**Question 21**

Using the following guide, specify LLRC resources that need to be improved, both for the entire program collection and the individual resource types.

- ▶ Variety of resources (what new types are needed? Can any existing types be discontinued?)
- ▶ Number of resources (are multiple copies needed?)
- ▶ Outdated resources (are any out of date? Do more recent editions or substitutions exist?)
- ▶ Absent resources (what areas/topics/subjects are missing or not fully covered?)

- N/A
- None at this time.
- Variety of resources: Unable to suggest new types. Would not recommend discontinuing existing types.  
Number of resources: Ample copies of resources are in place.  
Outdated resources: Some books are dated, but it would be costly to replace them (average \$300/book)  
Absent resources: Harrison's Medical Textbook has been checked out and not returned.
- This is not something available in the library but it used to be available on all computers for students to access- both on campus and at home. It is the C&S Solutions modules. The students can no longer access these modules at home to practice the concepts that are being taught. I believe that this needs to be rectified so that students can access the modules from their computers at home.
- Our LIRN resource is great and robust. It would be nice to have additional computer resources in the LRC to access this data base.
- LIRN and periodicals are excellent resources at our campus. Between those 2 resources, the access to information is wide and easily accessed.
- With the recent change in our LRC/SCC moving to our dean, a thorough evaluation of the eLearning resources will need to be conducted to determine items that may be deleted, as well as those that need to be procured.

- Possibly have more journal articles from our AARC AND CSRC organizations either online or physical copies

## Question 22

List suggestions for resources to add to the program's collection in your campus' LLRC.

- Include title, edition/year, author, publisher/distributor, ISBN/ISSN or manufacturer number, and price.
  - Search the Destiny catalog (InfoZone > links > Destiny) to determine what is available in your campus LLRC and what other campuses have in their collections, explore Bowker Books in LIRN for resources currently in publication (instructions are located at *Departments > Program Review > Library/Learning Resource Forms and Materials*), or ask your LLRC Coordinator to help you find publication information.
- 
- N/A
  - None at this time.
  - Do not have any suggestions for add-on resources. However, it would be great to have a You Tube directory of video's relevant to each course.
  - None
  - Increase computers.
  - nothing att
  - This will follow after a thorough review has been conducted
  - The dana oakes books are always very effect possibly adding a couple of the hemodynamic montiring pocket books would be ideal for the students to use.

## Question 23

Evaluate other support resources offered in your campus' LLRC.

Include suggestions for improving resources in areas such as general education, information literacy education, lifelong learning, career and job assistance, or other areas.

List recommendations for other services you feel would be beneficial.

- N/A
- None at this time.
- Suggest that RT instructors (Benton,McCord) meet with career services to develop a Resume template that is relevant to RCP employment.
- None
- Add more computers.
- Additonal computer in the LLRC would enable more of the student population access to the various online resources. We currently have 8 computers in the LLRC.
- At the moment, support is sufficuient for our campus size.
- more comptuers and better printers in that area this facility is big enough to where we need a bigger printer that can print more effectively and efficiently
