The proposed definitions and metrics are more appropriate for our ISS.

I support these changes

Will there be a need for re-evaluation of the standards in the next few years?

This was well received in Bakersfield by staff and leadership.

Hesperia campus is completely on board with the new standards and ISS changes. They are very focused, concise, and do-able. Thank you for the opportunity to be a part of the committee; we are excited for the changes to come.

I spoke with several employees on the Madera Campus about this information. They all agreed that the changes were a good idea.
