills are part of each class session. Students will participate in discussion of customer service, human relations and professional behavior applications throughout this course.

CMA 121: Basic and Advanced Phlebotomy Theory
5.0 units — 90 hours
This course covers essential techniques and step-by-step procedures for venipuncture and various specimen collections focusing on the Medical Assistant’s scope of practice for laboratory procedures. Topics include Occupational Safety and Health Administration (OSHA) and Clinical Laboratory Improvement Amendment (CLIA) regulations, universal precautions, infection control and sterile techniques. An overview of anatomy and physiology of the circulatory system and hematology are introduced. The Medical Assistant’s responsibility in providing patient education, quality care, and demonstrating professional behavior are emphasized throughout this course.

CMA 141: Medical Assisting Competencies
5.0 units — 90 hours
This course focuses on the role of the Medical Assistant in assisting with various exams. Students will be introduced to fundamental clinical skills such as obtaining and recording vital signs, preparing rooms and setting up trays. Topics include OSHA guidelines, regulations, ambulation and mobility instruction, basic concepts of diet and exercise and the theory of cardiopulmonary resuscitation (CPR), First Aid, emergency procedures and medical office safety procedures. An overview of anatomy, physiology, and medical terminology related to the cardiovascular and respiratory systems are covered. In addition, students will receive an introduction to basic concepts of radiology. The Medical Assistant’s responsibility in providing patient education, quality care and demonstrating professional behavior are emphasized throughout this course.

CMA 161: Introduction to Pharmacology and Administration of Medication
5.0 units — 90 hours
This course will review the anatomy, physiology and terminology as it pertains to pharmacology, injections, immunizations, and medication administration. Patient charting and instrumentation for injections and general medical procedures pertaining to the administration of medication are covered. Students will learn the components of a prescription and the terminology associated with medication orders. Students will review basic math concepts and learn dosage calculations. The Medical Assistant’s responsibility in providing patient education, quality care, and demonstrating professional behavior are emphasized throughout this course. A grade of "C" or better is required to earn credit for this course.

CMA 170: Medical Office Applications and Communication
5.0 units — 90 hours
This course provides comprehensive HIPAA (Health Insurance Portability and Accountability Act) compliance training and focuses on communication skills, telephone etiquette, and the administrative duties performed in a medical office. Students are introduced to basic computer concepts with an emphasis on the application of medical office practice management software and word processing software. Professional development and employment skills are covered in this course. Patient education, quality care and professional behavior are emphasized throughout this course.

CMA 201: Medical Assisting Applications 1
2.0 units — 45 hours
This course teaches pharmacology, administration of medication, and the skills of patient preparation and assessment for various clinical procedures. A review of injection sites, injection techniques and various other clinical procedures as well as health and nutritional
A grade of "C" or better is required to earn credit for this course.

CMA 202: Medical Assisting Applications 2
2.0 units – 45 hours
This course teaches the skills required for various clinical procedures. Basic equipment set-ups, step-by-step procedures, venipuncture techniques and specimen collection are included in this course. A grade of "C" or better is required to earn credit for this course.

CMA 501: Exam Prep
1.0 unit – 15 hours
This course will focus on professional development and preparing for appropriate certification examinations. This course includes review of clinical skills and concepts of medical terminology, body systems, injections, vital signs, venipuncture, prescription drug dosage calculations and the use of surgical instruments.

CMP 101: Introduction to Microsoft Office 1
5.0 units – 90 hours
This course is designed to provide introductory and intermediate skills in Microsoft Office through hands-on operations and practice of simulated business projects and activities. Emphasis is placed on Word and PowerPoint applications. This course includes functions such as word processing, document formatting, mail merge, automating your work, and organization and arrangement of PowerPoint presentations. Skills competency will be assessed throughout this course. Keyboarding skills are included.

CMP 102: Introduction to Microsoft Office 2
5.0 units – 90 hours
This course is designed to provide introductory and intermediate skills in Microsoft® Office through hands-on operations and practice of simulated business projects and activities. Emphasis is placed on Excel and Access applications. Students will learn to build a worksheet using commands such as copying, formatting, identifying ranges, and the functions of formulas. Students will also learn the basics of Access, how to create, maintain, and work with a database. Skill competency will be assessed throughout this course. Keyboarding skills are included.

CMP 110: Computer Applications in Construction Management
5.0 units – 90 hours
This course provides a foundational approach to Construction Industry software, including a basic introduction to Estimating and Project Scheduling. The curriculum is designed to provide a fundamental overview of the software packages that students will utilize in subsequent coursework.

CO 2: Introduction to Administration of Justice
3.0 units – 45 hours
This course covers the history and philosophy of justice as it has evolved throughout the world. This course offers an in-depth study of the American system and the various sub-systems, roles, and role expectations of criminal justice agents and their interrelationship with society; concepts of crime causation; punishment and rehabilitation; ethics; and education in training relating to professionalism in the social system.

CO 3: Criminal Procedures
3.0 units – 45 hours
This course examines the legal processes of search warrants, reasonable cause for detention of a person, probable cause for arrest, criminal trials, procedural hearings, and sentencing. This course offers a review of the history of case and common law, conceptual interpretations of law as reflected in court decisions, a study of case law methodology and case research, and how the decisions impact the procedures of the justice system. Students will also be introduced to the legal aspects of evidence.

CO 5: Community and Human Relations
3.0 units – 45 hours
This course explores the roles of administration of justice practitioners and their agencies. Through interaction and study, the student becomes aware of the interrelationships and role expectations between the various members of the system and the public. Professional development and employment skills including resume writing, interview techniques, and personalized job search planning will also be covered in this class. The final grade in this class includes projects and assignments related to professional development and employment skills.

CO 8: Introduction to Investigation
3.0 units – 45 hours
The fundamentals of investigation are introduced in this course through the following topics: techniques of crime scene search and recording, collection and preservation of physical evidence, modus operandi, sources of information, interview and interrogation, and follow-up investigation.

CO 10: Writing for Criminal Justice
3.0 units – 45 hours
This course focuses on the techniques of communicating facts, information, and ideas effectively in a simple, clear, and logical manner using the various types of criminal justice terminology. The use of English and organization of information, introduction to computer keyboarding, word processing, data entry, and report writing are also included.

CO 20A: Introduction to Corrections
3.0 units – 45 hours
This course examines a survey of the field of correctional science through historical development, current concepts and practice, and explanations of criminal behavior. The functions and objectives of the criminal justice system concerned with institutional, probation, and the parole processes as they modify the offender’s behavior are also covered. A survey of professional career opportunities in public and private agencies will be introduced.

COM 100: Strategic Communications
3.0 units – 45 hours
This course explores communication in the workplace. The course will study group dynamics, work relationships, and cultural
awareness. The course will focus on the importance of verbal, non-verbal and listening skills as effective communication tools. Conflict management, leadership skills, and public presentation strategies will be covered in this course. Critical thinking is encouraged through written and/or oral assignments and case studies.

COMP 101: Computer Literacy & Applications for the Professional
3.0 units – 45 hours
This course provides an introduction to computer concepts with Word and Excel processing through hands-on operation. Topics include information on basic computer technology, file management, creation and execution of documents and spreadsheets and e-mail. Computer activities include Internet research and the creation of various documents and reports.

COMP 102: A+ Hardware
3.0 units – 45 hours
This course is designed to introduce the student to the basics of installing, configuring, maintaining, upgrading, diagnosing, troubleshooting, and networking recent and current personal computer hardware. Students will also learn concepts of computer hardware technology and the terminology that is used across the industry.

COMP 103: A+ Software
3.0 units – 45 hours
This course is designed to introduce the student to the basics of installing, configuring, maintaining, upgrading, diagnosing, troubleshooting, and networking using personal computer software. Students will properly configure software for proper security and also support software on mobile devices.

COMP 104: InfoTech Industry Certification Exam Preparation – Core
0.0 units – 30 hours (pass/fail)
This course will provide the student with various methods and strategies to successfully complete industry certification examinations related to Information Technology courses completed. Students will develop a personalized plan for industry certification exam preparation. Additionally, professional quality artifacts of learning will be reviewed and assembled for inclusion in the graduate portfolio.

COMP 120: Network+
3.0 units – 45 hours
This course is designed to introduce the student to the basics of installing, configuring, and troubleshooting basic networking hardware, protocols and services. Students will also learn concepts of computer network technology and the terminology that is used across the industry.

COMP 121: Windows Server Installation and Configuration
4.0 units – 75 hours
This course is designed to provide the student with the knowledge and skills for installing and configuring Microsoft Windows Server 2012. Students will learn how to install and configure Server Core, configure server roles and features, create virtual machines, manage core networking services, deploy Active Directory, and manage hosts.

COMP 122: Windows Server Administration
4.0 units – 75 hours
This course is designed to provide the student with the knowledge and skills needed to administer and manage servers using Microsoft Windows Server 2012. Students will learn how to maintain servers, configure print and file services, configure network services and access, configure Network Policy Server infrastructure, and manage user accounts using Group Policy and Active Directory.

COMP 123: Wireless Local Area Networks (LAN)
4.0 units – 75 hours
This course is designed to provide the student with the knowledge and skills for installing and configuring wireless local area networks. Students will learn the fundamentals of wireless data transmissions, wireless LAN standards, security, and management and troubleshooting.

COMP 130: Concepts in Database Management
3.0 units – 45 hours
This course is designed to introduce the student to database management including topics such as basic database terminology, database management systems and their functions, advantages and disadvantages of database processing, the relational database model, database normalization, and database administration. Students will also cover advanced topics such as views, indexes, security, referential integrity, the system catalog, and the use of stored procedures, triggers, and data macros. After taking this class, students will be able to explain how databases work on a basic and detailed level, and how technicians interact with databases in the workplace.

COMP 131: Database Systems
4.0 units – 75 hours
This course is designed to introduce the student to the important aspects of fundamental database concepts including the relational database model, database normalization, structured query language, transaction management, performance tuning, distributed database management, and the role of databases in business intelligence and decision support. Students will also learn the role of database administration, security, and connectivity.

COMP 132: Structured Query Language
4.0 units – 75 hours
This course is designed to introduce the student to structured query language (SQL), including topics such as the use of typical SQL commands, single- and multi-table queries, database administration, and SQL functions and parameters. In addition, students will learn the various aspects of database design fundamentals.

COMP 133: Microsoft SQL Server
4.0 units – 75 hours
This course is designed to introduce the student to Microsoft SQL Server 2012, including topics such as database architecture and design, security, data integrity, performance optimization, backup and recovery, and system monitoring. In addition, students will learn the core skills and develop the confidence necessary to become an effective database administrator on Microsoft SQL Server 2012.
COMP 140: Introduction to Web Design  
3.0 units – 45 hours  
This course is designed to provide the student with the knowledge and skills needed to create, edit, and manage web sites. This course examines developing and enhancing web sites using HTML and CSS, site layout planning and navigation, and using typography, colors, images, and data tables. It also explores creating web sites across different operating systems, browsers, and devices.

COMP 141: HTML  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills needed to use HTML for creating and maintaining web sites. This course examines creating and editing a web page using inline style sheets, creating tables in a web site using an external style sheet, creating an image map, creating pop-up windows, adding scrolling messages, and validating forms.

COMP 142: JavaScript Programming  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills needed to use the JavaScript programming language for developing web applications. Topics include developing applications for touchscreen and mobile devices, using the jQuery library, building arrays, working with forms and strings, and using object-oriented JavaScript.

COMP 143: Web Development with Adobe Dreamweaver  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills needed to use Adobe Dreamweaver to design and author websites effectively. This course examines the Dreamweaver interface, features, and functionality. Topics include working with text and cascading style sheets, images, links and navigation, style sheets, forms, and interactive elements.

COMP 150: Security+  
3.0 units – 45 hours  
This course is designed to introduce the student to the basics of enterprise and personal security. Topics to be covered include network security, compliance and operational security, threats and vulnerabilities; application, data and host security, access control and identity management, and cryptography.

COMP 151: Network Security  
3.0 units – 45 hours  
This course is designed to provide the student with the knowledge and skills to design and manage network perimeter defenses. Topics covered include intrusion detection, firewalls, security policies, network address translation (NAT), packet filtering and analysis, proxy servers, virtual private networks (VPN), and analyzing network traffic signatures.

COMP 152: Penetration Testing  
4.0 units – 75 hours  
This course is designed to introduce the fundamentals of penetration testing. Topics covered include scanning tools, sniffers, spoofing, session hijacking, denial-of-service attacks, and programming exploits.

COMP 153: Computer Forensics  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills to perform computer forensics. This course focuses on techniques and practices for gathering and analyzing evidence used to solve crimes involving computers by using current forensics software.

COMP 154: Web Development with Adobe Dreamweaver  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills needed to use Adobe Dreamweaver to design and author websites effectively. This course examines the Dreamweaver interface, features, and functionality. Topics include working with text and cascading style sheets, images, links and navigation, style sheets, forms, and interactive elements.

COMP 155: Advanced Systems Security  
4.0 units – 75 hours  
This course is designed to provide the student with the knowledge and skills needed to administer and manage security systems on an advanced level. This course examines security theory and concepts, access control, telecommunications and network security, information security governance and risk management, software development security, cryptography, security architecture and design, operations security, business continuity and disaster recovery planning, compliance, and physical (environmental) security.

COMP 224: InfoTech Industry Certification Exam Preparation – Networking  
1.0 unit – 30 hours  
This course will provide the student with various methods and strategies to successfully complete industry certification examinations related to Information Technology courses completed. Students will develop a personalized plan for industry certification exam preparation. Additionally, professional quality artifacts of learning will be reviewed and assembled for inclusion in the graduate portfolio.

COMP 234: Certification Review – Database  
1.0 unit – 30 hours (pass/fail)  
This course will provide the student with various methods and strategies to successfully complete industry certification examinations related to Information Technology courses completed. Students will develop a personalized plan for industry exam preparation. Additionally, professional quality artifacts of learning will be reviewed and assembled for inclusion in the graduate portfolio.

COMP 244: InfoTech Industry Certification Exam Preparation – Web  
1.0 unit – 30 hours  
This course will provide the student with various methods and strategies to successfully complete industry certification examinations related to Information Technology courses completed. Students will develop a personalized plan for industry certification exam preparation. Additionally, professional quality artifacts of learning will be reviewed and assembled for inclusion in the graduate portfolio.
COMP 254: InfoTech Industry Certification Exam Preparation – Security
1.0 unit – 30 hours
This course will provide the student with various methods and strategies to successfully complete industry certification examinations related to Information Technology courses completed. Students will develop a personalized plan for industry certification exam preparation. Additionally, professional quality artifacts of learning will be reviewed and assembled for inclusion in the graduate portfolio.

CON 100: Construction Materials
3.0 units – 45 hours
This course provides an overview and study of the principle construction materials used within the construction industry: concrete, masonry, metals, woods, and thermal materials. The course also examines the general requirements of a construction project and the techniques of project mobilization. This course focuses on CSI Divisions 1-7 (Master Format 1994) and is designed to accompany CON 120.

CON 105: Design Theory
3.0 units – 45 hours
This course is an introduction to architectural related design and working document evolution, including the design process, the establishment of architectural criteria, blueprint reading, technical specifications, and related and accompanying design and drawing development. In addition, students will enhance their critical communication skills necessary to interact with design professionals.

CON 106: Blueprint and Plan Reading
3.0 units – 45 hours
Students will learn a fundamental approach to construction industry blueprint and plan reading, focusing on both residential and commercial construction. They will also develop the skills needed to learn to read the construction drawings that are used to communicate information about buildings. Students will utilize these skills in subsequent coursework.

CON 111: Materials and Architectural Design
5.0 units – 90 hours
This course provides an overview and study of the principal construction materials used within the construction industry and an introduction to architectural related design and working document evolution. Construction materials covered include concrete, masonry, metals, woods, thermal and moisture protection, openings, and interior finishes. The course examines the general requirements of a construction project and the techniques of project mobilization with a focus on CSI Divisions 1-9 and 31 (Master Format 2004). The design process, the establishment of architectural criteria, blueprint reading, technical specifications, and related and accompanying design and drawing development are also covered. In addition, students will enhance their critical communication skills necessary to interact with design professionals.

CON 112: Construction Documents and Methods
5.0 units – 90 hours
This course examines various documents utilized within the construction industry to record and communicate with others. The document practice introduced in this course will provide students with the exposure to proper communication procedures with project owners, designers, subcontractors, and local governmental agencies. This course also provides an overview and study of specialties, equipment, furnishings, special construction, conveying equipment, fire suppression, plumbing systems, heating, ventilating, air-conditioning, electrical, electronic safety, and security systems, used within the construction industry to complete a construction project. The course focuses on CSI Divisions 10-30, 32-48 (Master Format 2004).

CON 113: Construction and Labor Laws
5.0 units – 90 hours
This course focuses on federal and state labor-oriented regulations as applied to the construction industry practices. The student will investigate the interaction between technical and legal aspects of personnel administration practices, work force management, labor standards, employment discrimination, strikes and picketing, union organization, collective bargaining, pre-hire agreements, hiring hall referrals, union and non-union shop construction. This course also provides an orientation to the rules and regulations governing the construction industry, including building codes, state lien laws, contractor’s license law, health and safety laws, worker’s compensation, and employment insurance and taxes.

CON 114: Computer Applications and Strategic Communication
5.0 units – 90 hours
This course provides a foundational approach to Construction Industry software and how students use the software to employ effective communication in the field. The curriculum is designed to provide a fundamental overview of the software packages that students will utilize in subsequent coursework and provides the skills for effective strategic communication and presentations through the use of practical exercises.

CON 115: Applied Math for Construction Management
3.0 units – 45 hours
This course provides topics in fundamental algebra to include: operations on expressions, variables, monomials, polynomials, solving and graphing linear equations and inequalities. Emphasis is placed on operations involving formulas, factoring, problem-solving, radicals, and rational expressions. This course also provides topics in fundamental plane geometry to include: congruence, similarity, perpendicular and parallel lines, angles, theorems, and properties of polygons and circles. Emphasis is placed on constructions and calculations for perimeter, area and volume of common and complex geometric figures. In addition, this course offers hands-on applications which allow students to relate and apply concepts, developed through inductive and deductive reasoning, to real world situations.
CON 116: Construction Business, Accounting and Financial Management  
3.0 units – 45 hours  
This course provides students with the fundamentals of business management, financial management and accounting for construction companies. Emphasis is placed on construction business strategic planning and organization, as well as the systems, methods and report analysis of accounting as it relates to construction management. Additionally, this course provides fundamental financial principles, focusing on cash flow for both company and project needs, methods and sources for financial resources, productivity analysis and financial analysis. Using inductive and deductive reasoning, students relate and apply the concepts, through hands-on applications to real world situations.

CON 120: Construction Methods  
3.0 units – 45 hours  
This course provides an overview and study of the equipment, systems, finishes, and manufacturing specialties used within the construction industry to complete a construction project. The course also focuses on CSI Divisions 8-16 (Master Format 1994) and is designed to accompany CON 100.

CON 125: Scheduling and Control  
5.0 units – 90 hours  
This course is the study and application of the critical path method, which includes planning, scheduling and control of the construction project. Students will discuss the use of logic, time assignment and computation, analysis, re-evaluation, computer applications, and management responsibilities. This course provides an introduction to the ethical problems and issues in modern society. Students will discuss current events related to ethical issues and participate in group discussions.

CON 126: Project Scheduling and Strategic Communication  
5.0 units – 90 hours  
This course is the study and application of Critical Path Method which includes planning, scheduling and control of construction projects together with a foundational approach to Construction Industry software. The student will discuss the use of logic, time assignment and computation, analysis, re-evaluation, computer applications, and management responsibilities. Students will generate a construction project network diagram, convert it to an MS Project schedule, update, and analyze the software version of the schedule.

CON 135: Estimating & Bidding for Residential & Commercial Projects  
5.0 units – 90 hours  
This course focuses on the introduction to residential cost estimating, including: reading and interpretation of blue print, plans, specifications and other project documents; principles of building costs; estimate and construction cost control; and practice in preparing bids for prospective buyers. Techniques and rationale used for analysis in estimating residential, commercial, and heavy construction projects are discussed, along with format and preparation of competent construction cost estimates with an emphasis on computer applications. Students will plan and prepare competitive bids for the firm-price heavy construction projects.

CON 136: Labor and Construction Laws  
3.0 units – 45 hours  
This course provides an orientation to the rules and regulations that govern the construction industry. Students will study contract law, state lien laws, tort law, federal and state labor-oriented regulations, along with dispute resolution methods. They will discuss organized labor’s role in construction industry practices.

CON 137: Quantity Survey, Estimating and Bidding for Construction  
5.0 units – 90 hours  
This course focuses on the introduction to residential and commercial cost estimating, including: reading and interpretation of blue print, plans, specifications and other project documents; principles of building costs; estimate and construction cost control; and practice in preparing bids for prospective buyers. Techniques and rationale used for analysis in estimating residential, commercial, and heavy construction projects are discussed, along with format and preparation of competent construction cost estimates with an emphasis on computer applications and mathematical formulas used in estimating.

CON 141: Construction Supervision  
3.0 units – 45 hours  
All the methods of field supervision in construction will be identified in this course. Topics will include administrative procedures, quality control, scheduling, and bidding. Students will also investigate and discuss basic principles of business management, how to be an effective manager, and the best practices of supervision, motivation, and leading a team to successful outcomes.

CON 145: Construction Project Management  
5.0 units – 90 hours  
This course will discuss the construction manager’s relationship and interaction with internal organization, owner, architect, engineer, public, press, legal aid, unions, trades, equipment, utilities, insurance, finances, government and others. In addition, the student will examine the administration aspects as well as monitoring, budgeting, expediting, and achieving a quality construction project.

CON 146: Construction Project Management & Contract Documents  
5.0 units – 90 hours  
Students in this course will discuss the construction manager’s relationship and interaction with internal organization, owner, architect, engineer, public, press, legal aid, unions, trades, equipment, utilities, insurance, finances, government and others. They will examine the administration aspects including monitoring, budgeting, expediting, and achieving a quality construction project, along with the various documents utilized within the construction industry to record, communicate and enter into legal agreements with others.
CON 155: Competitive Business Presentations and Strategic Communication  
3.0 units — 45 hours  
This course equips construction supervisors with the skills necessary to become effective communicators in the workplace. The goal of this course is to introduce a culture of open and accurate communication which will lead to trust between the construction supervisor and those who are intrinsic to his/her productivity of work flow. The course will focus on the importance of verbal, non-verbal, and listening skills as effective communication tools. Topics in this course include persuasion and negotiation strategies; constructive and corrective feedback; and electronic and written communication. Critical, active thinking and decision-making are expected and encouraged through group activity, class discussion, and self-reflective assignments. Students will learn the fact gathering process of organizational, presentation skills, and aids through preparation and execution of competitive business presentations.

CPR 1: CPR/First Aid  
1.0 unit — 15 hours  
Students will participate in First Aid, CPR (Cardiopulmonary Resuscitation) and basic life support training, including information essential for the development of student’s first aid knowledge, skill ability, and personal judgment in basic life support using CPR.

CSA 5: Network +  
5.0 units — 90 hours  
This course covers a wide range of vendor and product neutral networking technologies. At the end of this course, students will possess the knowledge needed to configure and operate a variety of networking products. Students will be prepared to take the Comp TIA Exam Network +. Successful completion of this exam leads to Network + Certification.

CSA 20: Microsoft Client Operating Systems  
2.0 units — 45 hours  
This course teaches students the installation, configuration, and administration of a Microsoft client operating system. This course prepares the student for the Microsoft Certified Professional (MCP) exam.

CSA 32: Configuring the Active Directory  
2.0 units — 45 hours  
In this course students will learn to configure domain name systems, infrastructure, and additional server roles for information systems incorporating Microsoft Windows Server Active Director. Students will also learn to install, configure, manage, and troubleshoot information systems incorporating Microsoft Windows Server Active Directory.

CSA 42: Configuring Network Infrastructure  
2.0 units — 45 hours  
This course teaches students to install, configure, and troubleshoot information systems that incorporate a Microsoft Windows Server Network Infrastructure. Students will learn to manage information systems that incorporate a Microsoft Windows Server Network Infrastructure.

CSA 56: Security +  
5.0 units — 90 hours  
This course focuses on the security in a network environment. Students will learn to implement and provide security for different environments, including the recommended practices for implementing a proper configuration of the cryptographic system, how to manage digital certificates and public keys, and how to create a disaster recovery plan and security policy. Students will be prepared to take the Security + certification exam upon the completion of this course.

CSA 302: Intermediate Networking A  
2.0 units — 45 hours  
This course serves as a guide for Wide Area Network (WAN) technologies; connecting to a WAN; basic security and wireless concepts: routing and switching; the TCP/IP and OSI models; IP addressing; and implementing NAT and DHCP. This course, coupled with Intermediate Networking B, will prepare students for the Cisco CCENT (640-822) exam Certification.

CSA 303: Intermediate Networking B  
2.0 units — 45 hours  
This course serves to build on the knowledge acquired in Intermediate Networking A for Wide Area Network (WAN) technologies; security and wireless concepts; routing and switching; the TCP/IP and OSI models; operating and configuring IOS devices; implementing NAT and DHCP; and configuring simple networks. This course, coupled with Intermediate Networking A, will prepare students for the Cisco CCENT (640-822) exam Certification.

CSS 100: Career Services Seminar  
Pass/Fail — 8 hours  
Students will prepare for the job search process in this seminar. Through work with the Career Services Department, they will develop resumes, interview techniques, and networking skills needed for workplace success. The grade in this course is Pass/Fail and is based upon creation of a career portfolio, mock interviewing skills, and other professional development activities. Passing this course is a graduation requirement.

CST 3A: A+ Certification A  
5.0 units — 90 hours  
This course is a comprehensive class which covers topics on how computers work, how hardware and software work together, the system board, floppy drives and other essential devices, hard drive installation and support, troubleshooting fundamentals, customizing a personal computer system, understanding and managing memory, electricity and power supplies, supporting Windows 9x to Windows XP. Students will learn installing, maintaining, troubleshooting, upgrading and repairing PCs with specific coverage of the system board, floppy drives, hard drives, memory power supplies, troubleshooting fundamentals, customization and support of Windows 9x to Windows XP. This course prepares students for the A+ Certification Service Technician exam – core and PC modules. This course includes a lab component.
CST 4A: A + Certification Lab
5.0 units – 90 hours
In this course students will practice the necessary competencies for an entry-level IT professional who has hands-on experience in the lab or the field. They will learn the skills required to install, configure, upgrade, and maintain PC workstations, the Windows Operating System and SOHO networks. Students will be able to utilize troubleshooting techniques and tools to effectively and efficiently resolve PC, OS, and network connectivity issues and implement security practices.

CST 14A: Microsoft Server Operating Systems A
2.0 units – 45 hours
This course teaches students to install, configure, and troubleshoot information systems that incorporate Microsoft Windows Server operating systems.

CST 14B: Microsoft Server Operating Systems B
2.0 units – 45 hours
This course teaches students to manage, administer, and troubleshoot information systems that incorporate Microsoft Windows Server operating systems.

DA 105: Orientation to Dentistry
5.0 units – 90 hours
This course focuses on the study of basic principles of microbiology, embryology, and morphology as they relate to the oral environment and dentistry. Nutrition from a whole body concept and its interrelated effects on dental health and an introduction to standard infection control procedures will be covered in this course. Procedures of the Dental Healthcare Professional (DHCP) will be introduced in a simulated laboratory setting.

DA 110: Dental Anatomy and Patient Management
5.0 units – 90 hours
Emphasis of this course is on the basic study of the anatomy of the head and neck, blood supply of the head and neck and innervation of the teeth. This course also provides the theory as well as hands-on approach to medical and dental emergencies. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication.

DA 115: Dental Regulations and Pre-Laboratory
5.0 units – 90 hours
This course provides theory as well as hands-on applications to basic dental materials, instrumentation, and equipment. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication.

DA 230: Dental Radiology
5.0 units – 90 hours
This course presents the principles of dental radiology, including terminology, characteristics, effects of exposure, safety precautions, protection, and monitoring. The course will also cover the clinical application of procedures involved in exposing, processing, and evaluating dental radiographs. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication. A grade of "C" or better is required for this course.

DA 235: Restorative Procedures
2.0 units – 45 hours
This course emphasizes the chairside application of restorative dentistry. The practical application of four-handed dental techniques utilized in operative procedures will be covered. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication.

DA 305: Prosthodontics and Endodontic Specialties
2.0 units – 45 hours
In this course students will study the practical applications of advanced four-handed dental techniques within Endodontic and Prosthodontic specialties. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication.

DA 310: Periodontics and Oral Surgery Specialties
2.0 units – 45 hours
This course focuses on the study of basic surgical procedures. Procedures and instrumentation for a variety of oral and periodontal surgical procedures will be examined. The course also provides information on a variety of drug therapies commonly used to treat dental patients. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice
management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication.

**DA 315: Pediatric and Orthodontic Specialties**  
*2.0 units – 45 hours*  
The study and practical applications of advanced chairside dental techniques within pediatric dentistry and orthodontic dental specialties are covered in this course. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory setting, in a pre-clinical setting on patients and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication. A grade of “C” or better is required to earn credit for this course.

**DA 405: Preventive Clinical Procedures**  
*4.0 units – 90 hours*  
This course presents the principles of preventive dentistry including coronal polish and pit and fissure sealants. Instruction in applicable oral anatomy, histology, physiology, oral pathology as well as normal and abnormal anatomical and physiological tooth descriptions will be covered. Students will be required to perform coronal polish and place pit and fissure sealants on laboratory typodonts as well as clinical patients. Emphasis is given to step-by-step procedures performed by the Dental Healthcare Professional (DHCP) and will be performed on typodonts in a laboratory and pre-clinical setting, on patients, and clinical observation of dental practice management in an extramural facility. This course will also present principles and practices of infection control, OSHA regulations, law and ethics, practice management, and communication. A grade of “C” or better is required to earn credit for this course.

**DA 515: Clinical and Professional Experience**  
*5.0 units – 265 hours*  
This course relates to work experience in an extramural facility under direct supervision of the dentist. Students are required, once per week, to turn in completed hours and evaluations. This course is graded as a Pass or Fail. Failure of this course will result in the student repeating the clinical experience rotation.

**DA 520: RDA Licensure Review Seminar**  
*2.0 units – 45 hours*  
This course gives the student the opportunity to review the theory and skills covered throughout the program in preparation for the written and practical RDA exam. This course is graded as a Pass or Fail based on successful completion of an Exit Exam which simulates the state RDA exam. Pass rate for both the practical and written examinations is 75% or higher; failure to pass with 75% or higher will result in the student retaking the course.

**DH 4: Periodontics 2**  
*3.0 units – 45 hours*  
This course focuses on procedures applicable to the treatment of moderate to advanced periodontal disease, the maintenance of the periodontal patient, the assessment and treatment of periodontal emergencies, the ethical and clinical responsibilities in periodontal disorder, and the relationship and legal ramifications of periodontics in the broad scope of dentistry.  
A grade of “C” or better is required to earn credit for this course.

**DH 10: Oral Biology**  
*3.0 units – 45 hours*  
The study of embryology and histology of oral structural formation, clinical recognition of normal oral structures, the physiological and structural functions of teeth and supporting tissues, and oral anatomy relative to proper dental hygiene procedures. A grade of “C” or better is required to earn credit for this course.

**DH 11: Oral Radiology**  
*2.0 units – 30 hours*  
This course provides the didactic learning experiences to enable the student to distinguish the normal anatomical features of the oral cavity as they appear radiographically. Normal and pathological conditions, placing film for x-rays, and analyzing the quality of exposed radiographs will be covered. A grade of “C” or better is required to earn credit for this course.

**DH 12: Head and Neck Anatomy**  
*3.0 units – 45 hours*  
This course (with DH 112) covers the anatomical structures of the head and neck regions and relates these structures to the clinical practice of dental hygiene. A grade of “C” or better is required to earn credit for this course.

**DH 13: Dental Health Education**  
*2.0 units – 30 hours*  
This course covers the principles and practices of prevention and control of dental disease with emphasis on nutrition, plaque control, motivation and chair-side patient education. A grade of “C” or better is required to earn credit for this course.

**DH 14: Introduction to Clinic**  
*2.0 units – 30 hours*  
This course provides an introduction to the clinical procedures and skills needed for dental hygiene. A grade of “C” or better is required to earn credit for this course.

**DH 20: Local Anesthesia Lecture**  
*1.0 unit – 15 hours*  
This course examines the pharmacology and physiology of local anesthetic agents and their proper use in dental hygiene therapy. The anatomy of the Trigeminal nerve, the physiology of nerve conduction and the mode of action of local anesthetic agents are to be covered. Prevention and management of emergencies in the dental setting will be reviewed. The theory, rationale and protocol for nitrous oxide/oxygen administration will be explored. Students will have opportunity to administer local anesthesia and nitrous oxide/oxygen in the laboratory setting. A grade of “C” or better is required to earn credit for this course.
DH 21: General and Oral Pathology
4.0 units – 60 hours
This course examines the pathological processes of inflammation, immunology defense, degeneration, neoplasm, developmental disorders, healing and repair. Recognition of abnormalities in the human body with a special emphasis on normal and abnormal conditions in the oral cavity. A grade of "C" or better is required to earn credit for this course.

DH 22: Patient Management and Geriatrics
1.0 units – 30 hours
This course teaches the characteristics of individual patients, their motivation and management as well as interpersonal communications. Treatment of the compromised patient and myofunctional therapy is presented. A grade of "C" or better is required to earn credit for this course.

DH 24: Clinical Seminar 1
1.0 unit – 15 hours
This course provides expanded clinical learning experiences through lectures and demonstrations. Items to be introduced are instrumentation using gracey curets and files, air polishing, and management of medical emergencies. Items to be reviewed are principles of instrumentation, sharpening, and ultrasonic scaling. A grade of "C" or better is required to earn credit for this course.

DH 26: Community Oral Health
2.0 units – 30 hours
This course introduces students to the principles and practices of dental public health. Emphasis is placed on the role of the dental hygienist as an innovator of, and an educator in, community health programs. Public health issues will be introduced and thoroughly discussed. A grade of "C" or better is required to earn credit for this course.

DH 30: Periodontics 1
3.0 units – 45 hours
This course includes identification of the normal periodontal and recognition of deviations from normal; the etiology and principles of periodontal diseases, examination procedures, treatment and preventive measures. A grade of "C" or better is required to earn credit for this course.

DH 31: Pharmacology
2.0 units – 45 hours
This course includes the classification and study of drugs according to original, physical and chemical properties and the therapeutic effect and values, particularly of drugs used in dentistry. A grade of "C" or better is required to earn credit for this course.

DH 32: Dental Materials
2.0 units – 30 hours
This course (with DH 132) covers the composition and use of various materials used in dental procedures, and the fundamentals of chairside assisting while using dental materials. The concepts of the entire dental team in performing responsibilities in the care of oral dentition will also be covered. A grade of "C" or better is required to earn credit for this course.

DH 33: Clinic Seminar 2 Advanced Clinical Topics
1.0 unit – 15 hours
This course (in conjunction with DH 133) focuses on soft tissue diagnosis and evaluation. The student will enhance clinical understanding of comprehensive periodontal treatment plans by preparing various treatment plans. Students will learn criteria for use of advanced instrumentation strategies, soft tissue management and post-treatment procedures for use on (or applicable to) periodontal involved cases. A grade of "C" or better is required to earn credit for this course.

DH 42: Clinical Seminar 3
2.0 units – 30 hours
This course provides an expanded exposure to the clinical experience through development of case studies taken from the student’s personal clinical practice. Case studies will be presented in class to fellow students. Occasional guest speakers from the dental specialty fields will provide case presentations as well. A grade of "C" or better is required to earn credit for this course.

DH 45: Nutrition
2.0 units – 30 hours
This course provides the basic principles of nutrition and their relationship to dental health. Students will perform dietary surveys and plan nutritional dietary programs. A grade of "C" or better is required to earn credit for this course.

DH 46: Legal and Ethical Responsibilities
1.0 units – 30 hours
This course looks at the ethical and legal considerations of practice in the field of dental hygiene. Fundamental factors, such as professional responsibility, decision making, and Health Insurance Portability and Accountability Act (HIPAA) of 1996 are addressed. This course covers the regulation of the practice of Dental Hygiene with the focus on the policies of the state dental practice act and the code of ethics of the American Dental Hygienists’ Association. A grade of "C" or better is required to earn credit for this course.

DH 110: Oral Biology Lab
CR – 15 hours
Lab applications: The study of embryology and histology of oral structural formation, clinical recognition of normal oral structures, the physiological and structural functions of teeth and supporting tissues, and oral anatomy relative to proper dental hygiene procedures.

DH 111: Oral Radiology Lab
1.0 unit – 30 hours
This course provides the laboratory and clinical learning experiences to enable the student to distinguish the normal anatomical features of the oral cavity as they appear radiographically. Normal and pathologic conditions, placing film for x-rays, and analyzing the quality of exposed radiographs will be covered.
DH 112: Head and Neck Anatomy Lab
CR - 15 hours
Lab applications: this course covers the anatomical structures of the head and neck regions and relates these structures to the clinical practice of dental hygiene. A grade of “C” or better is required to earn credit for this course.

DH 114: Introduction to Clinic Lab
2.0 units – 120 hours
This course provides an introduction to the clinical procedures and skills needed for Dental Hygiene. A grade of “C” or better is required to earn credit for this course.

DH 120: Local Anesthesia Lab
1.0 unit – 45 hours
This course examines the pharmacology and physiology of local anesthetic agents and their proper use in dental hygiene therapy. The anatomy of the Trigeminal nerve, the physiology of nerve conduction, and the mode of action of local anesthetic agents are to be covered. Prevention and management of emergencies in the dental setting will be reviewed. The theory, rationale, and protocol for nitrous oxide/oxygen administration will be explored. Students will have the opportunity to administer local anesthesia and nitrous oxide/oxygen in the laboratory setting. A grade of “C” or better is required to earn credit for this course.

DH 123: Clinical Practice 1
2.0 units – 120 hours
This course provides beginning experience in the treatment of adults and children utilizing skills of oral inspection, cancer screening, dental and periodontal charting, radiographic technique, plaque control instructions, scaling, polishing, and fluoride application. This course is graded Pass or Fail.

DH 124: Clinical Seminar 1
1.0 unit – 30 hours
Lab Application: This course provides an expanded clinical learning experience through lectures and demonstrations. Items to be introduced are instrumentation using gracey curets and files, air polishing, and management of medical emergencies. Items to be reviewed are principles of instrumentation, sharpening, and ultrasonic scaling. A grade of “C” or better is required to earn credit for this course.

DH 125: Clinical Seminar 2 Lab – Advanced Clinical Topics
1.0 unit - 30 hours
Lab applications: This course focuses on soft tissue diagnosis and evaluation. The student will enhance clinical understanding of comprehensive periodontal treatment plans by preparing various treatment plans. Students will learn criteria for use of advanced instrumentation strategies, soft tissue management and post treatment procedures for us (or applicable to) periodontal involved cases.

DH 132: Dental Hygiene Board Exam Review Seminar 1
CR – As needed
This course focuses on review for the Dental Hygiene Board Exam. Patient selection, case management, and techniques introduced in earlier courses. This course is graded Pass or Fail.

DH 134: Clinical Practice 2
3.0 units – 180 hours
This course provides the beginning learner experiences in the treatment of dental hygiene patients by expanding on the procedures and techniques introduced in earlier courses. This course is graded Pass or Fail.

DH 143: Clinical Practice 3
4.0 units – 240 hours
This course provides students with the opportunity to become competent in the clinical skills learned and practiced in previous clinical courses and to prepare them for success on their state and national board examinations.

DH 399: Dental Hygiene Review Seminar 1
CR – 30 hours
This course presents an overview of all dental hygiene theory for the purpose of National Board Exam review. This course is not graded and does not receive credit.

DH 499: Dental Hygiene Review Seminar 2
1.0 unit – 30 hours
This course presents an overview of all dental hygiene theory for the purpose of National Board Exam review. Professional development and employment skills including resume writing, interview techniques, and personalized job search planning will be covered in this class. The final grade in this class includes projects and assignments related to professional development and employment skills. A grade of “C” or better is required to earn credit for this course.

DH 601: Dental Hygiene Review Seminar 2
CR – As needed
This course focuses on review for the Dental Hygiene National Board Exam. Students will be required to complete some of the course through self-study and completion of assignments, pre and post-tests. This course is not a requirement for obtaining a degree in dental hygiene. This course is graded Pass or Fail.

DH 602: Dental Hygiene Clinical Experience
CR – As needed
This course focuses on the clinical skills to be utilized during the State Dental Hygiene Exam. Patient selection, case management, and clinical practice will be covered. Students may use approved extramural dental sites for their clinical portion of the class. Enrollment in this course is required for students to continue their clinical experience until the time of the California State Dental Hygiene Board Examination. Upon passing the California State Dental Hygiene Board Examination or showing satisfactory performance in the clinical setting, students will receive a passing grade. Enrollment in DH 602 may be extended through two
additional California Dental Hygiene Board Examinations. This course is not a requirement for obtaining a degree in dental hygiene. This course is graded Pass or Fail.

DMS 200: Orientation to Ultrasound Imaging Seminar
Pass/Fail – 8 hours
This instructional seminar is a prerequisite to the DMS program. This seminar provides an overview of the scope and content of the DMS program. It focuses upon the elementary operational principles of diagnostic medical ultrasound, basic ultrasound terminology specific to the profession, anatomic imaging planes and body directions used in ultrasound imaging, and the image orientation on the ultrasound display. A grade of "C" or better is required to earn credit for this course.

DMS 210: Abdominal and Small Parts Ultrasound Imaging
6.0 units – 96 hours
This course covers the aspects of abdominal and small parts ultrasound scanning required for employment as an entry-level sonographer. Emphasis is placed upon basic anatomy and physiology, normal and abnormal ultrasound appearances of the organs of the abdominal cavity, retroperitoneum, breast, thyroid, parathyroid, prostate, and testes. The student will develop competency in assessing the ultrasonic appearance of normal versus abnormal images through the use of PowerPoint slides and studies. Clinical indications for ultrasound examination of the abdomen and small parts, and differential diagnoses will also be presented and considered. DMS 210 must be taken concurrently with DMS 210L. A grade of "C" or better is required to earn credit for this course.

DMS 210L: Abdominal and Small Parts Ultrasound Imaging Laboratory
5.0 units – 150 hours
This course focuses on the application of generally accepted scanning techniques and protocols utilized for ultrasound examination of the abdomen, related structures, and small parts. This course includes instruction and demonstration related to patient preparation and positioning employed to achieve optimum ultrasound images. Proper identification and representation of normal and abnormal anatomy is stressed. Laboratory demonstrations and scanning exercises coincide with DMS 210 to integrate and reinforce understanding of the didactic and hands on elements in sonographic evaluation of the abdomen and small parts. DMS 210L must be taken concurrently with DMS 210. A grade of "C" or better is required to earn credit for this course.

DMS 215: Fundamentals of Sonography
1.0 unit – 15 hours
This course provides a broad overview of the field of diagnostic medical sonography. It covers the history and evolution of ultrasound as an imaging modality, the sonographer's role, required skills and abilities, and effective learning techniques. The student will learn causes of ergonomic injuries, how to prevent them, and causes of sonographer stress. Students will also discuss the different imaging modalities within the radiology department and their value in providing diagnostic information. A grade of "C" or better is required to earn credit for this course.

DMS 220: Obstetrics and Gynecology Ultrasound Imaging
6.0 units – 96 hours
This course is an in-depth study of the normal and abnormal conditions that affect the reproductive organs of the female pelvic cavity and the developing fetus, including cross-sectional anatomy, physiology, pathology, and pathophysiology. Emphasis is placed upon ultrasonic identification and assessment of the normal and pathological conditions of the uterus, ovaries and fetus. The sonographer's role in determining fetal biometry measurements, age, weight, and well-being is covered. Clinical indications and differential diagnoses for OB/GYN ultrasound examinations are also discussed. DMS 220 must be taken concurrently with DMS 220L. A grade of "C" or better is required to earn credit for this course.

DMS 220L: Obstetrics and Gynecology Ultrasound Imaging Laboratory
5.0 units – 150 hours
Students learn proper scanning techniques and protocols used in ultrasound imaging of the gynecologic and obstetric patient. Emphasis is placed on recognition of normal versus abnormal anatomy, optimization of ultrasonic images, ultrasound documentation of findings, biometry measurements, and preparation of initial preliminary reports to the interpreting physician. Demonstration and instruction in patient preparation and patient positioning techniques are also included. DMS 220 didactic instruction and laboratory instruction coincide to reinforce and integrate theory and hands on scanning skills. DMS 220L must be taken concurrently with DMS 220. A grade of "C" or better is required to earn credit for this course.

DMS 225: Patient Care for Sonographers
3.0 units – 52 hours
This course presents the student with different aspects of patient care that are relevant to the sonographer. Focus is placed on patient/sonographer interaction, patient confidentiality and HIPAA compliance, sonographic positioning techniques, history taking, patient preparation for different ultrasound examinations, vital signs, body mechanics for patient transfer, techniques utilized for patients with tubing, standard precautions for infection control, aseptic/sterile technique, isolation techniques, emergency medical situations, caring for special needs patients, and communications with patients and other health care professionals. CPR/BLS training for the health care professional will be included. A grade of "C" or better is required to earn credit for this course.

DMS 230: Introduction to Vascular Ultrasound Imaging
6.0 units – 96 hours
This introductory course in vascular ultrasound introduces the student to the hemodynamic considerations of the arterial and venous vascular systems. Also covered are the principles and techniques of spectral analysis, waveform analysis and interpretation, Color Doppler, and Power Doppler. The course focuses on the anatomy and physiology of the arterial and venous systems of the body, and the pathologies commonly encountered in those systems. The student will develop competency in assessing the ultrasonic appearance of normal versus abnormal images through the use of PowerPoint slides and studies. Emphasis will be placed on
types of vascular ultrasound examinations most commonly ordered, the clinical indications for various types of vascular duplex examinations, differentiation of normal versus abnormal conditions, and interpretation of ultrasound findings. DMS 230 must be taken concurrently with DMS 230L. A grade of “C” or better is required to earn credit for this course.

DMS 230L: Introduction to Vascular Ultrasound Imaging Laboratory
5.0 units – 150 hours
Students will learn standard ultrasound imaging techniques and protocols for duplex examination of the most commonly ordered vascular ultrasound studies. Focus is placed on duplex ultrasound examinations of the carotid arteries, upper and lower extremity arteries, upper and lower extremity veins, and abdominal vessels. The course is designed to prepare the student to perform the most common vascular ultrasound studies that may be required of the general sonographer. DMS 230 didactic instruction and laboratory instruction approximately coincide to integrate and reinforce theory and hands on scanning skills. DMS 230L must be taken concurrently with DMS 230. A grade of “C” or better is required to earn credit for this course.

DMS 235: Professional Aspects of Sonography
1.0 unit – 15 hours
The aspects of sonography as a career will be examined in this course. Topics of discussion include sonography career ladder opportunities, benefits of professional organizations, certification and registration advantages, medical ethics and legal aspects of sonography, professional behavior, sonographer employment venues, resume writing and interview techniques. A grade of “C” or better is required to earn credit for this course.

DMS 240: Physical Principles & Instrumentation of Ultrasound
6.0 units – 96 hours
This course provides a firm foundation in the basic physical principles of ultrasound and the instrumentation relating to the ultrasound unit. Coursework includes the basic acoustic principles of ultrasound, propagation of ultrasound in tissue, the physics of pulsed ultrasound, Doppler principles, the components of the ultrasound imaging instrument, common artifacts in imaging, quality assurance, bio-effects, and safety in operation of the ultrasound imaging system. DMS 240 must be taken concurrently with DMS 420L. A grade of “C” or better is required to earn credit for this course.

DMS 240L: Physical Principles & Instrumentation of Ultrasound Laboratory
5.0 units – 150 hours
This course emphasizes operation of the instrumentation controls required for optimum operation of the ultrasound imaging instrument. Students are provided with hands on instruction in equipment operation and adjustment of gray scale and Doppler controls required for the production of ultrasound images. Maintenance of the ultrasound scanning unit and patient safety considerations in equipment operation are also covered. DMS 240 didactic instruction and laboratory instruction approximately coincide to integrate and reinforce theory and hands on scanning and equipment operation skills. DMS 240L must be taken concurrently with DMS 240. A grade of “C” or better is required to earn credit for this course.

DMS 250: Clinical Practicum I
10.0 units – 480 hours
During this course, the student will be assigned and directly supervised in a Diagnostic Medical Ultrasound imaging facility such as a hospital, clinic or imaging center. The student will begin to acquire the hands-on skills necessary for the sonographer in a clinical site. This is accomplished through both observation of and participation in clinical case studies of patients undergoing ultrasound examinations. The student will be assessed on supervised clinical practice and completion of clinical assignments and task based performance objectives. A grade of “C” or better is required to earn credit for this course.

DMS 260: Clinical Practicum II
10.0 units – 480 hours
This course is designed as a more advanced continuation of Clinical Practicum I. The student will continue to perfect scanning skills in the clinical environment and to learn more advanced imaging techniques, protocols, and procedures required of the sonographer. The student will gain more experience in performing various ultrasound imaging of the patient undergoing abdominal, small parts, gynecologic, obstetric, or vascular ultrasound examinations. The student will be assessed on supervised clinical practice and completion of clinical assignments and task based performance objectives. A grade of “C” or better is required to earn credit for this course.

DMS 300: ARDMS Certifying Examination Review
1.0 unit – 20 hours
This course covers the application process and content specific outline information for the ARDMS Sonography Principles and Instrumentation examination, the Abdomen specialty examination, and the Obstetrics and Gynecology specialty examination. Registry examination preparation techniques and strategies for achievement of successful examination outcomes are included. Administration of mock examinations will enable the student to identify specific strengths and weaknesses in subject matter in order to self-correct and improve performance on the ARDMS examinations. Guidance and direction toward additional registry preparation tools and resources are provided. A grade of “C” or better is required to earn credit for this course.

ECON 1: Economics
3.0 units – 45 hours
This course provides a general introduction and overview of economics and the role economics plays in society today. Topics in the course include taxes, the roles of supply and demand, elasticity, productivity, GDP, unemployment, competitive pricing, and the role of money in the economy. Students will discuss the impact these topics have on our economy and society. Students will understand and illustrate how each person’s daily decisions affect the economy.
ENG 121: Composition and Reading – Part A
3.0 units – 45 hours
This is the first in a 2-part college level English course. In this course, students will learn the foundation of critically reading and writing in a variety of rhetorical modes. Students will read various essays and literature, and apply critical analysis to their own writing. Students will practice all aspects of the writing process, and by the end of Part B, they will meet a goal of writing a minimum of 6000 words through a variety of assignments.

ENG 122: Composition and Reading – Part B
3.0 units – 45 hours
This course is the second portion of our college level English course. By building on the skills learned in Part A, students will continue to critically read and write in a variety of rhetorical modes. Students will read various essays and literature, and apply critical analysis to their own writing. In this course they will build information literacy skills through research, and describe the connection between effective communication and professionalism. Students will complete their goal of writing a minimum of 6000 words.

HCM 40: Medical Insurance Principles
5.0 units – 90 hours
This course covers career role and responsibilities of an insurance business billing specialist. Topics and subjects include: the basics of health insurance; CPT (procedural coding), ICD-9-CM (diagnostic coding), and HCPCS Level II Codes. This course also includes health care payers and managed care systems. Special plans which include Medicaid and other state programs, Medicare, TriCare, worker’s compensation, and disability income insurance along with its benefits. Other topics include employment opportunities as an insurance billing specialist.

HCM 102: CPT, HCPCS, and ICD Coding
5.0 units – 90 hours
Students will learn coding concepts associated with the Current Procedural Terminology manual and the HCPCS code book. The Evaluation and Management, Anesthesia, Surgery, Radiology, Pathology/Laboratory, and Medicine sections will be covered with emphasis on Section Guidelines and proper code selection. The student will also cover 3 volumes from the International Classification of Diseases and Clinical Modification codebook. This will prepare the student to code medical diagnoses accurately for proper reimbursement of payments for services rendered by the medical provider.

HCM 103: Health Care Management
5.0 units – 90 hours
In this course students will learn fundamental office procedures applied to health care administration. Students will study principles and techniques used in executing common office procedures such as answering the telephone, recognizing and preparing for medical office emergencies, scheduling, medical record keeping and charting, bookkeeping, and banking procedures. Students will discover the use of computer software for completing administrative tasks involving insurance billing, records management, and practice management.

HCM 105: Hospital Billing and Legal Issues in Insurance
5.0 units – 90 hours
This course is designed to introduce the student to the basics of hospital billing and correct completion of the UB-04 claim form through a practical, focused approach. Students will also learn and respond to patient right to privacy laws, collection procedures, medical ethics and legal ramifications as they relate to health care insurance procedures.

HCP 101: Structural Anatomy and Terminology
3.0 units – 45 hours
The course focuses on the foundational principles of structural body systems, such as the skeletal, muscular, and nervous systems, and common diseases and disorders related to these systems. The course emphasizes the effective use of medical terminology through the study of the principles of word construction, elements, abbreviations, and symbols with emphasis on spelling and pronunciation.

HCP 102: Body System Anatomy and Terminology
3.0 units – 45 hours
The course examines the foundational principles of internal body systems, such as the digestive, reproductive and cardiovascular systems, and common diseases and disorders related to these systems. The course emphasizes the effective use of medical terminology through the study of the principles of word construction, elements, abbreviations, and symbols with emphasis on spelling and pronunciation.

HCP 103: Foundational Office Skills
2.0 units – 45 hours
This course presents the fundamental administrative and communication skills needed to work in a medical facility. The student will build a foundation in medical coding, medical law and ethics, HIPAA regulations, as well as insurance plans and forms. Students will practice using electronic medical software. Keyboarding skills are also emphasized in this course.

HCP 201: Diseases and Disorders
3.0 units – 45 hours
In the course students will apply their basic knowledge of anatomy and physiology to a deeper examination of diseases, disorders, etiology, pathology, diagnostic testing, and common treatments of structural body systems. The course emphasizes applying medical terminology to situations in medical professions.

HCP 202: Microsoft Office for Health Care Professionals
3.0 units – 45 hours
Using medical office setting scenarios, students will use the various software applications in the Microsoft Office Suite. They will build professional documents, presentations using Word, Excel and PowerPoint, and practice managing email, schedules, tasks and contacts using MS Outlook.
HCP 203: Medical Office Management
3.0 units – 45 hours
Adding to the fundamental administrative and communication skills needed to work in a medical office, student will distinguish the skills needed to manage a medical office. They will analyze legal and ethical scenarios, discuss how to care for patients with special needs, and how to provide excellent customer service. Students will identify the responsibilities that come with managing an office, and practice the professional behavior needed required in the healthcare setting.

HEA 10: Health and Wellness
3.0 units – 45 hours
This course is designed to promote desirable health attitudes and practices. Students will examine the various dimensions of health, which include physical, psychological, social, and environmental health. Students will also review a variety of health related topics, including stress, nutrition, fitness, sexuality, disease, and drug use and abuse, and evaluate healthy lifestyle choices in their own lives.

HR 100: Human Resource Management and Administration
2.0 units – 45 hours
This course will provide an overview of the tasks and responsibilities associated with the administration of human resources in the business environment. Topics include: recruitment, selection, and hiring practices, legal and regulatory factors, employee and labor relations, and compensation and benefits. This course addresses diversity and equal employment opportunity, sexual harassment, discrimination, employee handbooks, employee privacy, performance management and appraisal, and issues related to worker’s compensation and investigation.

HR 155: Human Resource Management and Administration
5.0 units – 90 hours
This course will provide an overview of the tasks and responsibilities associated with the administration of human resources in the business environment. Topics include: recruitment, selection, and hiring practices; legal and regulatory factors; employee and labor relations; and compensation and benefits. This course addresses diversity and equal employment opportunity, sexual harassment, discrimination, employee handbooks, employee privacy, performance management and appraisal, and issues related to worker’s compensation and investigation.

HRA 21: Human Resource Fundamentals
5.0 units – 90 hours
This course introduces the fundamentals of staffing and personnel decisions. It incorporates concepts of diversity and Equal Employment Opportunity into strategic human resource planning and management. Students will analyze and evaluate job components, recruitment, selection, retention, and placement of employees. Students will also learn the essentials of benefits and compensation management. Topics include the basics of compensation determination, job analysis and evaluation, pay structure designs, employee benefits and administration, control of compensation, and an overview of the types of HRMS/HRIS software.

HRA 22: Regulations and Laws Affecting Human Resources
5.0 units – 90 hours
This course will provide an overview of the regulatory environment of the human resource professional. Students will investigate and discuss employment relationships, employee privacy topics, and wage and hour law issues. By defining Title VII of the Civil Rights Act, as well as other Equal Employment Opportunity Commission (EEOC) regulations, students will be able to evaluate employer responsibilities and the variety of situational applications that involve human resources management.

HRA 23: Accounting and Payroll Management
5.0 units – 90 hours
The fundamentals of payroll, basic bookkeeping, and accounting are covered in this course. Students will investigate and discuss the need for and the requirements of the laws affecting payroll and personnel records. They will be introduced to accounting concepts and practices and will utilize a computerized payroll system to perform various HR functions. Activities include computing wages; working with social security, income, and unemployment compensation taxes; posting, verifying, and adjusting transactions; creating financial statements; and performing period-end closings.

HRA 24: Ethics in Human Resources
5.0 units – 90 hours
In this course, students will apply ethical theory to business situations and practices. Students will describe the roles of corporate culture and leadership in a social and global economy, as well as discuss legislation regulating employer and employee rights and responsibilities. Students will analyze ethical situations and develop solutions needed by Human Resource Administrators.

HRA 25: Workforce Analysis, Planning, and Staffing
3.0 units – 45 hours
This course introduces the fundamentals of staffing and personnel decisions. It incorporates concepts of diversity and Equal Employment Opportunity into strategic human resource planning and management. Students will analyze and evaluate job components, recruitment, selection, retention, and placement of employees.

HRA 26: Workforce Training, Managing, and Safeguarding
3.0 units – 45 hours
This course continues the development of staffing and personnel decision-making skills. Students will gain skills needed to train and develop employees. They will practice performance appraisals, describe due process procedures, as well as define regulations that ensure organizational safety.

HRA 31: Labor Laws: Employee Rights
3.0 units – 45 hours
This course will provide an overview of the regulatory environment of the human resource professional. Specifically addressed are the effect and impact on employers of Federal and California State regulations dealing with employee rights, including employment-at-will, employee handbooks, employee privacy issues, wage related issues, safety and health issues, and labor relations.
HRA 32: Labor Laws: Equal Employment Opportunity
3.0 units – 45 hours
This course provides an overview of the regulatory environment of the human resource professional. By defining Title VII of the Civil Rights Act as well as other Equal Employment Opportunity Commission (EEOC) and Fair Employment Housing (FEHA) regulations, students will be able to evaluate employer responsibilities in a variety of situational applications.

HRA 42: Payroll Management
3.0 units – 45 hours
The fundamentals of payroll are covered in this course. The focus is on payroll and personnel records, computing and paying wages and salaries, social security taxes, income tax withholding, and unemployment compensation taxes.

HRA 56: Benefits and Compensation Management
3.0 units – 45 hours
Students will learn the essentials of benefits and compensation management. Topics include the basics of compensation determination, job analysis and evaluation, pay structure designs, employee benefits and administration, control of compensation, and an overview of the types of HRMS/HRIS software.

HRA 400: HRA Capstone
3.0 units – 45 hours
This course is designed to give students practical experience and opportunity to apply their human resource (HR) administration skills within simulated circumstances. Students will problem solve HR situations, analyze case studies, interpret labor laws, facilitate employee interviews and plan employee development and orientation.

HTH 103: Human Relations and Health Care
3.0 units – 45 hours
This course focuses on the role of the health care professional in real life situations relating to a variety of patients. The interactive skills necessary for dealing with individual differences, personalities, and socioeconomic factors are emphasized. The course includes an overview of legal and ethical problems within the health care professions. Conflict resolution is also covered in this course. Students will participate in discussion of customer service, human relations and professional behavior applications throughout this course.

HTH 107: Anatomy/Physiology and Medical Terminology
6.0 units - 90 hours
In this course students will learn the fundamental principles of human body systems, their structure and functions, and the common diseases, symptoms, etiologies, treatments, and diagnostic testing of common diseases. Students will study the principles of word construction and word analysis of medical terminology associated with various medical specialties including word elements, abbreviations, and symbols with emphasis on spelling and pronunciation. Students will be introduced to fundamental clinical skills such as obtaining and recording vital signs.

HTH 500: 180 hour Externship and Professional Experience
4.0 units – 180 hours
Students will apply their acquired skills and knowledge in taking on the responsibilities and duties of an extern trainee in a practical setting under direct supervision of the Physician, PA, NP, RN, LVN, or office manager. Maintaining SJVC expected professionalism, proper policy and protocol along with upholding the state and federal law at all times is essential. The teaching/learning facility will provide appropriate supervision and evaluation of student performance under the direction of Extern/Clinical Coordinator. The grade earned in this course is Pass/Fail.

Passing this course is a graduation requirement.

HVAC-R 100: Theory & Applications of Air Conditioning
5.0 units – 90 hours
This course introduces, discusses, and demonstrates the practical applications of the physical properties of air (psychometrics), blueprint, interpretation, floor plan layout, calculating building heat loads, air distribution systems, types of air conditioning equipment and systems, codes, and installations. This course also introduces various heating systems and EPA, Section 608.

HVAC-R 101: Theory & Applications of Refrigeration
5.0 units – 90 hours
This course introduces, discusses, and practices the physical laws of matter, heat transfer, gas laws and equations, pressure and temperature conversions, refrigerants and refrigerant recovery-recycle-reclaim methods and equipment. The refrigeration cycle, basic refrigerating systems and applications, codes, installation, safety practices, and EPA information are topics covered in this course. This course discusses and applies the principles of theory and fundamentals to problem analysis and diagnostics for residential, light commercial, and commercial refrigeration systems. Students will practice the basics of brazing.

HVAC-R 102: Theory & Applications of Electricity
10.0 units – 180 hours
This course introduces, discusses and applies electron flow theory, magnetism, electrical generation and power distribution, conductors, insulators, fuses, DC and AC electricity and circuits, motors and motor circuits, air conditioning and refrigerating system components and circuits. This course identifies and discusses the control devices used in refrigeration and air conditioning systems, practices electrical drafting skills, interpretation of pictorial and ladder wiring diagrams, and problem analysis, using various diagnostic techniques for domestic and light-commercial ventilation, refrigeration, and air conditioning systems.

HVAC-R 103: Advanced Air Conditioning
5.0 units - 90 hours
This course applies pictorial and schematic wiring diagrams, interpretation and various techniques for problem analysis and troubleshooting of air conditioning and heating units. Students will work with gas and propane furnaces, refrigerant recovery/recycle practices, proper evacuation procedures, major component replacement and brazing techniques, leak testing methods system charging procedures, system performance analysis, problem analysis,
diagnostics and repair procedures for heating and air conditioning systems including heat pumps. In addition, this course prepares the students for HVAC-R industry certification.

**HVAC-R 104: Advanced Refrigeration**  
*5.0 units — 90 hours*  
This course applies the principles of theory and fundamentals to problem analysis, diagnostics, and repair of light commercial refrigeration systems. Students will describe typical commercial refrigeration problems and the possible factors that make the problems occur. Both self-contained and remote refrigeration systems are analyzed under proper performance and typical running conditions and compared to systems with air-flow problems, undercharge conditions, overcharge conditions and box temperature controls (both pressure and temperature) along with system safety switches and flow controls. In addition, this course prepares students for HVAC-R industry certification.

**HVAC-R 105: Advanced Electricity**  
*5.0 units — 90 hours*  
This course applies pictorial and schematic wiring diagrams, interpretation, problem analysis and the application of diagnostic troubleshooting techniques for domestic and light commercial refrigeration and air conditioning circuits.

**HVAC-R 106: Air Distribution Systems**  
*5.0 units — 90 hours*  
This course identifies and discussed the diagnostic and analysis of residential and light commercial air distribution issues. Students will take basic air pressure measurements measuring air quantities and be able to identify and describe all different types of air-measuring devices. Students will be able to determine adequate duct sizing and placement to properly condition a given space. In addition, this course prepares the students for HVAC-R industry certification.

**ICS 2: Intermediate Computer Skills 2**  
*2.0 units — 45 hours*  
This course focuses on database concepts using Microsoft Access. Students will be tested for skill competency on a regular basis. Keyboarding skills are part of each class session. Students will participate in timed keyboarding skill tests.

**IT 101: Industrial Electricity**  
*10.0 units — 180 hours*  
This seven-part course discusses the elements and applications of electricity that are common to any industrial facility. In strict accordance with the National Electric Code, this course will introduce students to electrical theory with an emphasis in those energy sources developed for commercial and manufacturing use.

**IT 110: Power Transmission**  
*5.0 units — 90 hours*  
This course includes the operation, maintenance, safety, and troubleshooting of machinery, industrial bearings, industrial drive gears and gear systems, shaft joining and coupling devices.

**IT 120: Fluid Power**  
*5.0 units — 90 hours*  
This course presents basic concepts and operation of fluid power, demonstrating knowledge in maintenance, safety, and troubleshooting. Students will perform fluid power operation in the use of hydraulic power systems, symbols and schematic interpretation, industrial hydraulics, pressure control valves, directional control valves, check valves, flow control valves, actuators, pumps, oil conditioners and measuring instruments.

**IT 201: Programmable Logic Controllers**  
*10.0 units — 180 hours*  
This course presents basic concepts and applications of PLC’s such as the PLC language, performing installation and diagnostic functions, using program tools, basic communications and logic operations. The practical instruction of this course is performed with Allen Bradley equipment and RSLogix software, both of which are predominantly used within the manufacturing industry.

**MAP 105: Laboratory Procedures**  
*5.0 units — 90 hours*  
Students will be introduced to a variety of CLIA waived and Pint of Care (POC) laboratory techniques and values including venipuncture, skin puncture, and various hematology tests. Students will be trained in CPR and First Aid. A grade of “C” or better is required to earn credit for this course.

**MAP 115: Pharmacology and Medication Administration**  
*5.0 units — 90 hours*  
Students will be introduced to injections and a variety of clinical procedures including basic pharmacology, immunizations, and apply a variety of medication administration techniques. Students will calculate medication dosages and complete appropriate documentation. A grade of “C” or better is required to earn credit for this course.

**MAP 125: Clinical Procedures**  
*3.0 units — 45 hours*  
In this course students will discuss the role of the medical assistant in a clinical setting. Students demonstrate non-invasive procedures such as electrocardiograms and vital signs. They will prepare exam rooms, exam trays, and apply sterile techniques. They will discuss blood-borne pathogen guidelines for a safe medical office. A grade of “C” or better is required to earn credit for this course.

**MAP 205: Front Office Procedures**  
*2.0 units — 45 hours*  
In this course, students will bring together all the skills needed in the front office. They will use appropriate coding terminology, use medical office software, and demonstrate the administrative tasks they will likely be doing in a medical office.

**MAP 215: Back Office Procedures**  
*2.0 units — 45 hours*  
In this course students will bring together all the skills needed in the back office. They will demonstrate various comprehensive laboratory and clinical procedures. Students will apply techniques to assist with...
various patient exams. A grade of "C" or better is required to earn credit for this course.

MAP 225: Certification Preparedness
3.0 units – 45 hours
In this course, students will assess their performance and application of acquired skills and knowledge in general, administrative, and clinical categories. They will also learn study skills needed for the certification exam.

MAP 500: Externship
4.0 units – 180 hours
Students will apply their acquired skills and knowledge in taking on the responsibilities and duties of an extern trainee in a practical setting under direct supervision of the Physician, PA, NP RN, LVN, or office manager. Maintaining SJVC expected professionalism, proper policy and protocol along with upholding the state and federal law at all times is essential. The teaching/learning facility will provide appropriate supervision and evaluation of student performance under the direction of Extern/ Clinical Coordinator. The grade earned in this course is Pass/Fail. Passing this course is a graduation requirement.

MBC 105: Body Systems and Pathology
3.0 units – 45 hours
The course focuses on basic knowledge of anatomy and physiology to a deeper examination of diseases, disorders, etiology, pathology, diagnostic testing, and common treatments of internal body systems. The course emphasizes applying medical terminology to situations in medical professions.

MBC 125: CPT Coding
3.0 units – 45 hours

MBC 210: Medical Coding Practicum
3.0 units - 45 hours
Students will study various methodologies for successfully completing the CPC examination. The development of a personalized plan for CPC exam preparation will be completed. In this course students will apply the knowledge gained throughout the program to prepare for the certification exam and career. Students will practice answering exam questions as well as have hands-on lab time to solidify essential skills. Students will also reflect on how to prevent test anxiety and practice test preparation techniques. The course is designed to teach test taking strategies, assess knowledge needed and psychological approaches for successfully passing the exam.

MBC 220: Medical Coding Seminar
1.0 unit – 15 hours
Students will study various methodologies for successfully completing CPC examination. The development of a personalized study plan for CPC exam preparation will be completed.

MBC 230: Medical Billing Practicum
3.0 units – 45 hours
Students will study various methodologies for successfully completing the CPB examination. In this course students will apply the knowledge gained throughout the program to prepare for the examination and career. Students will practice answering exam questions as well as have hands-on lab time to solidify essential skills. Students will also reflect on how to prevent test anxiety and practice test preparation techniques. The course is designed to teach test taking strategies, assess knowledge needed and psychological approaches for successfully passing the exam.

MBC 240: Medical Billing Seminar
1.0 unit – 15 hours
In this course students will study various methodologies for successfully completing CPB examination. The development of a personalized study plan for CPB exam preparation will be completed.

MCA 103 Clinical Applications
4.0 units - 90 hours
This course focuses on initial patient assessment and fundamental pre-clinical skills such as sterile technique, OSHA regulations, and equipment operation and maintenance. Skills learned include CPR/BLS, First Aid, taking and recording vital signs, emergency procedures, basic instrument identification, sanitization, disinfecting, sterilizing, and autoclaving.

MGT 104: Office Supervision and Organization
3.0 units – 45 hours
This course emphasizes functional office practices necessary in the operation of any business. Students will examine the manager's environment including social responsibility, law and ethics, efficient business organization, and human resources management. Other topics covered include an introduction and overview of office operations, an overview of typical business structure, day-to-day operations and procedures, and information systems.

MGT 110: Career Development
3.0 units – 45 hours
This course helps to prepare the online student with certain skills that are useful for the job search as well as for career development. Professional development and employment skills are the focus and topics covered include resume and professional letter writing, interview techniques, and conducting the job search through the internet. In addition, planning strategies and resources are also examined with an emphasis on maximizing career advancement potential and long-term professional growth. Students will complete assignments, projects, exams, and a final portfolio that emphasize career development and employment skills.
MOP 110: Medical Insurance Principles
5.0 units — 90 hours
In this course students will learn the fundamental administrative and communication skills needed to work in a medical office. They will discuss medical coding, medical law and ethics, as well as insurance plans and forms. Students will practice using electronic medical software, and learn basics of CPT and ICD coding. Students will be trained in CPR and First Aid, and will also improve keyboarding skills as a part of this course.

MOP 120: CPT/HCPCS Coding
3.0 units — 45 hours
Students will learn coding concepts associated with the Current Procedural Terminology manual and the HCPCS code book. The Evaluation and Management, Anesthesia, Surgery Radiology, Pathology/Laboratory and Medicine sections are covered with emphasis on section guidelines and proper code selection. Students will also improve keyboarding skills while in this course.

MOP 130: Billing Principles
2.0 units — 45 hours
Students will learn the procedures for billing in both hospital and clinical settings. They will identify the variety of source documents billing uses, compare and complete the forms used in hospitals and offices, analyze the revenue cycles, and apply the correct codes to the different venues.

MOP 140: ICD Coding
3.0 units — 45 hours
Students will learn coding concepts associated with the three volumes of the International Classification of Diseases (9th edition) and Clinical Modification codebook. Students will practice using terminology, following documentation guidelines and applying codes to various forms and documents. Students will improve keyboarding skills while in this course.

MOP 210: Medical Office Principles
2.0 units — 45 hours
Students will learn basic bookkeeping and accounting procedures. They will practice the effective communication and documentation skills required in the medical office.

MOP 220: Medical Office Capstone
2.0 units — 45 hours
In this capstone course, students will apply coding and medical billing skills learned throughout the program to a variety of scenarios and situations. They will make decisions, process claims, interpret source documents, use critical thinking skills, and handle difficult situations as professionals.

MOP 500: Externship
3.0 units — 135 hours
Students will utilize their skills and knowledge by working in a medical office, hospital, billing office, or insurance company under direct supervision of the professional office manager or medical director. Students are required to turn in completed hours and evaluations, and the grade earned in this course is Pass/Fail. Passing this course is a graduation requirement.

MOP 510: Externship Seminar
1.0 units — 15 hours
In this course students will assess their performance and application of acquired skills and knowledge. They will learn skills to prepare for the certification exam and practice professional behavior.

MTH 121: College Algebra — Part A
3.0 units — 45 hours
This course integrates technology with mathematics through the use of online learning resources, and covers the fundamentals and terminology of algebra. Topics include real numbers, complex numbers, order of operations, ratios/proportions, single and multiple step linear equations and inequalities, use of formulas, algebraic expressions, polynomials, systems of equations, graphing and quadratic equations. Students will utilize the metric and U.S. standard systems, and scientific notation. The fundamentals and terminology of geometry, including geometric shapes and the Pythagorean Theorem, will be provided. This course offers hands-on applications that allow students to relate to and to apply concepts to their field of study.

MTH 122: College Algebra — Part B
3.0 units — 45 hours
This course integrates technology with mathematics through the use of online learning resources, and covers the fundamentals and terminology of algebra. Topics include use of formulas, algebraic expressions, polynomials, systems of equations, exponential and logarithmic expressions and quadratic equations. Students will utilize rational and radical expressions, conics and functions. This course offers hands-on applications that allow students to relate to and to apply concepts to their field of study.

NSC 1: Introduction to the Natural Sciences
3.0 units — 45 hours
This course presents an overview of the basic concepts of the natural sciences, emphasizing biology, chemistry, physical, earth and space science. These concepts are taught both as a technical foundation and from a historical perspective. The subject matter is integrated into lecture discussions covering the environment, ecology, and the relevance of natural science to human affairs. Subjects discussed include current and relevant social, scientific and economic issues. Special projects and activities may be required.

PHIL 1C: Ethics
3.0 units — 45 hours
This course provides an introduction to the ethical problems and issues in modern society. Students will discuss current events related to ethical issues and participate in group discussions.

PHR 15: Pharmacy Science and Applications 2
5.0 units — 90 hours
This course emphasizes the theory of anatomy, physiology, pathophysiology, and related pharmacology of the urinary, circulatory, and respiratory systems. Lab applications involving drug
information retrieval and prescription processing serve to reinforce theory of pharmacological effects and mechanisms of action for urinary, circulatory, and respiratory system agents. Also presented in this course are procedures for the generation and maintenance of accurate pharmacy records, insurance claims and the use of pharmacy reference materials. Computerized pharmacy systems are utilized. Emphasis is placed on the importance of diligence in documentation and related issues of potential liability. Employment Services Seminar in this course includes an overview of the role of the pharmacy technician in the professional environment, employment opportunities and National Certification. Keyboarding skills are also an integral component of this course. A grade of “C” or better is required to earn credit for this course.

**PHR 20: Pharmacy Law and Ethics**
3.0 units – 45 hours
This course presents an overview of the history of the pharmacy as well as the duties and responsibilities of a pharmacist and the State and Federal laws governing pharmacy practice, standards and regulations. This course includes HIPAA (Health Insurance Portability and Accountability Act) statutes, regulations, and preparation for certification. Current ethical issues in pharmacology will be discussed. A grade of “C” or better is required to earn credit for this course.

**PHR 21: Pharmacology**
2.0 units – 30 hours
This course will study the drugs administered to treat pulmonary disease. It will also include other classifications of drugs that have an effect on cardiopulmonary status. Areas will include drug calculations, indications, classification, proper dosage, modes of administration, the physiological actions of pharmacokinetics, pharmacodynamics, and pharmacogenetics, side effects, precautions, hazards, therapeutic effects and patient monitoring. A grade of “C” or better is required to earn credit for this course.

**PHR 25: Pharmacy Records & Documentation**
3.0 units – 45 hours
This course focuses on enhancing the skills to properly interpret, fill and label prescription orders. An emphasis of this course is to train students to properly maintain and document pharmacy records. Students will be introduced to the duties of inventory control in a pharmacy practice and explore legal parameters of dispensing medications. A grade of “C” or better is required to earn credit for this course.

**PHR 30: Pharmacy Math and Computations**
3.0 units – 45 hours
This course covers mathematical calculations involving fractions, decimals, ratios, and percentages including both the metric and apothecary systems. This course will utilize these learned mathematical skills during pharmaceutical applications which are required to determine medication dosages and preparations. Also covered in this course will be the business practices in a retail pharmacy. A grade of “C” or better is required to earn credit for this course.

**PHR 100: Pharmacy Science and Applications 1**
5.0 units – 90 hours
This course emphasizes the theory of anatomy, physiology, pathophysiology, and related pharmacology of the gastrointestinal, integumentary and sensory systems. A comprehensive overview of pharmaceutical dosage forms, pharmacokinetics, chemistry, terminology, abbreviations and symbols, the difference between trade and generic drugs and interpretation of prescriptions. Students will utilize the pharmacy lab in the applications of pharmacy science. Interpretations of doctor’s orders along with prescription filling procedures are practiced. Students will be introduced to the use of pharmacy reference materials. A grade of “C” or better is required to earn credit for this course.

**PHR 120: Pharmacy Clinical Applications 1**
2.0 units – 45 hours
This course emphasizes the theory of anatomy, physiology, pathophysiology, and related pharmacology of the nervous systems, including mental health, and nutrition. This course will demonstrate the procedures to interpret, fill and label a prescription. This course will also cover the procedures involved in processing refills. A grade of “C” or better is required to earn credit for this course.

**PHR 135: Pharmacy Clinical Applications 2**
3.0 units – 45 hours
This course emphasizes the theory of anatomy, physiology, pathophysiology, and related pharmacology of the skeletal-muscular systems, endocrine and reproductive systems. This course will also cover the fundamentals in aseptic technique, proper procedures for drug distribution and dispensing, non-sterile compounding, and manufacturing/packaging procedures. Various pieces of pharmacy equipment and supplies will be utilized. A grade of “C” or better is required to earn credit for this course.

**PHR 203: Pharmaceutical Lab Applications 1**
2.0 units – 45 hours
This course offers the practical lab applications for drug distribution and dispensing, non-sterile compounding, and manufacturing/packaging procedures. Students will utilize essential pharmacy tools and supplies to process orders during this course. Over-the-counter products and diagnostics are also covered and discussed. A grade of “C” or better is required to earn credit for this course.

**PHR 231: Anatomy, Physiology, and Pharmacology 1**
3.0 units – 45 hours
This course emphasizes the theory of pharmacology, physiology, pathophysiology, and indications of the pharmacological drug classes. This course also includes the function and structure of the nervous and circulatory systems identifying the disease states of these systems and the effects of therapeutic agents. Over-the-counter medications, diagnostics, vitamins, herbs, and analgesics are also covered. A grade of “C” or better is required to earn credit for this course.
PHR 303: Pharmaceutical Lab Applications 2
2.0 units – 45 hours
This course focuses on the physical and chemical properties of drugs. The fundamentals in aseptic technique, parenteral admixture procedures, and I.V. preparations are emphasized in this course. Dosage calculations are integrated in the applications of this course. A grade of "C" or better is required to earn credit for this course.

PHR 312: Pharmacy Business, Simulations & Computer Applications
3.0 units – 45 hours
This course offers a study of pharmacy computer applications specializing in processing prescriptions, drug information retrieval, and other practical applications including legal documentation, patient profiles, and related topics. Students will participate in mock pharmacy applications to enhance competency, efficiency, and camaraderie in the execution of pharmacy technician related tasks. A grade of "C" or better is required to earn credit for this course.

PHR 371: Professional Development
2.0 units – 45 hours
Students will participate in professional development activities designed to offer insight into the behaviors and attitudes of the pharmacy technician. They will practice drug calculation skills, review federal and state regulations, drug information, and the use of pharmaceutical reference guides. Through this practice and review, students will prepare for the national certification exam. A grade of C or better is required to earn credit for this course.

PHR 512: Clinical Experience
2.0 units – 120 hours
Students will apply their acquired skills and knowledge, taking on the responsibilities and duties of a pharmacy technician trainee in a distinct pharmacy practice setting. The teaching/learning facility will provide appropriate supervision and evaluation of student performance. Passing this course is a graduation requirement.

PHR 513: Externship Seminar
1.0 unit – 15 hours
In this course, students will assess their performance and application of acquired skills and knowledge within their externship. They will also prepare for employment, participating in activities such as researching career options and completing State board paperwork. The grade earned in this course is Pass/Fail.

PSY 1: General Psychology
3.0 units – 45 hours
This course covers the study of human behavior, moral development, and psychological theory as it applies to the individual, group and community. Behavioral disorders and treatment; social perceptions; emotions and motivation, social influence and group processes are topics included in this course.

RN 10: Fundamentals of Nursing Theory
3.0 units – 45 hours
This course is an introduction of the foundation of nursing theory and concepts to promote and maintain safe, effective health care with culturally diverse clients. Students will integrate the professional nursing roles of clinician, teacher, leader, and advocate while demonstrating critical thinking and utilizing the nursing process in the promotion of health and the foundational care of client response to physiological and psychosocial health conditions of the adult client. A grade of "C" or better is required to earn credit for this course.

RN 10L: Fundamentals of Nursing Clinical
3.0 units – 135 hours
This course consists of Skills Lab and Clinical hours that apply the theory concepts of RN 10. Selected psychomotor skills associated with the activities of daily living will be studied and practiced. Clinical site rotations include patient care units within skilled nursing agencies. A grade of "C" or better is required to earn credit for this course.

RN 12: Nursing Seminar 1: Pathophysiology
2.0 units – 30 hours
This course introduces the student to basic pathophysiology and disruptions in the normal body functioning. Assessment findings, diagnostic testing, and interventions for specific health problems are discussed. A grade of "C" or better is required to earn credit for this course.

RN 22: Nursing Seminar 2: Pharmacology
2.0 units – 30 hours
This course offers a theoretical approach to pharmacotherapeutics. The focus of major drug classifications and specific medications will be discussed in relation to pharmacodynamics, pharmacokinetics, and therapeutic uses, adverse reactions, and precautions. A grade of "C" or better is required to earn credit for this course.

RN 23: Maternal Newborn Nursing Theory
3.0 units – 45 hours
This course will prepare the nursing student with the knowledge of current trends and the basic theoretical foundation of antepartum, intrapartum, postpartum, and newborn care and management. A grade of "C" or better is required to earn credit for this course.

RN 23L: Maternal Newborn Nursing Clinical
2.0 units 90 hours
This course will prepare the nursing student to apply the nursing process, collaborate with multidisciplinary teams, and provide effective communication and safe nursing care for the maternal/child health client in the clinical/skills lab setting. A grade of "C" or better is required to earn credit for this course.
RN 24L: Beginning Medical Surgical Clinical
3.0 units – 135 hours
This course consists of a Skills Lab and Clinical hours that apply the theory concepts of RN24, and build upon the basic skills. At the Advanced Beginner level, students will care for patients in the acute care setting. A grade of "C" or better is required to earn credit for this course.

RN 28: Health Promotions
4.0 units – 90 hours
A foundational Medical-Surgical Nursing course designed for the LVN to RN student. This course is designed to build upon the basic nursing content and theoretical concepts including the care of patients with chronic and acute illness in the medical-surgical setting. Students will demonstrate mastery of basic nursing competencies. A grade of "C" or better is required to earn credit for this course.

RN 30: Gerontology-Community Health Nursing Theory
1.0 unit – 15 hours
In this course, students are introduced to the nursing role within the community health setting. They will also discuss the geriatric nurse’s role and the process of healthy aging. A grade of "C" or better is required to earn credit for this course.

RN 30L: Gerontology-Community Health Nursing Clinical
1.0 unit – 45 hours
In this course, students will experience a variety of community health nursing roles. They will utilize aspects of the nursing process in a range of community settings. A grade of "C" or better is required to earn credit for this course.

RN 34: Maternal/Child Nursing Theory
3.0 units – 45 hours
Introduction to patient-centered care of the Maternal client and Pediatric client and family, emphasizing safety, wellness, illness, hospitalization and growth and development. This course discusses the nursing care of antepartum, intrapartum, postpartum maternal client and children from birth through adolescence and their families. Concepts include, disease process, medical treatments, and nursing responsibilities, interventions, and expected outcomes, cultural, psychosocial, ethical, and legal issues. A grade of "C" or better is required to earn credit for this course.

RN 34L: Maternal/Child Nursing – Clinical
2.0 units – 90 hours
This course will prepare the nursing student to apply specific skills, multidisciplinary teams, effective communication, the nursing process, and concepts in care for the maternal/child health client in the clinical/skills lab setting. A grade of "C" or better is required to earn credit for this course.

RN 35: Intermediate Medical Surgical Nursing Theory
3.0 units – 45 hours
This is the intermediate Medical-Surgical Nursing course. Course content includes the theoretical foundation of patients with acute illness in medical-surgical setting. A grade of "C" or better is required to earn credit for this course.

RN 35L: Intermediate Medical Surgical Nursing – Clinical
3.0 units – 135 hours
This course provides students with the application of theory to the clinical setting. Students will integrate concepts and practices of intermediate medical-surgical nursing, focusing on the adult through geriatric patient in the acute care medical-surgical environment. A grade of "C" or better is required to earn credit for this course.

RN36: Health Appraisal
4.0 units – 90 hours
Health appraisal integrates psychosocial and pathophysiological processes, which includes techniques of history taking and health assessment in nursing practice and knowledge of normal findings and common deviations. A grade of "C" or better is required to earn credit for this course.

RN 37: Pediatrics Theory
3.0 units – 45 hours
This course provides an introduction to nursing care of the pediatric client and family, emphasizing wellness, illness, hospitalization, and pediatric development. Students will examine nursing care of the pediatric client from birth through adolescence and their families. Concepts include disease process, medical treatments, nursing responsibilities, interventions and expected outcomes, as well as cultural, psychosocial, ethical and legal issues.

RN 37L: Pediatrics Clinical
5.0 units – 90 hours
This course consists of Skills Lab and Clinical hours that apply concepts of RN 33. Students will apply specific skills, effective communication, the nursing process, and concepts in the care of pediatric client/family collaboration with other health care team members.

RN 43: Mental Health Psychiatric Nursing – Theory
3.0 units – 45 hours
In this course, students are introduced to basic mental health psychiatric concepts, including mental health disorders and diagnoses. Students gain insights to the role of the nurse in a variety of mental health psychiatric settings. A grade of "C" or better is required to earn credit for this course.

RN 43L: Mental Health Psychiatric Nursing – Clinical
2.0 units – 90 hours
In this course, students will apply mental health psychiatric nursing theory to clinical situations. Students will interact with clients in acute care as well as community settings. A grade of "C" or better is required for completion of the course.

RN 44: Leadership
3.0 units – 45 hours
Management functions, issues and trends will be applied to varying leadership situations within a variety of health care systems. Content includes the Registered Nurse’s role in planning, organizing
staffing, and directing care. Current professional and social issues in leadership and management are incorporated. Emphasis is placed on the eight core competencies of professional behaviors: communication, assessment, clinical decision making, caring interventions, teaching/learning, collaboration, and managing care. A grade of "C" or better is required to earn credit for this course.

RN 45: Advanced Medical Surgical Nursing – Theory
3.0 units – 45 hours
This is the advanced Medical-Surgical Nursing course. Course content includes the theoretical foundation of the care of patients with complex multi-system illnesses in the critical care setting. A grade of "C" or better is required to earn credit for this course.

RN 45L: Advanced Medical Surgical Nursing – Clinical
3.0 units – 135 hours
This course provides students with application of advanced medical-surgical concepts in caring for adult patients with complex multi-system illness. Clinical site rotations include a variety of critical care settings. A grade of "C" or better is required to earn credit for this course.

RN 46: Advanced Medical Surgical Theory
3.0 units – 45 hours
This is the advanced Medical-Surgical Nursing course. Course content includes the theoretical foundation of the care of patients with complex multi-system illnesses in the critical care setting. A grade of "C" or better is required to earn credit for this course.

RN 46L: Advanced Medical Surgical Clinical
4.0 units – 180 hours
This course provides students with application of advanced medical-surgical concepts in caring for adult patients with complex multi-system illness. Clinical site rotations include a variety of critical care settings. A grade of "C" or better is required to earn credit for this course.

RN 50: Work-Study
0.0 units – variable hours
RN Work-Study provides students enrolled in the Nursing Program an opportunity to obtain structured work-study experiences, under the supervision of registered nurses, in participating health care agencies. Work-Study provides opportunities for additional practice and development of confidence and critical thinking through application of previously learned knowledge and skills. The grade earned in this course is Credit/No Credit. This course is not a graduation requirement.

RN 51: NCLEX Review
0.0 units – 30 hours
Students will study various methodologies for successfully completing the NCLEX examination. The development of a personalized plan for NCLEX exam preparation will be completed.

RT 1: Clinical Practice – Rotation 1
1.0 unit – 45 hours
This course will prepare the student for their clinical rotations with preparatory requirements, certifications, orientations, introduction to clinical paperwork, clinical competencies manual, safety procedures, and clinical seminars. A grade of "C" or better is required to earn credit for this course.

RT 10A: Introduction to Respiratory Care
6.0 units – 139 hours
This course provides an introduction to the physical world to students in health majors and practices encountered within health care environments. Topics will include classroom theory and laboratory exploration of physical dynamics as they relate to health professions, with an emphasis in respiratory care, as well as, advanced directives, patient bill of rights, bioterrorism preparedness and management. Procedures and practices related to common settings will be explored.

RT 10B: Introduction to Respiratory Care
4.0 units – 89 hours
This course provides an introduction to the physical world to students in health majors and practices encountered within health care environments. Topics will include classroom theory and laboratory exploration of physical dynamics as they relate to health professions, with an emphasis in respiratory care, as well as, advanced directives, patient bill of rights, bioterrorism preparedness and management. Procedures and practices related to common settings will be explored.

RT 20: Fundamentals of Respiratory Care
4.0 units – 98 hours
The focus of this course is on the cardiopulmonary systems and the application of protocol-based clinical Respiratory Therapy treatment to deliver disease-specific patient care. Respiratory pathophysiology, assessment techniques and indices, basic pharmacology as it applies to the treatment and prevention of pulmonary disease, humidity and aerosol modalities as they apply to the treatment of pulmonary disease, electrophysiology, and correlation of acid-base and arterial blood gas interpretation are among the topics emphasized. A grade of "C" or better is required to earn credit for this course.

RT 22: Clinical Practice – Rotation 2
5.0 units – 250 hours
Students will participate in clinical rotations in acute and sub-acute respiratory therapy conducted at local hospitals and medical centers. The student will be assessed on supervised clinical practice and completion of clinical assignments and performance objectives. A grade of "C" or better is required to earn credit for this course.

RT 30A: Ventilatory Principles of Respiratory Care
4.0 units – 106 hours
The focus of this course is management of the airway and mechanical ventilation. Topics include endotracheal intubation, advanced airway management, resuscitation devices, invasive and non-invasive ventilation, tracheostomy care and initiation, monitoring, managing, and discontinuation of mechanical
ventilation. Students will apply hemodynamics to positive pressure ventilation.

**RT 30B: Critical Care Principles of Respiratory Care**

*2.0 units – 46 hours*

The focus of this course is management of the airway and mechanical ventilation. Topics include endotracheal intubation, advanced airway management, resuscitation devices, invasive and non-invasive ventilation, tracheostomy care, and initiation, monitoring, managing, and discontinuation of mechanical ventilation. Students will apply hemodynamics to positive pressure ventilation.

**RT 31: Essentials of Respiratory Care**

*7.0 units – 152 hours*

The focus of this course is special applications in respiratory care, and neonatal and pediatric respiratory care. Topics include: neonatal and pediatric anatomy, physiology, and pathology. Specialized diagnostics and certifications also occur during this course. A grade of "C" or better is required to earn credit for this course.

**RT 33: Clinical Practice – Rotation 3**

*6.0 units – 255 hours*

Students will participate in clinical rotations in adult intensive care, emergency care, and pediatric floor care conducted at local hospitals and medical centers. The student will be assessed on supervised clinical practice and completion of clinical assignments and performance objectives. A grade of "C" or better is required to earn credit for this course.

**RT 40: Advanced Respiratory Care**

*7.0 units – 152 hours*

The focus of this course is advanced pulmonary function testing and critical care with emphasis on hemodynamic monitoring. Topics include advanced physical, radiological, and clinical laboratory assessment along with invasively monitored cardiac assessment and special procedures. Routine and specialized pulmonary function tests are also covered. A grade of "C" or better is required to earn credit for this course.

**RT 41: Specialized Respiratory Care**

*7.0 units – 152 hours*

The focus of this course is alternate work sites and job readiness for successful employment in Respiratory Care. Topics include land/air patient transport, disaster management, patient and family education and health management, case management, home care, long term care, pulmonary rehabilitation, and sleep studies. Job readiness along with licensure and credentialing examination preparation also occurs in this course. A grade of "C" or better is required to earn credit for this course.

**RT 44: Clinical Practice – Rotation 4**

*6.0 units – 255 hours*

Students will participate in advanced rotations in adult, pediatric, and neonatal critical care conducted at local hospitals and medical centers. Specialized clinical experiences, as available, in respiratory home care, asthma education, pulmonary function testing, sleep studies, land/air patient transport, intra-hospital patient transport, disaster management, medical emergency team (MET) and pulmonary rehabilitation. The student will be assessed on supervised clinical practice and completion of clinical assignments and performance objectives. A grade of "C" or better is required to earn credit for this course.

**SOC 1: Introduction to Sociology**

*3.0 units – 45 hours*

This course is a survey of social structure, theory, and its implications for individuals in a dynamic view of the environment. Cultures, family, organizations, groups, ethnic and political influences, and politics are the topics covered.

**SPC 1A: Introduction to Public Speaking**

*3.0 units – 45 hours*

The theory and techniques of public speaking will be addressed in this course. Emphasis on the logical organization and composition of informative and persuasive speeches and practice in clearly stating and developing ideas will be covered. Techniques and tools for confidence building and reducing anxiety are also included in this course.
STT 11: Introduction to Surgical Technology  
5 units — 90 hours  
This course covers development of medicine, surgery, and the field of surgical technology. Related professional practice issues are discussed. Patient care concepts, pharmacology, anesthesia, information technology, electricity, robotics, all-hazards preparation, and microbiology will also be studied. Basic Life Support for Healthcare Providers (CPR) is included. **A grade of “C” or better is required to earn credit for this course.**

STT 12: Surgical Case Management  
3 units — 45 hours  
Orientation to the surgical environment includes introduction of the roles of the surgical team members, attire, furniture, instrumentation, equipment, and supplies. The principles of asepsis and the practice of sterile technique are introduced. Fundamental elements of the three phases of surgical case management are presented. **A grade of “C” or better is required to earn credit for this course.**

STT 22: Basic Surgical Procedures  
9 units — 150 hours  
This course introduces noninvasive and invasive diagnostic procedures as well as basic surgical interventions for the following: general, obstetric and gynecologic, endoscopic, otorhinolaryngologic, genitourinary, trauma, and orthopedic. **A grade of “C” or better is required to earn credit for this course.**

STT 33: Advanced Surgical Procedures  
7 units — 120 hours  
This course encompasses an in-depth study of relevant surgical anatomy, physiology, pathophysiology, and diagnostic interventions as well as factors unique to the following advanced procedure areas: ophthalmic, oral and maxillofacial, plastic and reconstructive, oncologic, cardiothoracic, peripheral vascular, neurosurgical, and pediatric. **A grade of “C” or better is required to earn credit for this course.**

STT 44: Professional Development  
6 units — 90 hours  
Professional development and employability skills including resume writing and interview techniques are mastered. A comprehensive study of information learned throughout the program is provided in preparation for the National Certification Examination offered by the National Board of Surgical Technology and Surgical Assisting (NBSTSA). **A grade of “C” or better is required to earn credit for this course.**

VN 9: Anatomy and Physiology for Vocational Nurses  
3.0 units — 45 hours  
This course focuses on the anatomy of the human body and how the organs function in a healthy state. This course will provide an understanding of how disease processes affect the human body. Pathophysiology is introduced and further explored in the nursing theory courses. **A grade of “C” or better is required to earn credit for this course.**

VN 11: Clinical Pharmacology for Nurses  
4.0 units — 60 hours  
All phases of clinical pharmacology, types of drugs, general drug actions and uses, adverse effects, clinical consideration, and patient teaching will be covered. **A grade of “C” or better is required to earn credit for this course.**

VN 14: Nursing Fundamentals Theory  
6.0 units — 90 hours  
This course focuses on the patient centered study of fundamental nursing concepts and basic bedside nursing skills that apply to all clinical areas in vocational nursing. **A grade of “C” or better is required to earn credit for this course.**

VN 21: Nursing of the Mature Adult Theory  
8.0 units — 120 hours  
This course provides a foundation in the study of nursing care related to adult clients experiencing disorders of the integumentary system, skeletal system, muscular system, nervous system, sensory system, endocrine system, cardiovascular system, respiratory system, digestive/gastrointestinal system, urinary system, and metabolic/nutritional disorders. Other topics to be covered are: legal/ethical issues, community resources, diagnostic testing, patient education, rehabilitation, communicable diseases, cultural influences, and death/dying. **A grade of “C” or better is required to earn credit for this course.**

VN 32: Maternal Nursing Theory  
3.0 units — 45 hours  
This course applies the nursing process to the care of the mother and newborn baby, including prenatal care, stages of labor, delivery, and postpartum care with emphasis on patient teaching, legal/ethics, communication, community resources, cultural influence, substance abuse, and death and dying. **A grade of “C” or better is required to earn credit for this course.**

VN 33: Pediatric Nursing Theory  
3.0 units — 45 hours  
This course applies the nursing process to the care of the infant, toddler, preschool child, school age child and the adolescent with additional emphasis on patient teaching, legal/ethics, communication, community resources, cultural influence, substance abuse, and death and dying. **A grade of “C” or better is required to earn credit for this course.**

VN 40: Critical Care Concepts Theory  
8.0 units — 120 hours  
This course builds on the foundations of basic and intermediate medical surgical nursing classes to provide current concepts in advanced medical surgical nursing, mental health and community based nursing. **A grade of “C” or better is required to earn credit for this course.**
VN 46: Nursing Ethics and Professionalism
2.0 units – 30 hours
This course has nursing ethics and the development of the student’s skills in leadership, supervision, and management as its focus. Classes include principles of paradigm thinking, becoming a change agent, and conflict resolution. Nursing, medical, and psychosocial issues that impact nurses and the nursing profession will be discussed. A grade of “C” or better is required to earn credit for this course.

VN 51: Pharmacology: Dosages and Calculations
2.0 units – 30 hours
This class presents clinical applications for usual dosage determination and preparation through the use of arithmetic calculations, using both the metric and apothecary systems, involving fractions, decimals, ratios, and percentages. A grade of “C” or better is required to earn credit for this course.

VN 100: Nursing Fundamentals of the Adult Clinical Rotation
3.0 units – 160 hours
This course provides a clinical application in the study of nursing care related to adult clients experiencing disorders of the integumentary system, skeletal system, muscular system, nervous system, sensory system, endocrine system, cardiovascular system, respiratory system, digestive/gastrointestinal system, urinary system, and metabolic/nutritional disorders. Other topics to be covered are: legal/ethical issues, community resources, diagnostic testing, patient education, rehabilitation, communicable diseases, cultural influences, and death/dying. A grade of “C” or better is required to earn credit for this course.

VN 112: Nursing Fundamentals Skills Lab
1.0 unit – 80 hours
This course focuses on the patient centered study of fundamental nursing concepts and basic bedside nursing skills that apply to all clinical areas in vocational nursing. This course provides comprehensive HIPAA (Health Insurance Portability and Accountability Act) compliance training. A grade of “C” or better is required to earn credit for this course.

VN 201: Nursing of the Mature and Older Adult Clinical Rotations
5.0 units – 240 hours
This course provides a clinical application in the study of nursing care related to mature and older adult clients experiencing disorders of the integumentary system, skeletal system, muscular system, nervous system, sensory system, endocrine system, cardiovascular system, respiratory system, digestive/gastrointestinal system, urinary system, and metabolic/nutritional disorders. Other topics to be covered are: legal/ethical issues, community resources, diagnostic testing, patient education, rehabilitation, communicable diseases, cultural influences, and death/dying. A grade of “C” or better is required to earn credit for this course.

VN 301: Maternity and Pediatric Nursing Clinical Rotations
5.0 units – 240 hours
This course is the clinical application of the nursing process to the care of the maternity and pediatric patient. Topics include prenatal care, stages of labor, delivery, and postpartum care with emphasis on patient teaching, newborn and pediatric patient care in the clinical setting, legal/ethics, communication, community resources, cultural influence, substance abuse, and death and dying. A grade of “C” or better is required to earn credit for this course.

VN 401: Advanced Nursing Care in Medical/Surgical, Mental and Community Health Clinical Rotations
5.0 units – 240 hours
This course is the clinical application of nursing care concepts in advanced medical surgical nursing including mental health and community based nursing. A grade of “C” or better is required to earn credit for this course.

VN 501: Comprehensive Licensure Exam Review
2.0 units – 40 hours
This course focuses on review and preparation for passing the licensing exam required by the State Board of Vocational Nursing that allows a VN graduate from the State Board accredited program to become a Licensed Vocational Nurse. The course is designed to teach test taking strategies, assess knowledge needed and psychological approaches for successfully passing the exam. The exam is known as the National Certification Licensing Exam (NCLEX). A grade of “C” or better is required to earn credit for this course.

VRT 101: Anatomy and Physiology of Domestic Animals
5.0 units – 90 hours
Students will learn biological foundations and scrutinize the comparative anatomy and physiology of selected species of animals. Through lecture and lab demonstrations, emphasis will be placed on the variations in each species. Professional veterinary terminology will be introduced and organ systems and disease will be explored through a dissection project. A grade of “C” or better is required to earn credit for this course.

VRT 104: Companion Animal Nursing
5.0 units – 90 hours
This course focuses on infectious and non-infectious diseases of small animals. Students will identify the basic principles of disease transmission, pathology, and prevention. They will distinguish the common disorders of organ systems, and evaluate methods for their prevention and treatment. Students will discuss therapeutic nutrition options and the specialized care and hand-rearing of orphaned domestic small animals.

VRT 105: Fundamentals of Animal Nursing
3.0 units – 90 hours
Students will learn the role of the veterinary technician and assistant in various occupational settings. They will discuss the legal and ethical responsibilities, as well as the communication skills needed for an office setting. Identification, behavior, care, and husbandry of domestic species will be studied using proper medical terminology.
Students will begin to perform safe animal capture, handling, and restraint techniques as well as essential veterinary nursing skills.

**VRT 205: Laboratory Procedures**

*5.0 units - 90 hours*

This course focuses on demonstrations and laboratory exercises covering routine examinations of blood, urine, feces, and cytology from a variety of species. Normal and abnormal values will be presented and treatment for disorders will be discussed. The use and proper handling of lab equipment and lab samples will be analyzed. Basic microbiological procedures will be discussed and demonstrated. A grade of "C" or better is required to earn credit for this course.

**VRT 207: Farm Animal Nursing**

*3.0 units - 45 hours*

In this course, students will explore clinical farm animal care. They will learn to properly restrain, medicate, and care for farm animals (primarily working with ruminants and equine), assisting the veterinarian in a variety of clinical, radiographic, and surgical procedures. Students will be able to describe effective breeding programs, the care of neonatal farm animals, and common farm animal diseases and treatments. A grade of "C" or better is required to earn credit for this course.

**VRT 208: Advanced Pharmacology**

*3.0 units - 45 hours*

This course presents an overview of veterinary pharmaceuticals, formulations and dosage recommendations as they are used for treatment and/or prevention of some of the more common animal diseases. Pharmaceutical interactions on the body are discussed as well as state regulations and federal guidelines in the dispensing of medications. Basic drug dosages will be explained and practiced, and personal drug reference materials will be developed. A grade of "C" or better is required to earn credit for this course.

**VRT 300: Beginning Diagnostic Imaging**

*2.0 units - 45 hours*

Students will participate in beginning applications and techniques of diagnostic x-ray in the veterinary setting. Current state safety regulations and requirements are discussed, and quality assurance equipment testing is demonstrated. Students will perform proper animal restraint, process films and verify image accuracy. Students will also spend time in this course practicing and demonstrating other veterinary lab skills required before clinical rotation. A grade of "C" or better is required to earn credit for this course.

**VRT 308: Advanced Pharmacology**

*3.0 units – 45 hours*

This course emphasizes the chemistry of drugs, their pharmacodynamics and the pharmacokinetics with various species. Blood transfusion, fluid therapy nursing, alternative drug therapies, toxicological crisis situations, behavioral drugs and modification techniques will be studied. In-depth dosage calculation exercises will be performed. A grade of "C" or better is required to earn credit for this course.

**VRT 330: Beginning Surgical Assisting**

*5.0 units – 90 hours*

In this course students will demonstrate essential Veterinary Technician surgical team skills such as asepsis, sterilization, medical documentation, and surgical patient preparation. Components of an anesthetic machine and their functions, as well as anesthetic and analgesic drug classifications, patient monitoring and endotracheal intubation will be discussed. Students will also apply surgical nursing skills from the beginning to end of the surgical process, completing all documentation, interacting with clients, using aseptic techniques, and practicing sterilization and sanitation of the operating suite.

**VRT 340: Advanced Surgical Procedures**

*5.0 units – 90 hours*

This course focuses on advanced licensure procedures for the Veterinary Technician. These include principles of anesthesia induction, advanced surgical nursing techniques, dental prophylaxis and extractions, suture techniques, bandaging, splinting, emergency and critical care. Basic disaster planning and pet CPR are included. Students will also demonstrate competency of advanced veterinary technician skills with anesthetic induction, suture techniques and dental prophylaxis and extraction techniques. Surgical assistance aptitude, critical care knowledge, and proper emergency response protocols will be performed and assessed.

**VRT 403: Advanced Diagnostic Imaging Applications**

*2.0 units – 45 hours*

This course provides an overview of radiation control regulations and advanced techniques in radiology. Student will produce quality radiographs and perform various restraint techniques, including special positioning for orthopedics, thoracic and abnormal films. Contrast studies, dental x-rays, ultrasound, CT, MRI, and basic endoscopy will be discussed. Students will also continue to practice other lab skills when not producing radiographs. A grade of "C" or better is required to earn credit for this course.

**VRT 406: Exotic and Lab Animals**

*3.0 units – 45 hours*

In this course students will learn to care for lab and exotic pet animals such as rodents, rabbits, birds, reptiles, amphibians, and various species. They will study basic care, handling, and restraint, nail trims, and physical exams. Students will practice basic venipuncture techniques and administration of medications on these various species. A grade of "C" or better is required to earn credit for this course.

**VRT 407: Course Review and Essential Skills**

*2 units – 45 hours*

In this course students will apply the knowledge gained throughout the program to preparation for the licensure exam and career. Students will practice answering exam questions as well as have hands-on lab time to solidify essential skills. Students will also reflect on how to prevent test anxiety and practice test preparation techniques. A grade of "C" or better is required to earn credit for this course.
VRT493: Externship
5.0 units — 240 hours
This course provides continued work experience in a clinical setting under direct supervision of a veterinarian or RVT associated with the college. Hours and sites will be arranged by the student and approved by the veterinary faculty. Students will submit a completed supervisor evaluation, based on job tasks performed in the practice.

Nicole Weiss
A.S., Health Studies, San Joaquin Valley College

Adjunct

Alison Bermudez
A.S., Medical Assisting, San Joaquin Valley College

Christina Berry
A.S., in progress, University of Phoenix
Certificate, Veterinary Technology, San Joaquin Valley College

Wendy Berry
A.S. Veterinary Technology, San Joaquin Valley College

Stephanie Conrad
PhD, Veterinary Medicine, Virginia Polytechnic Institute & State
B.A., Genetics, University of Georgia

Sarah DeOrian
A.S., Veterinary Technology, San Joaquin Valley College

Kristina Delgado
B.S., Biology, California State University Fresno
A.A., Liberal Arts, Fresno City College

Mira Minton
B.A., Community Studies, University of California Santa Cruz

Melody Quinn
A.A., Liberal Arts, Fresno City College

Donna Shepard
B.S., Agricultural Science, California State University, Fresno

Brittney Steiner
A.S., Medical Assisting, Heald College

TECHNICAL STUDIES FACULTY

Christopher Barger
B.S., Industrial Technology, California State University, Fresno
Adjunct

Jerry Brackett
A.S. in progress, HVAC-R, Fresno City College

Benjamin Brown
A.S. in progress, Fresno City College

Seng Maokhamphiou
A.S., Heating, Ventilation, Air Conditioning, San Joaquin Valley College

FRESNO AVIATION CAMPUS
ADMINISTRATION

Jack Macfarlane
Campus Director
Ed.D., Northcentral University
M.S. Ed., Saint Joseph College
B.S., Sociology, Regents College

Jason Alves
Academic Dean
A.S., Aviation Maintenance Technology, San Joaquin Valley College
FAA Inspection Authorization
FAA Designated Mechanical Examiner

GENERAL EDUCATION FACULTY

Adjunct

Kathleen McArthur
B.S. Biology, California State University Bakersfield

Shanna Milano
B.A., Psychology California State University Fresno

James Montague
B.A. English, California State University Fresno

Thomas Sabatino
B.A., Philosophy, California State University Fresno
Certificate, Emergency Med Tech, Fresno City College
Certificate, EMT 1 Refresher, Fresno City College

John Shoaf
M.Ed., Postsecondary Education, University of Nevada Las Vegas

TECHNICAL STUDIES FACULTY

Donald “Don” Dutra
A.S., Professional Aeronautics, Embry-Riddle Aeronautical University

Richard Simmons
Program Director
FAA Inspection Authorization
FAA Designated Mechanical Examiner

Lionel Smith
B.A., Business Administration, Columbia University

Joseph Wong
A.S., Aviation Maintenance Technology, San Joaquin Valley College

HANFORD CAMPUS
ADMINISTRATION

Don Wright
Campus Director
M.S., Management Information Systems, University of Southern California
M.B.A., Aviation, Embry Riddle Aeronautical University
B.S., Engineering, U.S. Naval Academy

BUSINESS STUDIES FACULTY

Adjunct

Matthew Glasgow
B.S., Business Administration, California State University Fresno
A.A., Business, College of the Sequoias

George Hernandez
B.S., Criminology, California State University, Fresno
A.S., Administration of Justice, Ventura College

GENERAL EDUCATION FACULTY

Adjunct

Kelly LaFleur
B.A., Liberal Studies, Chapman University
A.A., Liberal Arts, College of the Sequoias

Cindy Bremer-Brooks
B.S., American Public University
A.S., Fresno City College

HEALTH STUDIES FACULTY

Corinna Avina
A.S., Health Studies, San Joaquin Valley College

Patricia Bishop
A.S., Medical Office Administration, San Joaquin Valley College

Laura Cervantez
A.S., Health Studies, San Joaquin Valley College

HESPERIA CAMPUS
ADMINISTRATION

Richard Matley
Campus Director
A.A., Liberal Arts, Ventura College
B.A., Biblical and Theological Studies, Trinity College of the Bible

Stephanie Fenton
Academic Dean
B.A., Liberal Studies, Azusa Pacific University
Cheri Johnson  
Academic Dean  
M.A., Education, Concordia University

B.A., Psychology, University of California, Los Angeles  
A.S., Math and Science, Victor Valley Community College  
A.A., Liberal Arts, Victor Valley Community College

**Danielle Staton**  
B.A., Liberal Studies, University of La Verne

**David Wilkerson**  
M.A., History, University of California, Riverside  
B.A., History, University of California, Riverside

**HEALTH STUDIES FACULTY**

**April Green**  
A.S., in progress, Health Care Administration, California Coast University

**Jennifer Hunt**  
A.S., in progress, Respiratory Therapy, American Career College

**Adjunct**

**Alicia Alva**  
A.S., Administrative Health Care Management, San Joaquin Valley College

**Robin Harris**  
A.S., in progress, Allied Health, Victor Valley College

**Jillian Ramirez**  
A.S., in progress, Allied Health, South University

**Stephanie Rutherford**  
A.S., Clinical and Administrative Medical Assisting, San Joaquin Valley College

**Barbara Wright**  
A.S., Pharmacy Technology, San Joaquin Valley College

**Dianna White**  
A.S., in process, Allied Health, Victor Valley College
TECHNICAL STUDIES FACULTY

James Sneller
A.S., in process, Victor Valley College
Adjunct

James Fischer
A.A., General Studies, Anne Arundel Community College

Paul Kornyei
A.S., Heating, Ventilation, and Air Conditioning, San Joaquin Valley College

LANCASTER CAMPUS
ADMINISTRATION

Cheri Johnson — Campus Director
M.A., Education, Concordia University
B.S., Physical Education, Miami University

Tammy Latu
Academic Dean
B.S., in progress, Applied Management, Grand Canyon University
A.S., Clinical Medical Assisting, San Joaquin Valley College

BUSINESS STUDIES FACULTY

Heaven Warner
M.B.A., University of Houston
B.A., Accounting, University of Houston

Adjunct

Julie Larry
M.B.A., California State University, Northridge
B.S., Business Administration, University of Southern California

Manual Nunez
A.S., in progress Criminal Justice, Antelope Valley College

Mark Swagger
A.S., Criminal Justice, California Coast University

GENERAL EDUCATION FACULTY

Adjunct

Jessica Federico
B.A., Health Care Administration, California State University Long Beach
A.S., Liberal Arts, College of the Sequoias

Kamelia Hormozi
B.S., Psychology, University of Phoenix
A.S., Psychology, University of Phoenix

La Cena Jones
M.A., Counseling/Marriage & Family, University of Phoenix
B.A., Criminology, Upper Iowa University
B.A., Sociology, Upper Iowa University
B.A., English, Upper Iowa University

HEALTH STUDIES FACULTY

Bunnie Cervantes
A.S. in progress, Science, Victor Valley Community College

Jamila Clark
A.S., Registered Nursing, Antelope Valley Community College

Adjunct

Danny Rios
A.S., Pharmacy Technology, San Joaquin Valley College

Dwanda Conner
A.S., in progress, Science, Victor Valley College

Candy Torres
A.S., Criminal Justice, Everest College

Heather Blunt
A.S., Applied Science, Allied College

Nelianne Garner Gray
A.S., Health Information Technology, ITT

TECHNICAL STUDIES FACULTY

Adjunct

Richard Gomez
A.S., Operation/Maintenance Engineer, Los Angeles Trade Technical College

Benjamin Rees
A.S., HVAC-R, San Joaquin Valley College

Jason Nelson
A.S., HVAC-R, Antelope Valley College

MADERA CAMPUS
ADMINISTRATION

Ben Almaguer
Campus Director
B.S., Management, University of Phoenix

Belinda Garcia
Campus Dean
B.S., Business, University of Phoenix
BUSINESS STUDIES FACULTY

Adjunct

Angelo Dai’Re
B.S., Religious Science and Sociology/Human Development, Logos Christian University
A.A., Legal Assistant, El Camino College

Jacob Wiens
B.A., Journalism, California State University Fresno
M.S., Management, Argosy University - Online

HEALTH STUDIES FACULTY

Adjunct

Kimberly Dickson
M.S. Health Care Management, Concordia University

Tiffany Gregory
A.S., Clinical and Administrative Medical Assisting, San Joaquin Valley College

Mechelle King
A.S. in progress, San Joaquin Valley College

Amanda Ragadio
A.S. in progress

MODESTO CAMPUS ADMINISTRATION

Carla Tweed
Campus Director
B.A., Social Science, Chapman University
M.A., Education, Chapman University

Alyssa Bahr Casillas
Dean of Student Services
M.A., Organization and Leadership, University of San Francisco
B.A., Political Science, University of San Francisco
Ed.D, Organization and Leadership, University of San Francisco

Nicole Lewis
Division Manager
B.A., Anthropology, University of California Davis

BUSINESS STUDIES FACULTY

Kimberly Mendoza
M.A., Education, Curriculum & Instruction, Concordia University
B.A., Mathematics, California State University, Stanislaus

Henry Polack
B.A., Communications Studies, California State University Stanislaus
A.A., General Studies, Modesto Jr. College

Adjunct

Donald Martin
Degree waived

GENERAL EDUCATION FACULTY

Ashvindar Singh
M.A., Education, University of Phoenix
B.S., Psychology, University of Phoenix

Alicia Still
B.S., Mathematics, University of the Pacific

Adjunct

Gabriela Vega
M.S., Marine Sciences, California State University, Stanislaus
B.S., Biology, California State University, Stanislaus
A.A., General Education, Modesto Junior College

HEALTH STUDIES FACULTY

Vanessa Ahio
B.A., Health & Wellness, Kaplan University

Stephanie Baughn
A.A., General Studies, Modesto Junior College

Cindy Carney
B.A., Health Care Administration, Ashford University
A.S., Health Studies, San Joaquin Valley College

Shari Comrie

Mary Freeman
A.A., General Studies, Modesto Jr. College

Jodi Harmon
B.A. Psychology, University of Phoenix

Theresa Jones
M.S., Healthcare Management, American Intercontinental University
B.S., Healthcare Management, American Intercontinental University

Vanessa Martinez
A.A., Family and Consumer Sciences, San Joaquin Delta College

Kesha McKibben
B.S., Business Management, California Status University Stanislaus
A.A., General, Modesto Jr. College

Yasmin Ramos
A.A., Pharmacy Technician, SJVC
Jennifer Sarhadi  
B.A., University of CA Davis  
M.S., CA Polytechnic State University

Kameelah Simpson  
A.A., General Studies, Modesto Jr. College

Alycia Vetro  
A.A., General Studies, Modesto Jr. College

**TECHNICAL STUDIES FACULTY**

Steve Sochacki  
A.A., Engineering, San Joaquin Delta College

Adjunct

Alfonso Benavides  
B.S., Chemical Engineering, Instituto Tecnologico, Mexico

Trevelyn Blazzard  
A.S., Engineering, University of California Davis

**ONLINE DIVISION**

**ADMINISTRATION**

Pat Fox  
Director of E-Learning  
Ph.D. Intergal Studies, Transformative Learning & Change, California Institute of Intergal Studies  
M.A., Organizational Development & Transformation, California Institute of Integral Studies  
B.S., Liberal Studies, University of Central Florida
