Clinical and Administrative Medical Assisting

This program is offered at **Antelope Valley (Lancaster), Bakersfield, Fresno, Modesto (Salida), Online, Ontario, Rancho Mirage, Santa Maria, Temecula, Victor Valley (Hesperia), and Visalia.**

Program Description

The Clinical and Administrative Medical Assisting program is 62 weeks in length and prepares graduates to work in medical offices and specialty clinics. Training helps students learn the skills required to be a valuable member of the healthcare team. Students will receive advanced training in medical office procedures as well as front- and back-office skills. The program includes an externship that provides enhanced learning and the opportunity to develop in-field work experience.

Program Student Learning Outcomes

Upon completion of this program, the successful student will be able to:

1. Manage the front office of a health care facility and perform administrative duties such as patient charting, billing, letter writing, and handling coding procedures for insurance purposes using a variety of applicable software
2. Perform clinical skills such as taking vital signs, dosage computations, venipuncture, injections, hematology, administration of medication, specimen collection, and emergency procedures
3. Distinguish the various systems of the human body and explain their function using proper medical terminology
4. Communicate effectively orally and in writing and demonstrate the knowledge and skills required to be eligible and prepared for a national certification exam
5. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career or personal life
6. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all **SJVC** graduates

Graduation Requirements

- Successful completion of the courses listed below with a grade of "C" or higher in all clinical courses
- Successful completion of the Career Services Seminar (CSS 100)
- Achieve the minimum requirement of Health Insurance Portability and Accountability Act Certification (HIPAA)
- Successful completion of a CPR Certification course

- **Online** students only: successful completion of a First Aid Certification Course
- Completion of a series of Hepatitis B vaccinations and a Tuberculosis (TB) test

Credential and Professional Certifications

Graduates earn an Associate of Science degree and are eligible to sit for the National Certified Medical Assistant (NCMA) exam offered by the National Center for Competency Testing (NCCT).^{*} Students also prepare for and take certification exams within their program courses that include HIPAA and CPR; students attending **online** also earn certification in First Aid.

Students residing outside California are encouraged to take a certification examination recognized by their state medical board or an independent certification organization.

***Graduates may qualify for other certifications depending upon location and placement requirements.**

Dental Hygiene

Revision: Changes were made to the **Dental Hygiene program description** as set forth below: (Catalog p. 72, rev. 6.3.19)

Dental Hygiene

This program is offered at **Ontario** and **Visalia.**

Program Description

The Dental Hygiene program is 67 weeks in length and prepares students to work as a registered dental hygienist. Benefits of this program include comprehensive instruction, small class sizes, and high board pass rates. The program features a fully equipped on-campus dental clinic, allowing students to get hands-on instruction and real-world experience while completing their studies.

The Dental Hygiene program is accredited by the American Dental Association, Commission on Dental Accreditation.

Program Student Learning Outcomes

Upon completion of this program, the successful student will be able to:

1. Identify each patient's physical and oral health status by collecting patient data through a process of comprehensive patient assessment procedures
2. Analyze assessment findings and use critical thinking in order to address the patient's dental hygiene treatment needs
3. Establish a dental hygiene care plan that reflects the realistic goals and treatment strategies to facilitate optimal oral health
4. Provide patient-centered treatment and evidence-based care in a manner minimizing risk and optimizing oral health
5. Measure the extent to which goals identified in the dental hygiene care plan are achieved
6. Complete and accurately record all documentation relevant to patient care
7. Adapt to changes in demographics and cultural diversity in dental hygiene practice and health care delivery
8. Interact with the dental community and professional organizations for professional growth and lifelong learning

Admission Requirements

Completion of the following prerequisite courses at an accredited college or university with a minimum of a "C" grade and an overall GPA of 2.75 or higher. **NOTE:** Advanced Placement (AP) courses do not qualify as prerequisites.

- General/Inorganic Chemistry (with lab)
- General Microbiology (with lab) (BIOL14) *
- Human Physiology (with lab)
- Speech / Oral Communication
- Introduction to Sociology
- Organic/Biochemistry (with lab) (CHE4)*
- Human Anatomy (with lab)**
- Writing and Composition
- Intermediate Algebra or higher (not included in the minimum GPA requirements for entry into the program)
- General Psychology

*Science courses must have been completed within the past seven (7) years. The BIOL14 and/or CHE4 course(s) may be offered to applicants who have successfully completed all other prerequisite courses.

**If Anatomy and Physiology are taken as a combined course (i.e., A&P 1, A&P 2), both courses must be taken at the same institution.

Applicants who have successfully completed the prerequisites and submitted a complete application will be considered for admission into the program. Using a point-based system, applicants will be ranked on the following criteria: cumulative GPA on prerequisite courses, reading comprehension exam, allied health or related work experience, and a personal interview with Dental Hygiene faculty and/or the Program Director.

CPR Requirement

Students are not required to be CPR-certified as a condition of admission; however, students will not be permitted to see live patients in clinicals until they have presented valid CPR certification. Certification must be obtained through the American Heart Association or the American Red Cross; no others will be accepted.

Graduation Requirements

- Successful completion of the courses listed below with a grade of "C" or higher
- Achieve minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) component

Credential and Professional Certifications

Graduates earn an Associate of Science Degree and are eligible to take the National Board written examination and a State and/or Regional Board Examination for licensure as a Registered Dental Hygienist.

State Licensure

Each state has specific clinical examination requirements for licensure as a dental hygienist. The state of California accepts any one of the following clinical examinations: Western Regional Examining Board (WREB) dental hygiene examination, Central Regional Dental Testing Service (CRDTS) dental hygiene examination, or California RDH clinical examination.

Graduates are eligible to sit for the California RDH clinical examination after they have passed the National Board Dental Hygiene Examination. Graduating seniors may take the WREB or CRDTS examination during their final semester, with certification from the campus dean or dental hygiene Program Director.

Diagnostic Medical Sonography

Revision: Changes were made to the **Diagnostic Medical Sonography program description** as set forth below: (Catalog p. 74, rev. 12/12/19)

Diagnostic Medical Sonography

This program is offered at **Bakersfield**.

Program Description

The Diagnostic Medical Sonography program is 73 weeks in length and prepares students to work as an entry-level general sonographer. Students learn how to perform ultrasound scanning examinations and record the data for interpretation by a physician. Graduates are prepared to provide effective oral and written communication to the healthcare team as it pertains to diagnostic results.

Program Student Learning Outcomes

Upon completion of this program, the successful student will be able to:

1. Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results
2. Perform appropriate ultrasound scanning procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician
3. Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician
4. Exercise discretion and judgment in the performance of sonographic and/or other non-invasive diagnostic services
5. Demonstrate appropriate communication skills with patients and colleagues.
6. Act in a professional and ethical manner
7. Provide patient education related to medical ultrasound and/or other non-invasive diagnostic ultrasound techniques, and promote principles of good health
8. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life

Admissions Requirements

- Applicants must be at least 18 years of age and have completed a minimum of 9 units from a combination of any of the following prerequisite courses with a grade a "C" or higher at an accredited college or university:
 - Writing and Composition

- Intermediate Algebra or higher
- Anatomy and Physiology
- Medical Terminology

Applicants who have successfully completed the prerequisites will be considered for admission into the program. Using a point-based system, applicants will be ranked on the following criteria: cumulative GPA on prerequisite courses, an assessment, professional references, and a personal interview with program faculty. Enrollment decisions are made by the Program Director or his/her designee.

Graduation Requirements

- Successful completion of the courses listed below with a grade of "C" or higher
- Achieve the minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) component
- Successful completion of the Career Services Seminar (CSS100)

Credential and Professional Certifications

Graduates earn an Associate of Science in Diagnostic Medical Sonography. Upon completion of 1,680 hours of work experience as a diagnostic medical sonographer, graduates are eligible to sit for the American Registry for Diagnostic Medical Sonography® (ARDMS®) certification exam. An alternative exam pathway is available to graduates who have earned a previous health studies credential (please see the Program Director for more information). Students also earn certification in CPR/First Aid.

GENERAL EDUCATION FOR NON-DEGREE-SEEKING STUDENTS

General Education options for non-degree-seeking students have been added as set forth below: (Catalog Section 7, rev. 6.3.19)

SJVC offers the following General Education courses to students seeking to complete prerequisites to enroll in an SJVC program* or to apply to a program at another institution**.

Enrollment in standalone GE prerequisite courses is independent of any SJVC program enrollment and will be treated separately. **The tuition for GE prerequisite courses is not eligible for financial aid.** Payment is the sole responsibility of the student and payments must be made as agreed upon in the student's Retail Installment Contract. See tuition tables for cost of individual courses.

Science Courses

Science courses are ten weeks in length and are offered as standalone courses at the Bakersfield, Ontario, and Visalia campuses. Campus offerings vary; please contact the Admissions office at the campus of interest to inquire about courses and schedules.

- CHE 3: General Chemistry
- CHE 4: Introduction to Organic and Biochemistry
- BIOL 10: Human Anatomy
- BIOL 14: Microbiology
- BIOL 45: Human Physiology

Please see the program description of interest for information regarding prerequisites. Course descriptions may be found in Section 8 of this Catalog.

Non-Science Courses

Non-science courses are five weeks in length and are offered as standalone courses at the Bakersfield, Fresno, Ontario, and Visalia campuses, as well as online. **Campus offerings vary;** please contact the Admissions office at the campus of interest to inquire about courses and schedules.

- SOC 1: Introduction to Sociology
- SPC 1A: Introduction to Public Speaking*

*SPC 1A is offered as a ten-week course at the Visalia campus for cohorts of five (5) or more students.

Please see the program description of interest for information regarding prerequisites. Course descriptions may be found in Section 8 of this Catalog.

*Completion of the General Education requirements and/or prerequisite courses at SJVC does not guarantee entry into an SJVC program.

**The transferability of credits you earn at SJVC is at the complete discretion of an institution to which you seek to transfer. Acceptance of the degree or certificate you earn in your program is also at the complete discretion of the institution to which you may seek to transfer. If the credits you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat all or some of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending SJVC to determine if your credits will transfer.

Occupational Therapy Assistant

Occupational Therapy Assistant

The **program name** has been changed to **Occupational Therapy Assistant** and changes were made to the **Occupational Therapy Assistant program description**. (Catalog p. 93-94, rev. 6.3.19)
Additional revisions have been made to the **Accreditation and State** (rev. 8.30.19)

OTA 43: Professional Seminar 2 (0.0 units) has been removed from **Requirements**. (rev. 10.4.19)

This program is offered at the **Fresno** campus.

Program Description

SJVC's Occupational Therapy Assistant program is 83 weeks in length and is committed to preparing Occupational Therapy Assistants as professionals who will contribute to the health and well-being of individuals, groups, and diverse populations. The hands-on methods and curriculum prepare the OTA to sit for the NBCOT exam and to practice as a dynamic team member working under the supervision of an Occupational Therapist. Occupational Therapy Assistants are employed in rehabilitation facilities, hospitals, skilled nursing facilities, schools, day treatment centers, outpatient clinics, and other community agencies.

Students are expected to be in good physical and mental health as determined by provisions of a completed physical examination. Current required immunizations and freedom from TB as required by clinical agencies must be provided prior to the beginning of OTA courses and maintained throughout the program.

A current CPR card for healthcare providers issued by the American Heart Association must be provided at the time of admission to the program and maintained throughout the program.

Program Student Learning Outcomes

Upon completion of the program, the successful student will be able to:

1. Be eligible to sit for the NBCOT examination
2. Assist individuals from unique backgrounds while demonstrating the value of their dignity and rights
3. Assist individuals from diverse backgrounds and apply cultural sensitivity during treatment interactions
4. Demonstrate ability to utilize purposeful activity to facilitate adaptation and remediate dysfunction for all age groups, disabilities and occupational roles
5. Demonstrate ability to provide quality services in a wide variety of practice environments, including emerging areas of practice
6. Demonstrate the necessary occupational therapy skills to meet the practice needs of the community
7. Exhibit behaviors consistent with the Occupational Therapy Code of Ethics and professionalism
8. Explain the importance of continuing education, technical advancement, leadership opportunities, career advancement and community service in occupational therapy

9. Advocate and promote the field of occupational therapy at every opportunity

Admission Requirements

Completion of a minimum of 26 units of general education prerequisite coursework (GPA of 2.5 or higher) in the following subjects at a regionally or nationally accredited college or university:

- General or Abnormal Psychology*
- Introduction to Sociology or Cultural Anthropology
- Human Anatomy with lab (w/in last 10 years) *
- Human Physiology with lab (w/in last 10 years)*
- Writing & Composition
- Intermediate Algebra or higher
- Introduction to Public Speaking or Other Communication
- Ethics (SJVC requirement)

*Requires a C (2.0) grade or higher (rev. 8.30.19)

If you have earned a Bachelor's degree from an institution of higher education recognized by the Council for Higher Education Accreditation or is otherwise validated for comparability to coursework for which it is accepted, then all of the general education prerequisite coursework may be fulfilled. The program will evaluate transcripts to ensure that the student has completed the following course requirements:

- General or Abnormal Psychology
- Human Anatomy with lab
- Human Physiology with lab

Graduation Requirements

- Successful completion of the courses listed below with a grade of C or higher in all OTA courses
- Achieve minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) component

Credential and Professional Certifications

Graduates of this program earn an Associate of Science Degree and HIPAA certification.

Upon obtaining accreditation from ACOTE, SJVC graduates will be able to sit for the national certification exam for Occupational Therapy Assistants, administered by the National Board for Certification of Occupational Therapy. After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA)[®]. Most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

Graduate Placement

The following job categories are considered in-field placements for graduates of the Occupational Therapy Assistant program. Detailed information for each Standard Occupational Code (SOC) can be found at <http://www.onetonline.org/>.

Accreditation and State Licensure (rev. 8.30.19)

The SJVC OTA program is in progress of seeking accreditation through the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD, 20814-3449. AOTA's phone number is (301) 652-6611 x2914. At its meeting on July 26-28, 2019, ACOTE considered the Candidacy Application from the Occupational Therapy Assistant Program at San Joaquin Valley College-Fresno Campus, Fresno, California, and voted to GRANT CANDIDACY STATUS. As a result of this action, the institution may admit students into the Occupational Therapy Assistant Program according to the approved timeline (January 2020) and may proceed to the Preaccreditation Review step of the accreditation process.

Program Standards

Any prior convictions of a misdemeanor or felony may influence eligibility for state registration and eligibility to sit for National Boards as an Occupational Therapy Assistant. Applicants with prior convictions are urged to call the Occupational Therapy Board of California at (916) 263-2294 and NBCOT at (301) 990-7979. Students accepted to the Occupational Therapy Assistant program are required to undergo a background check and/or urine drug screening test before starting the program or being placed at a clinical site. The cost of these procedures is paid by SJVC. Failure to pass either or both of these procedures may interfere with clinical placement and/or acceptance of the student into the program.

Pharmacy Technician

The **Programs of Study Leading to an Associate of Science Degree Table of Contents** has been revised to reflect that the **Antelope Valley (Lancaster), Bakersfield, Fresno, Modesto (Salida), Ontario, Temecula, Victor Valley (Hesperia)**, and **Visalia** campuses are now offering the Associate of Science in **Pharmacy Technician** program; the statement directing readers to the Certificate option has been removed. (Catalog p. 60, rev. 9.13.19). The **Rancho Mirage** and **Santa Maria** campuses were added on 12.2.19.

The **Pharmacy Technician Associate Degree program description** has been revised, as set forth below: (Catalog p. 95-96, rev. 9.13.19) The **Rancho Mirage** and **Santa Maria** campuses were added on 12.2.19.

Corrections were made to the **Program Student Learning Outcomes** (rev. 10.4.19)

Pharmacy Technician

This program is offered at **Antelope Valley (Lancaster), Bakersfield, Fresno, Modesto (Salida), Ontario, Rancho Mirage, Santa Maria, Temecula, Victor Valley (Hesperia), and Visalia.**

Program Description

The Pharmacy Technician program is 61 weeks in length and prepares students to work under the direct supervision of a registered pharmacist as part of a team responsible for carrying out a doctor's pharmaceutical orders. Pharmacy Technicians assist in the various activities of compounding, distributing, and dispensing of medications. Training includes a balance of classroom and lab instruction, as well as an extern component which allows students experiential learning in an actual clinical environment.

Program Student Learning Outcomes

Upon completion of this program, the successful student will be able to:

1. Exhibit foundational Pharmacy Technician competencies
2. Read, interpret, and follow pharmacy laws, ethics, and regulations
3. Read, interpret, transcribe, troubleshoot, and process prescriptions and medical orders
4. Perform sterile and non-sterile compounding
5. Perform pharmacy billing and computer system applications
6. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life
7. Demonstrate the social skills, professional appearance, attitudes and behavior that employers expect of all **SJVC** graduates

Graduation Requirements

- Successful completion of the courses listed below with a grade of "C" or better in all PT courses
- Minimum keyboarding speed of 35 net words per minute
- Meet the minimum requirement of the Health Insurance Portability Accountability Act (HIPAA) component
- Successful completion of the Career Services Seminar (CSS 100)

Credential and Professional Certifications

Graduates earn an Associate of Science degree and are eligible to apply for licensure with the California State Board of Pharmacy (see below). Students qualify to take the Pharmacy Technician Certification Exam (PTCE) upon successful completion of practice exams administered during their course of study and with the approval of the Pharmacy Liaison. Students also earn their HIPAA Certification.

State Licensure

Graduates are eligible to apply for licensure with the California State Board of Pharmacy providing they meet the requirements as specified by the Board, including a Department of Justice criminal background check and databank query to determine if an act has been committed that constitutes grounds for denial of licensure. This license is required in the State of California for employment as a pharmacy technician.

Vocational Nursing

The **Program Description** page for the Vocational Nursing program has been revised as set forth below: (Catalog p. 106, rev. 9.13.19)

Program Description

The Vocational Nursing program is 67 weeks in length and trains students to offer professional care to the sick, injured, convalescent, and disabled under the direction of physicians and registered nurses. LVNs are an important part of a health care team responsible for administering medical treatment, detecting illnesses, and patient education.

The program includes an externship that allows students to further their studies in a real-world medical environment. This hands-on clinical training enhances the learning experience and allows students to develop a work history while completing their studies.

The Vocational Nursing program is approved by the Board of Vocational Nursing and Psychiatric Technicians.

Diagnostic Medical Sonography

Revision: Changes were made to the **Diagnostic Medical Sonography program description** as set forth below: (Catalog p. 123, rev. _____)

Diagnostic Medical Sonography

This program is offered at **Bakersfield**.

Program Description

The Diagnostic Medical Sonography program is 73 weeks in length and prepares students to work as an entry-level general sonographer. Students learn how to perform ultrasound scanning examinations and record the data for interpretation by a physician. Graduates are prepared to provide effective oral and written communication to the healthcare team as it pertains to diagnostic results.

Program Student Learning Outcomes

Upon completion of this program, the successful student will be able to:

1. Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results
2. Perform appropriate ultrasound scanning procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician
3. Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician
4. Exercise discretion and judgment in the performance of sonographic and/or other non-invasive diagnostic services
5. Demonstrate appropriate communication skills with patients and colleagues.
6. Act in a professional and ethical manner
7. Provide patient education related to medical ultrasound and/or other non-invasive diagnostic ultrasound techniques, and promote principles of good health
8. Relate and apply concepts of communication, reasoning, critical analysis, ethical behavior and appropriate interpersonal interaction to situations in his or her career and personal life

Admissions Requirements

- Applicants must be at least 18 years of age and have completed a minimum of 9 units from a combination of any of the following prerequisite courses with a grade a "C" or higher at an accredited college or university:
 - Writing and Composition
 - Intermediate Algebra or higher
 - Anatomy and Physiology
 - Medical Terminology

Applicants who have successfully completed the prerequisites will be considered for admission into the program. Using a point-based system, applicants will be ranked on the following criteria: cumulative GPA on prerequisite courses, an assessment, professional references, and a personal interview with program faculty. Enrollment decisions are made by the Program Director or his/her designee.

Graduation Requirements

- Successful completion of the courses listed below with a grade of "C" or higher
- Achieve the minimum requirement of the Health Insurance Portability and Accountability Act (HIPAA) component
- Successful completion of the Career Services Seminar (CSS100)

Credential and Professional Certifications

Graduates earn a Certificate of Completion in Diagnostic Medical Sonography. Upon completion of 1,680 hours of work experience as a diagnostic medical sonographer, graduates are eligible to sit for the American Registry for Diagnostic Medical Sonography® (ARDMS®) certification exam. An alternative exam pathway is available to graduates who have earned a previous health studies credential (please see the Program Director for more information). Students also earn certification in CPR/First Aid.

Graduate Placement

The following job categories are considered in-field placements for graduates of the Diagnostic Medical Sonography Program. Detailed information for each Standard Occupational Code (SOC) can be found at <http://www.onetonline.org/>.

SECTION 8: COURSE DESCRIPTIONS

The course description for **AERO 100** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 100: Aircraft Basic Science

9.0 units – 250 hours

This course covers the basics of blueprint reading, mechanical drawings, the fabrication of fluid lines, and the identification of different aircraft hardware and materials. It will also focus on nondestructive testing methods, how to utilize precision measuring tools, and aircraft corrosion control. Proper FAA documentation and manufacturer instructions will be used which will include mechanic privileges and limitations. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 110** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 110: Basic Electricity and Electronics

9.0 units – 250 hours

This course will break down basic math, how it relates to the physics of flight, and the importance of weight and balance for an aircraft. Basic electricity will also be covered, discussing capacitance, inductance, volts, amperes, resistance, and AC/DC circuits. Electrical schematics, flow-charts, and wiring diagrams will be emphasized. The inspection and servicing of aircraft batteries is included. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 120** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 120: Reciprocating Engine Theory and Engine Overhaul

9.0 units – 250 hours

This course will focus on the operational concepts, inspections, and maintenance procedures of reciprocating engines and their accessories. This includes the removal, overhaul, and inspection of a piston engine. Students will also learn the procedures involved in the inspection and servicing of engine instrument systems, ground operations, and safety practices. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 130** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 130: Sheet Metal Structures & Airframe Auxiliary Systems

9.0 units – 250 hours

This course covers procedures for the layout, fabrication, drilling, and riveting of aircraft sheet metal. This course will also cover autopilot, communication, and navigation systems. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 140** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 140: Turbine Engines

9.0 units – 250 hours

This course will focus on the operational concepts, inspections, and maintenance procedures of turbine engines and their accessories. This includes the removal, overhaul, and inspection of a turbine engine. Students will also learn the procedures involved in the inspection and servicing of engine instrument systems, ground operations, and safety practices. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 150** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 150: Composite Structures

9.0 units – 250 hours

This course will include the inspection and repair procedures for wood, composite, and fabric-covered structures. Techniques for aircraft conformity and airworthiness will be taught as well. Fabrication and repair of plastics, honeycomb, and bonded aluminum structures will be included. Students will also learn about applications of aircraft finishes which includes paint and dope. Basic welding practices, fabrication, and repair are also included. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 160** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 160: Propellers and Engine Auxiliary Systems

9.0 units – 250 hours

This course will cover the inspection, troubleshooting, and repair of landing gear retraction systems which includes shock struts, wheels, brakes, and tires. Fuel management and dump systems will be discussed, as well as inspection and repair of auxiliary systems. This includes ice and rain control, smoke and carbon monoxide warning systems, and fire detection and extinguishing systems. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 170** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 170: Aircraft Landing Gear

9.0 units – 250 hours

This course will cover the inspection, troubleshooting, and repair of landing gear retraction systems which includes shock struts, wheels, brakes, and tires. Fuel management and dump systems will be discussed, as well as inspection and repair of auxiliary systems. This includes ice and rain control, smoke and carbon monoxide warning systems, and fire detection and extinguishing systems. **A grade of "C" or higher is required to pass this course.**

The course description for **AERO 200** has been added. (Catalog p. 147, rev. 12.2.19)

AERO 200: Professional Licensing Seminar

3.0 units – 96 hours

The focus of this course is the review and practical application of the AMT license examination. Students will prepare for both the written and practical examinations. The course also covers a review of the professional opportunities for the AMT graduate. Professional development and employment skills including resume writing, interview techniques, and personalized job search planning will be covered in this class. The final grade in this class includes projects and assignments related to professional development and employment skills. **A grade of "C" or higher is required to pass this course.**

The course description for **BUSN 120** has been revised. (Catalog p. 148, rev. 9.13.19)

BUSN 120: Business Communication

3.0 units – 45 hours

This course focuses on effective writing techniques utilized in business to produce various communications and documents, including business letters, minutes and reports, dictation and note taking. Proper grammar, mechanics, number usage, vocabulary, and proofreading are emphasized, as well as style, appearance, tone, and reader appeal. Students will develop time management, organization, presentation and communication skills.

The course description for **BUSN 201** has been added. (Catalog p. 149, rev. 9.13.19)

BUSN 201: Spreadsheet Management

3.0 units – 45 hours

This course builds fundamental skills in Microsoft Excel® for use as a business tool. Students will create and manage worksheets, apply formulas and functions, and create data visualizations.

The course description for **BUSN 251** has been added. (Catalog p. 149, rev. 9.13.19)

BUSN 251: Business Externship

3.0 units – 144 hours

Students will utilize their skills and knowledge by working in a local business under direct supervision of the professional manager. Students are required to turn in completed hours and evaluations, and the grade earned in this course is Pass/Fail. **Passing this course is a graduation requirement.**

The course description for BUSN 260 has been removed. (Catalog p. 149, rev. 10.4.19)

BUSN 260: Business Seminar

1.0 unit – 30 hours

This course is the culmination of the Business Administration program. Students will apply the knowledge, skills, and abilities developed throughout the program to practice and prepare for certification exams offered.

The course description for **CON 142** has been added. (Catalog p. 153, rev. 6.3.19)

CON 142: Construction Management Supervision

3.0 units – 45 hours

All the methods of field supervision in construction will be identified in this course. Students will also investigate and discuss basic principles of business management, how to be an effective manager, and the best practices of supervision, motivation, and leading a team to successful outcomes. This course also covers OSHA policies, procedures, and standards, as well as construction safety and health principles. Upon successful course completion, the student will receive an OSHA 30 Hour Construction Outreach Training Completion Card.

The course description for **ELEC 120** has been revised to reflect the migration of CPR and First Aid training from the ELEC 100 course. (Catalog p. 160, rev. 6.3.19)

ELEC 120: Blueprint Reading for Electricians

5.0 units – 90 hours

This course is designed to introduce students to architectural plans utilized in the construction industry for residential and commercial construction with a focus on the electrical trade. Students will develop the skills needed to interpret information conveyed on blueprints and apply these skills in subsequent coursework. Students will be trained in CPR and First Aid. **A grade of "C" or higher is required to pass this course.**

The course description for **ELEC 210** has been removed, as the course has been redesigned into two distinct courses. (Catalog p. 160, rev. 6.19.19)

ELEC 210: Commercial and Industrial Wiring

10.0 units – 180 hours

This course covers the theory and application of electrical buildings inclusive of general wiring, electrical systems, alternating current motors, transformers, lighting systems and load calculations, all in adherence to the requirements of the National Electric Code. **A grade of "C" or higher is required to pass this course.**

The course description for **ELEC 211** has been added as a result of the **ELEC 210** course being redesigned into two distinct courses. (Catalog p. 160, rev. 6.19.19)

ELEC 211: Commercial Wiring

5.0 units – 90 hours

This course covers the theory and application of electrical wiring systems utilized in commercial buildings inclusive of general wiring and raceway systems, lighting systems, low voltage systems, overcurrent and grounding protection, electrical distribution systems, and load calculations, all in adherence to the requirements of the National Electrical Code. **A grade of "C" or higher is required to pass this course.**

The course description for **ELEC 212** has been added as a result of the **ELEC 210** course being redesigned into two distinct courses. (Catalog p. 160, rev. 6.19.19)

ELEC 212: Industrial Wiring

5.0 units – 90 hours

This course covers the theory and application of electrical wiring systems utilized in industrial buildings inclusive of general wiring and raceway systems, lighting systems, low voltage control systems, alternating current motors and transformers, and load calculations, all in adherence to the requirements of the National Electrical Code. **A grade of "C" or higher is required to pass this course.**

A typographical error has been corrected in the **ENG 121** course description (Catalog p. 161, rev. 9.13.19)

ENG 121: Composition and Reading – Part A

3.0 units/45 hours

This is the first in a two-part college-level English course. In this course, students will learn the foundation of critically reading and writing in a variety of rhetorical modes. Students will read various essays and literature, and apply critical analysis to their own writing. Students will practice all aspects of the writing process, and by the end of Part B, they will meet a goal of writing a minimum of 6000 words through a variety of assignments.

The course description for **HC 470** has been added. (Catalog p. 161, rev. 8.13.19)

HC 470: Research Capstone

5.0 units – 90 hours

This course will provide students the opportunity to integrate their field of study with their selected area of specialty to research an issue and propose a solution. The student will compose a formal paper that will include a literature review to compare and contrast differing perspectives related to a chosen problem or process in a healthcare facility or department. The student will then compose and deliver a presentation suitable for an interprofessional audience. **A grade of "C" or higher is required to pass this course.**

The course name of **HUM125** has been corrected and the course description has been revised. (Catalog p. 162, rev. 9.13.19)

HUMN 125: Intercultural Communication

3.0 Units – 45 hours

This course is designed to provide students with a broader understanding of cross-cultural communication theories, styles, and leadership techniques to find success in a diverse, global economy. The course will introduce related texts to help create a cultural worldview for students to apply to their field. The course will outline intercultural theories and techniques used in various fields to allow students to find realistic approaches to everyday situations, as applicable to individual disciplines. Students will analyze and discuss fiction and non-fiction texts from a cross-cultural communications perspective.

The course description for **IT 101** has been revised (Catalog p. 163, rev. 12.2.19)

IT 101: Industrial Electricity

10.0 units – 180 hours

This course is the study of the elements and applications of electricity that are common to any industrial facility. In strict accordance with the Occupation Safety and Health Administration (OSHA) and National Electric Code (NEC), this course will introduce students to electrical theory with an emphasis in those energy sources developed for commercial and manufacturing use. Students will utilize mathematical skills to calculate values and solve electrical based problems and scenarios. Additional topics include troubleshooting and installing complex control circuits.

The course description for **IT 110** has been revised (Catalog p. 163, rev. 12.2.19)

IT 110: Power Transmission

5.0 units – 90 hours

This course is the study of industrial bearings, industrial drive gears and gear systems, belt and chain drives, shaft joining and coupling devices. Students will focus on the operation, maintenance, and safety of power transmission systems and devices.

The course description for **IT 120** has been revised (Catalog p. 163, rev. 12.2.19)

IT 120: Fluid Power

5.0 units – 90 hours

This course presents basic concepts and operation of fluid power, demonstrating knowledge in maintenance, safety, and troubleshooting. Students will perform power operation with the use of hydraulic power systems,

pressure control valves, directional control valves, check valves, flow control valves, actuators, pumps, oil conditioners and measuring instruments.

The course description for **IT 201** has been revised (Catalog p. 163, rev. 12.2.19)

IT 201: Programmable Logic Controllers

10.0 units – 180 hours

This course presents basic concepts and applications of PLCs such as Language, performing installation and diagnostic functions, using programming tools, basic communications, and logic operations. The practical instructions of this course are performed with Allen Bradley equipment and RSLogix software, both of which are predominantly used within the manufacturing industry.

The name and course description for **MAP 126** have been revised. (Catalog p. 164, rev. 9.13.19)

MAP 126: Clinical Applications

4.0 units – 45 hours

In this course students will discuss the role of the medical assistant in a clinical setting. Students will demonstrate non-invasive procedures such as electrocardiograms and vital signs. They will prepare exam rooms, exam trays, using medical and surgical aseptic techniques. They will discuss blood-borne pathogen guidelines for a safe medical office. **A grade of "C" or higher is required to pass this course.**

A typographical error has been corrected in the **MAP 501** course description. (Catalog p. 164, rev. 9.13.19)

MOP 510: Externship Seminar

1.0 units – 15 hours

This course will focus on preparing for professional credentialing through a recognized certification examination as identified under the Meaningful Use Rule. In this course, students will assess their performance and application of acquired skills and knowledge in general, administrative, and clinical competencies. **The grade earned in this course is Pass/Fail.**

The course description for **MTH 121** has been revised. (Catalog p. 166, rev. 9.13.19)

MTH 121: College Algebra – Part A

3.0 units – 45 hours

This course integrates technology with mathematics through the use of online learning resources, and covers the fundamentals and terminology of algebra. Topics include real numbers, order of operations, single and multiple step linear equations and inequalities, use of formulas, algebraic expressions, polynomials, systems of equations, and graphing of linear equations. Students will utilize the metric and U.S. standard systems. The fundamentals and real-world formulaic terminology will be provided. This course offers applications that allow students to relate to and to apply concepts to their field of study.

The course description for **MTH 122** has been revised. (Catalog p. 166, rev. 9.13.19)

MTH 122: College Algebra – Part B

3.0 units – 45 hours

This course integrates technology with mathematics through the use of online learning resources. Topics include use of formulas, algebraic expressions, polynomials, exponential and logarithmic expressions, and quadratic equations. Students will utilize rational and radical expressions and conics functions. This course offers applications that allow students to relate to and to apply concepts to their field of study.

The course description for **OTA 42** has been revised. (Catalog p. 168, rev. 10.4.19)

OTA 42: National Board for Certification in Occupational Therapy Exam Prep

2.0 units – 44 hours

This course will provide the practice of NBCOT exam questions and exam strategies. Students will create study strategies in preparation for the NBCOT exam. Therapy Ed™ will provide additional in-class training. Students will learn the necessary steps to register for the NBCOT and CA state licensure. Students will also explore license requirements and variations in laws between states and regions.

The course description for OTA 43 has been removed. (Catalog p. 168, rev. 10.4.19)

OTA 43: Professional Seminar 2

0.0 units – 12 hours

The course description for **PHR 15** has been revised. (Catalog p. 169, rev. 9.13.19)

PHR 15: Pharmacy Science and Applications 2

5.0 units – 90 hours

This course covers the theory of anatomy, physiology, pathophysiology, and related pharmacology of the urinary, circulatory, and respiratory systems. A comprehensive overview of pharmaceutical dosage forms, pharmacokinetics, terminology, abbreviations and symbols, the difference between trade and generic drugs and interpretation of prescriptions in relation to these systems will be included. Students will utilize the pharmacy lab in the applications of pharmacy science. Interpretations of doctor's orders along with prescription filling, refilling, and labeling procedures are practiced.

Also presented in this course are procedures for the generation and maintenance of accurate pharmacy records, third party claims and the use of pharmacy reference materials. Emphasis is placed on the importance of diligence in documentation and related issues of potential liability. Computerized pharmacy systems and keyboarding skills are also an integral component of this course. **A grade of "C" or higher is required to pass this course.**

The course description for **PHR 30** has been revised. (Catalog p. 169, rev. 9.13.19)

PHR 30: Pharmacy Math and Computations

3.0 units – 45 hours

This course focuses on the fundamentals of arithmetic processes involving fractions, decimals, ratios, and percentages including the metric, household and apothecary systems. Emphasis is placed on utilizing the math skills in pharmaceutical applications which are required to determine medication dosages and preparations. Students will also learn the business practices in a retail pharmacy. **A grade of "C" or higher is required to pass this course.**

The course description for **PHR 100** has been revised. (Catalog p. 169, rev. 9.13.19)

PHR 100: Pharmacy Science and Applications 1

5.0 units – 90 hours

This course covers the theory of anatomy, physiology, pathophysiology, and related pharmacology of the gastrointestinal, integumentary and sensory systems. A comprehensive overview of pharmaceutical dosage forms, pharmacokinetics, terminology, abbreviations and symbols, the difference between trade and generic drugs and interpretation of prescriptions in relation to these systems will be included. Students will utilize the pharmacy lab in the applications of pharmacy science. Interpretations of doctor's orders along with prescription filling, refilling, and labeling procedures are practiced. The course description for **PHR 120** has been revised. (Catalog p. 169, rev. 9.13.19)

PHR 120: Pharmacy Clinical Applications 1

2.0 units – 45 hours

This course covers the theory of anatomy, physiology, pathophysiology, and related pharmacology of the nervous systems, including mental health, and nutrition. A comprehensive overview of pharmaceutical dosage forms, pharmacokinetics, terminology, abbreviations and symbols, the difference between trade and generic drugs and interpretation of prescriptions in relation to this system will be included. Students will utilize the pharmacy lab in the applications of pharmacy science. Interpretations of doctor's orders along with prescription

filling, refilling, and labeling procedures are practiced. **A grade of "C" or higher is required to pass this course.**

A typographical error has been corrected in the **PHR 135** course description. (Catalog p. 169, rev. 9.13.19)

PHR 135: Pharmacy Clinical Applications 2

2.0 units – 45 hours

This course covers the theory of anatomy, physiology, pathophysiology and related pharmacology of the endocrine and reproductive systems. A comprehensive overview of pharmaceutical dosage forms, pharmacokinetics, terminology, abbreviations and symbols, the difference between trade and generic drugs and interpretation of prescriptions in relation to these systems will be included. This course will also cover the fundamentals in aseptic technique, proper procedures for drug distribution, dispensing, sterile compounding and packaging procedures. Interpretations of doctor's orders along with prescription filling, refilling, and labeling procedures are practiced. **A grade of "C" or higher is required to pass this course.**

The course description for **PHR 512** has been revised. (Catalog p. 170, rev. 9.13.19)

PHR 512: Clinical Experience

2.0 units – 120 hours

Students will apply their acquired skills and knowledge, taking on the responsibilities and duties of a pharmacy technician trainee in a distinct pharmacy practice setting. The teaching/learning facility will provide appropriate supervision and evaluation of student performance. This course is taught concurrently with PHR 513. **Passing this course is a graduation requirement.**

The course description for **PHR 514** has been revised. (Catalog p. 170, rev. 9.13.19)

PHR 514: Certification Prep

2.0 units – 30 hours

The focus of this course is to prepare students for the certification exam through projects, practice and review based on established certification criteria. Students will be provided with an online self-paced study program and instructor facilitated review. Students will also take a practice exam built to content specifications with the same look, feel, and functionality as an actual certification exam. Students will discuss expectations and general responsibilities during the externship. **The grade earned in this course is Pass/Fail.**

The course description for **PHR 514** has been revised to better align with the Department of Consumer Affairs, California Code of Regulations Title 16/Section 1793.6 (c)³, completion of the total program before Pharmacy Technician students are eligible to apply for licensure.
